Cave Science: Insights from the Indian Subcontinent Jayant Biswas, 2022-01-01 Meghalayan Age Scientists added a new chapter in Earth's history and we are in it. It is one of the most notable achievements identified from a stalagmite rock structure from Mawmluh Cave Meghalaya which captured the abrupt climate event at 4200 years ago. Some caves identified from Meghalaya have already been in top chart positions on World's cave Map. Besides it, various other findings that emerged from the Indian caves are globally recognized. Notwithstanding these advances, cave science is not yet in the mainstream of our education system. This book is an attempt to accommodate all such notable findings which came out from the Indian caves and are internationally recognized. The book includes the 8 chapters which are on Indian Caves Paleoclimatology, Biospeleology, Chiroptelology, Geomicrobiology, Hydrogeology, Paleoanthropology, and Cave Conservancy. This comprehensive reference book will not only enlighten the path for studying Cave Science but also serve as a proper key to open various doors of Cave Research and their protection in India in a proper way. 45 Must-Know Sleep Science Insights in 7 Minutes Each Nietsnie Trebla, Shelf Indulgence, **Basic Science Insights into Clinical Puzzles, An Issue of Dermatologic Clinics** John J. The introductory chapter summarizes the state of Americans' health and well being in comparison to our international peers and presents background information concerning the limitations of current approaches to improving health and well being. Following the introduction, there are 21 chapters that examine the effects of various behavioral risk factors on population health, identify trends in life expectancy and quality of life, and suggest avenues for research in the behavioral and social science arenas to address problems affecting the U.S. population and populations in other developed and developing countries around the world.
