Science, Technology, and the Environment John T. Hardy, 1975

Science, Technology, and American Diplomacy 1990, 1990

Linking Science and Technology to Society's Environmental Goals National Research Council, Policy and Global Affairs, Policy Division, 1996-11-21 Where should the United States focus its long term efforts to improve the nation's environment What are the nation's most important environmental issues What role should science and technology play in addressing these issues Linking Science and Technology to Society's Environmental Goals provides the current thinking and answers to these questions Based on input from a range of experts and interested individuals including representatives of industry government academia environmental organizations and Native American communities this book urges policymakers to Use social science and risk assessment to guide decision making Monitor environmental changes in a more thorough consistent and coordinated manner Reduce the adverse impact of chemicals on the environment Move away from the use of fossil fuels Adopt an environmental approach to engineering that reduces the use of natural resources Substantially increase our understanding of the relationship between population and consumption This book will be of special interest to policymakers in government and industry environmental scientists engineers and advocates and faculty students and researchers

Environmental Science and Technology Stanley E. Manahan, 1997-08-26 This broad overview covers the four traditional spheres of the environment water air earth and life and introduces a fifth sphere the anthrosphere which the author defines as the sphere of human activities especially

technology that affect the earth Environmental Science and Technology is organized into six major areas one for each of the five spheres and one introductory section that explains the fundamentals of chemistry biology biochemistry and environmental chemistry Throughout the book the relationships among the five spheres and their connections to the sciences are emphasized For better or worse technology is closely intertwined with the other four spheres Humans utilize resources manufacture goods practice agriculture and engage in other activities that have profound effects on the planet This unique text reference takes a realistic look at the environmental effects of human activities and shows how constructively directed technology can have a beneficial effect on the Earth

Science Under Siege Michael Fumento,1993 A conservative scientist and journalist explodes the media hype surrounding such perceived threats as Alar Agent Orange dioxin and food irradiation in this provocative hard hitting defense of modern technology He exposes the political intrigues and agenda that have led to the media s one sided reportage of everything from video terminal fallout to Love Canal

Science, technology and environment M. G. Chitkara,1998

The Environment and Science and Technology Education A. V. Baez,G. W. Knamiller,J. C. Smyth,2013-10-22 The Environment and Science and Technology Education covers topics on key issues in environmental education school based primary and secondary education and community based environmental education The book also discusses topics on tertiary professional and vocational environmental education and non formal public environmental education The text will give practical help to teachers in all countries in order to raise standards of education in those topics essential for development

Commerce, Justice, Science, and Related Agencies Appropriations for 2013 United States. Congress. House. Committee on Appropriations. Subcommittee on Commerce, Justice, Science, and Related Agencies,2012

Environmental Standards Christian Streffer,Josef Bückner,Adrienne Cansier,Dieter Cansier,Carl Friedrich Gethmann,Robert Guderian,Gerd Hanekamp,Dietrich Henschler,Gerald Pösch,Eckard Rehlinger,Ortwin Renn,Marco Slesina,Kerstin Wuttke,2013-06-29 The rapid growth of the world population nearly six fold over the last hundred years combined with the rising number of technical installations especially in the industrialized countries has lead to ever tighter and more strained living spaces on our planet Because of the inevitable processes of life man was at first an exploiter rather than a careful preserver of the environment Environmental awareness with the intention to conserve the environment has grown only in the last few decades Environmental standards have been defined and limit values have been set largely guided however by scientific and medical data on single exposures while public opinion on the other hand now increasingly calls for a stronger consideration of the more complex situations following combined exposures Furthermore it turned out that environmental standards while necessarily based on scientific data must also take into account ethical legal economic and sociological aspects A task of such complexity can only be dealt with appropriately in the framework of an interdisciplinary group
