**The Genesis of Science** James Hannam, 2011-03-22 Maybe the Dark Ages Weren t So Dark Afterall Here are some facts you probably didn t learn in school People in the Middle Ages did not think the world was flat in fact medieval scholars could prove it wasn t The Inquisition never executed anyone because of their scientific ideas or discoveries actually the Church was the chief sponsor of scientific research and several popes were celebrated for their knowledge of the subject It was medieval scientific discoveries methods and principles that made possible western civilization s Scientific Revolution If you were taught that the Middle Ages were a time of intellectual stagnation superstition and ignorance you were taught a myth that has been utterly refuted by modern scholarship As a physicist and historian of science James Hannam shows in his brilliant new book *The Genesis of Science* How the Christian Middle Ages Launched the Scientific Revolution without the scholarship of the barbaric Middle Ages modern science simply would not exist The Middle Ages were a time of one intellectual triumph after another As Dr Hannam writes The people of medieval Europe invented spectacles the mechanical clock the windmill

and the blast furnace by themselves Lenses and cameras almost all kinds of machinery and the industrial revolution itself all owe their origins to the forgotten inventors of the Middle Ages In *The Genesis of Science* you will discover Why the scientific accomplishments of the Middle Ages far surpassed those of the classical world How medieval craftsmen and scientists not only made discoveries of their own but seized upon Eastern inventions printing gunpowder and the compass and improved them beyond the dreams of their originators How Galileo s notorious trial before the Inquisition was about politics not science Why the theology of the Catholic Church far from being an impediment led directly to the development of modern science Provocative engaging and a terrific read James Hannam s *Genesis of Science* will change the way you think about our past and our future

chemistry and alchemy zoology geography and medicine are described on their own terms Rounding out the work is a discussion of the many technological innovations of the medieval age such as mechanical clocks firearms and the blast furnace that profoundly altered the course of European and world history Biographical sketches provide insight into the lives and accomplishments of 20 men and women Christian Muslim and pagan whose works profoundly shaped the era s scientific spirit Eleven annotated key primary documents afford a fascinating glimpse into how the best minds of the time posed their questions and their answers An annotated timeline glossary of terms several illustrations and an annotated bibliography round out the work Medieval scientists or natural philosophers as they were then called were powerfully influenced by the authority of older traditions including Christianity and scientific ideas dating back to Plato Aristotle and Ptolemy Yet their respect for these traditions was balanced by an equal respect for reason and the spirit of inquiry Religious faith far from dampening scientific and technological innovation actually buttressed their efforts to understand the natural world as it was generally taken for granted that knowledge acquired through reason would harmonize with religious beliefs While medieval science and technology did not seek to overthrow the prevailing worldviews of the time their accomplishments did lay the groundwork for the scientific revolution and European global expansion of the early modern age **Between**
