Science Of Discworld Iii Darwins Watch:

The Science of Discworld III Terry Pratchett, Ian Stewart, Jack Cohen, 2013-05-06 Roundworld is in trouble again and this time it looks fatal. Having created it in the first place the wizards of Unseen University feel vaguely responsible for its safety. They know the creatures who lived there escaped the impending Big Freeze by inventing the space elevator; they even intervened to rid the planet of a plague of elves who attempted to divert humanity onto a different time track. But now it's all gone wrong. Victorian England has stagnated and the pace of progress would embarrass a limping snail. Unless something drastic is done there won't be time for anyone to invent spaceflight and the human race will be turned into ice pops. Why though did history come adrift? Was it Sir Arthur Nightingale's dismal book about natural selection? Or was it the devastating response by an obscure country vicar called Charles Darwin whose bestselling *Theology of Species* made it impossible to refute the divine design of living creatures? Either way it's no easy task to change history as the wizards discover to their cost. Can the God of Evolution come to humanity's aid and ensure Darwin writes a very different book? And who stopped him writing it in the first place?

Darwin's Watch Terry Pratchett, Ian Stewart, Jack Cohen, 2015-06-09 When Charles Darwin writes the wrong book and reverses the progress of science Unseen University's wizards must once again save Roundworld. Earth that is from an apocalyptic end. Ever since a wizardly experiment inadvertently brought about the creation of Roundworld the wizard scholars of Unseen University have done their best to put things on the right course. In *Darwin's Watch* they may face their greatest challenge yet. A man called Darwin has written a bestselling book called *The Theology of the Species* and his theory of scientific design has been witlessly embraced by Victorian society. As a result scientific progress has slowed to a crawl and the wizards must find a way to change history back to the way it should have been. **DARWIN'S WATCH EXPLORES THE REVERBERATIONS** of major scientific advances on our planet and our culture: the dangers of obscurantism and the theory of evolution as you have never seen it before. This brilliant addition to Pratchett's beloved Discworld series illustrates with great wit and wisdom how the laws of our universe truly are stranger than fiction.
