Fredericks, 2008-10-30 Tony Fredericks presents a collection of best loved stories in the popular readers theatre format to integrate with the United States history and language arts curriculum in the upper elementary and middle school grades This collection of over 20 well known and not so well known tales will be invaluable to teachers in American schools as they do their usual units of study in American history and literature Plays focus on entertaining folklore tall tales and legends to aid teachers in building fluency skills in their young readers Included are tips for introducing and using Readers Theatre with students in grades 4-8

Storybridge to Second Language Literacy Irma-Kaarina Ghosn, 2013-09-01 Storybridge to Second Language Literacy makes a case for using authentic children's literature alternately also referred to as stories or real books as the medium of instruction in teaching English to young learners particularly in contexts where children must access general curriculum subjects in English The author first proposes theoretical foundations for the argument that illustrated children's books are superior to traditional language teaching courses in the primary school She builds the case around the motivational power of stories the language and content of quality children's literature and the potential of literature to contribute to development of second language academic literacy She then reviews research of the past thirty years that clearly supports her claim Finally she uses transcripts from real classrooms to illustrate how teachers in diverse contexts make use of stories Through the classroom vignettes a practical model of literature based instruction emerges that is adaptable to a wide range of primary school teaching contexts including English as a second language contexts in core English countries Storybridge to Second Language Literacy compiles in one volume solid theoretical foundations for story based instruction research evidence of the past thirty years supporting the approach not currently available in a single source and extensive classroom vignettes illustrating diverse practical applications not lesson plans This makes the book valuable for anyone in the field of young learner ELT MA students in TESOL will find the book useful and will

develop an understanding of why and how literature based instruction works and develop insight to guide their practice Members of TESOL Elementary Education EFL and Bilingual Education SIGs and IATEFL Young Learner SIG will be interested in the volume Instructors of teacher development courses should also find the proposed volume a valuable addition to assigned readings Each chapter is followed by Think about it questions and Try it out suggestions Power Up Your Library Bloomsbury Publishing,1996-09-15 Based on the methods of the New York City Library Power Program this is a practical handbook for revitalizing or rebuilding the school library Putting the many facets of the media specialist s professional life into the context of a flexibly scheduled collaboratively planned teaching program the book offers simple strategies for effecting positive change It covers such topics as the librarian s role as teacher programming assessment collection development facilities technology the library budget support staff and public relations Written for the school library media specialist who has or plans to have a library that conforms to today s vision of an effective school library media program this book places the library media center at the heart of the school s educational program and shows how to position the library as the catalyst for school reform Parenting Through Pop Culture JL Schatz,2020-03-02 With the ever increasing amount of media children are consuming it has become important for parents to learn how to help them navigate this consumption productively All too often the only approach to screen time by parents is a question of limiting how much and what kind Instead if parents and educators can adopt a more nuanced relationship to media and education adults and children can come together in order to engage with and deconstruct the messages that are embedded in popular culture This enables children to become more informed citizens This collection seeks to do just that by providing a series of essays on strategies to engage children with varying topics and programming to ensure that media consumption is an active process that promotes social and political awareness instead of apathetic entertainment Nonfiction Readers Theatre for Beginning Readers Anthony D. Fredericks,2007-04-30 Teachers and librarians are continually looking for an interesting fun way to input content knowledge to build that background information which will help push up student expository reading scores Nonfiction readers theatre is one way to accomplish this Professor Fredericks offers 30 short nonfiction readers theatre plays for the young reader grades 1 3 on topics ranging from earth and natural science to community helpers holidays and government Test scores across the country show American students are far more able to read narrative than nonfiction text Some research speculates this is due to a great lack in the background knowledge of many children Librarians are beginning to realize that a unique fit for the school librarian is as a provider of background knowledge materials for teachers to use
