Omar, Nor Hidayatun Abdul Razak, Nor Lailatul Wahidah Musa, Roslilee Ab. Halim, Siti Rosiah Mohamed, 2014-11-23 This biannual conference in Pahang Malaysia is a clearing house for many of the latest research findings in a highly multidisciplinary field. The contributions span a host of academic disciplines which are themselves rapidly evolving making this collection of 90 selected papers an invaluable snapshot of an arena of pure and applied science that produces many versatile innovations. The book covers a multitude of topics ranging from the sciences pure and applied to technology computing and engineering and on to social science disciplines such as business education and linguistics. The papers have been carefully chosen to represent the leading edge of the current research effort and come from individuals and teams working right around the globe. They are a trusted point of reference for academicians and students intending to pursue higher order research projects in relevant fields and form a major contribution to the international exchange of ideas and strategies in the various technological and social science disciplines. It is the sheer scope of this volume that ensures its relevance in a scientific climate with a marked trend towards disciplinary synthesis. *Proceedings of the International Conference on Science Technology and Social Sciences - Physics, Material and Industrial Technology (ICONSTAS-PMIT 2023)* Rosmamuhamadani Ramli, Mohd Nazarudin Zakaria, 2024-08-23 This is an open access book. **The Historiography of Contemporary Science, Technology, and Medicine** Ronald E. Doel, Thomas Söderqvist, 2006-10-02 Bringing together authorities on the history, historiography and methodology of recent and contemporary science, this book reviews the problems facing historians of technology, contemporary science and medicine and explores new ways forward. *The Travels and Adventures of Serendipity* Robert K. Merton, Elinor Barber, 2006-01-22 From the names of cruise lines and bookstores to an Australian ranch and a nudist camp outside of Atlanta, the word serendipity, that happy blend of wisdom and luck by which something is discovered not quite by accident, is today ubiquitous. This book traces the word's eventful history from its 1754 coinage into the twentieth century, chronicling along the way much of what we now call the natural and social sciences. The book charts where the term went, with whom it resided and how it fared. We cross oceans and academic specialties and meet those people, both famous and now obscure, who have used and abused serendipity. We encounter a linguistic sage, walk down the illustrious halls of the Harvard Medical School, attend the serendipitous birth of penicillin and meet someone who manages serendipity for the U.S. Navy. The story of serendipity is

fascinating that of *The Travels and Adventures of Serendipity* equally so. Written in the 1950s by already eminent sociologist Robert Merton and Elinor Barber the book though occasionally and most tantalizingly cited was intentionally never published. This is all the more curious because it so remarkably anticipated subsequent battles over research and funding many of which centered on the role of serendipity in science. Finally shortly after his ninety first birthday following Barber's death and preceding his own by but a little Merton agreed to expand and publish this major work. Beautifully written the book is permeated by the prodigious intellectual curiosity and generosity that characterized Merton's influential *On the Shoulders of Giants*. Absolutely entertaining as the history of a word the book is also tremendously important to all who value the miracle of intellectual discovery. It represents Merton's lifelong protest against that rhetoric of science that defines discovery as anything other than a messy blend of inspiration perspiration error and happy chance anything other than serendipity.
