Science And Civil Society:

Science and Civil Society Lynn K. Nyhart, Thomas Hoyt Broman, 2002 This volume explores the varieties of relationships formed between science and civil society at both the conceptual and institutional levels since the late seventeenth century It brings together general historians and historians of science with different national perspectives to confront the various ways in which science and civil society have shaped one another in different times and places How when and why did science become intertwined in the network of voluntary associations professional groups and other institutions we understand as comprising civil society How has science affected the ideology of civil society and thus the legitimacy of political authority in historical contexts as different as late eighteenth century America mid nineteenth century Germany and early twentieth century China How have scientists made use of the ideological links between science and civil political discourse to further their own professional ends In contrast to much recent writing on civil society this volume does not aim at making normative pronouncements about the role of civil society in promoting democratic polities nor does it attempt to weigh the role of science in democracy Instead the essays examine how the fruitful interplay of beliefs concerning science and civil society has worked to legitimize the institutional forms of civil society and naturalize its ideologies while at the same time giving to science its overwhelmingly powerful role in public life

Science in Civil Society John Ziman, 2016-09-22 These days science is everywhere It pervades our whole society Sometimes it is just a clutter of commonplace frivolities like new fashion fabrics Sometimes it miraculously preserves our life like penicillin Sometimes like climate change it looms over us as a portent of doom sometimes it promises a way of escape from such a fate Sometimes like a nuclear warhead it enshrouds us in political terror sometimes like a verification technology it offers an antidote to such evils How should we respond to this ambiguous and ubiquitous thing called science

Citizen Scientists Alessandra Buonfino, Stilgoe, 2009-06-03

International Encyclopedia of Civil Society Helmut K. Anheier, Stefan Toepler, 2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information Until now no publication has attempted to organize and consolidate this knowledge The International Encyclopedia of Civil Society fills this gap establishing a common set of understandings and terminology and an analytical starting point for future research Global in scope and authoritative in content the Encyclopedia offers succinct summaries of core concepts and theories definitions of terms biographical entries on important figures and organizational profiles In addition it serves as a reliable and up to date guide to additional sources of information In sum the Encyclopedia provides an overview of the contours of civil society social capital philanthropy and nonprofits across cultures and historical periods For researchers in nonprofit and civil society studies political science economics management and social enterprise this is the most systematic appraisal of a rapidly growing field

Science and Technology in Contemporary China Varaprasad S. Dolla, 2015-01-15 The Science and Technology policy changes in post Mao China cannot be complete without a historical narrative and analysis of Science and Technology in its pre policy

prior to 1850 and policy since 1850 when the Qing rulers began to promote Science and Technology periods This book is an imperative to revisit and interrogate the nature and scope of Chinese Science and Technology policy and progress The text is divided into three parts The first part considers both the macro and micro issues pertaining to Science and Technology policy in general and also of the policy in particular The second part highlights the historical narrative of Chinese Science and Technology policy as it has a key role in the evolution of contemporary Science and Technology architecture The third part discusses three focal components of the Chinese Science and Technology system each representing state society and international systems the organizational structure representing the state the research system representing society and technology acquisition representing the international system with serious implications for China **Anthropology and**

Political Science Myron J. Aronoff, Jan Kubik, 2013 What can anthropology and political science learn from each other The authors argue that collaboration particularly in the area of concepts and methodologies is tremendously beneficial for both disciplines though they also deal with some troubling aspects of the relationship Focusing on the influence of anthropology on political science the book examines the basic assumptions the practitioners of each discipline make about the nature of social and political reality compares some of the key concepts each field employs and provides an extensive review of the basic methods of research that bridge both disciplines ethnography and case study Through ethnography participant observation reliance on extended case studies and the use of anthropological concepts and sensibilities a greater understanding of some of the most challenging issues of the day can be gained For example political anthropology challenges the illusion of the autonomy of the political assumed by political science to characterize so called modern societies Several chapters include a cross disciplinary analysis of key concepts and issues political culture political ritual the politics of collective identity democratization in divided societies conflict resolution civil society and the politics of post Communist transformations **Impact of Addictive Substances and Behaviours on Individual and Societal Well-being** Peter

Anderson, Jürgen Rehm, Robin Room, 2015-02-12 Impact of Addictive Substances and Behaviours on Individual and Societal Well being outlines an innovative and fascinating new framework for understanding the harm that addictive substances and behaviours can cause Taking a holistic approach and with well being as a central tenet it demonstrates how using different methods can lead to a more just and evidence based approach to dealing with addictions Presenting the latest and most comprehensive research the expert team of authors examines the harm caused by addictive substances and behaviour factors that contribute to addictions and current European approaches to governing addictive substances and behaviours It is both legal and illegal drugs and behaviour that cause harm For the world as a whole cigarettes were the second largest cause of ill health and early death in 2010 alcohol the fifth and illegal drugs the eighteenth Regular and sustained heavy engagement in addictive substances and behaviour also impacts on quality of life and material living conditions The well being framework outlined here for understanding this impact places particular emphasis on the reciprocal relationship between well being and

drug use well being can be a driver of the heavy use of addictive substances and behaviours and also compounds the harm done Furthermore the response of society can increase the harm caused by drug use and stigma social exclusion and the actions of the criminal justice system can impair individual and societal well being considerably Impact of Addictive Substances and Behaviours on Individual and Societal Well being is based on the research from ALICE RAP a multidisciplinary European study of addictive substances and behaviours in contemporary society A timely addition to the field this book is essential reading for those wanting to make a real impact in the field of addiction prevention policy including public managers practitioners public health professionals and stakeholders influencing policy for addictive substances and behaviours as well as academics

International Encyclopedia of Political Science Bertrand Badie,Dirk Berg-Schlosser,Leonardo Morlino,2011-09-07 Developed in partnership with the International Political Science Association this must have authoritative political science resource in eight volumes provides a definitive picture of all aspects of political life

21st Century Political Science: A Reference Handbook John T Ishiyama,Marijke Breuning,2011 Offering full coverage of major subthemes and subfields within political science this reference handbook includes entries on topics from theory and methodology to international relations and institutions

Geography, Science and National Identity Charles W. J. Withers,2001-10-04 Charles Withers book brings together work on the history of geography and the history of science with extensive archival analysis to explore how geographical knowledge has been used to shape an understanding of the nation Using Scotland as an exemplar the author places geographical knowledge in its wider intellectual context to afford insights into perspectives of empire national identity and the geographies of science In so doing he advances a new area of geographical enquiry the historical geography of geographical knowledge and demonstrates how and why different forms of geographical knowledge have been used in the past to constitute national identity and where those forms were constructed and received The book will make an important contribution to the study of nationhood and empire and will therefore interest historians as well as students of historical geography and historians of science It is theoretically engaging empirically rich and beautifully illustrated

Ibss: Political Science: 1998 Compiled by the British Library of Political and Economic Science,2000-02 Renowned for its international coverage and rigorous selection procedures this series provides the most comprehensive and scholarly bibliographic service available in the social sciences Arranged by topic and indexed by author subject and place name each bibliography lists and annotates the most important works published in its field during the year of 1997 including hard to locate journal articles Each volume also includes a complete list of the periodicals consulted

The Social Science Encyclopedia Adam Kuper,2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global

perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society

Area Studies and Social Science Mark Tessler, Jodi Nachtwey, Anne Banda, 1999-05-22 The volume edited by Mark Tessler addresses a set of critical issues confronting all social scientists whose field of inquiry is extra American Tessler and his contributors succeed admirably in their goal American Historical Review How should scholars construct knowledge about politics economics and international relations in major world regions According to the contributors to this lively volume the conflicting approaches of regional specialists and discipline oriented social scientists must be combined to provide a firm foundation for studying the contemporary politics of the Middle East Contributors are Lisa Anderson Anne Banda Laurie A Brand Laura Zittrain Eisenberg John P Entelis Clement M Henry Magda Kandil Baghat Korany Jodi Nachtwey Augustus Richard Norton and Mark Tessler
