History and Health Policy in the United States Rosemary Stevens,Charles E. Rosenberg,Lawton R. Burns,2006 In our rapidly advancing scientific and technological world many take great pride and comfort in believing that we are on the threshold of new ways of thinking living and understanding ourselves But despite dramatic discoveries that appear in every way to herald the future legacies still carry great weight Even in swiftly developing fields such as health and medicine most systems and policies embody a sequence of earlier ideas and preexisting patterns In History and Health Policy in the United States seventeen leading scholars of history the history of medicine bioethics law health policy sociology and organizational theory

make the case for the usefulness of history in evaluating and formulating health policy today In looking at issues as varied as the consumer economy risk and the plight of the uninsured the contributors uncover the often unstated assumptions that shape the way we think about technology the role of government and contemporary medicine They show how historical perspectives can help policymakers avoid the pitfalls of partisan outdated or merely fashionable approaches as well as how knowledge of previous systems can offer alternatives when policy directions seem unclear Together the essays argue that it is only by knowing where we have been that we can begin to understand health services today or speculate on policies for tomorrow

Healthcare in Private and Public from the Early Modern Period to 2000 Paul Weindling, 2014-12-17 A key volume on a central aspect of the history of medicine and its social relations The History of Healthcare in Public and Private examines how the modernisation of healthcare resulted in a wide variety of changing social arrangements in both public and private spheres This book considers a comprehensive range of topics ranging from children s health mental disorders and the influence of pharmaceutical companies to the systems of twentieth century healthcare in Britain Eastern Europe and South Africa Covering a broad chronological thematic and global scope chapters discuss key themes such as how changing economies have influenced configurations of healthcare how access has varied according to lifecycle ethnicity and wealth and how definitions of public and private have shifted over time Containing illustrations and a general introduction that outlines the key themes discussed in the volume The History of Healthcare in Public and Private is essential reading for any student interested in the history of medicine

The Emergence of Organizations and Markets John F. Padgett, Walter W. Powell, 2012-10-14 A dynamic framework for studying social emergence The social sciences have sophisticated models of choice and equilibrium but little understanding of the emergence of novelty Where do new alternatives new organizational forms and new types of people come from Combining biochemical insights about the origin of life with innovative and historically oriented social network analyses John Padgett and Walter Powell develop a theory about the emergence of organizational market and biographical novelty from the coevolution of multiple social networks They demonstrate that novelty arises from spillovers across intertwined networks in different domains In the short run actors make relations but in the long run relations make actors This theory of novelty emerging from intersecting production and biographical flows is developed through formal deductive modeling and through a wide range of original historical case studies Padgett and Powell build on the biochemical concept of autocatalysis the chemical definition of life and then extend this autocatalytic reasoning to social processes of production and communication Padgett and Powell along with other colleagues analyze a very wide range of cases of emergence They look at the emergence of organizational novelty in early capitalism and state formation they examine the transformation of communism and they analyze with detailed network data contemporary science based capitalism the biotechnology industry regional high tech clusters and the open source community

Pharma Gerald Posner, 2021-04-13 Exorbitant prices for lifesaving drugs safety recalls affecting tens of

millions of Americans and soaring rates of addiction and overdose on prescription opioids have caused many to lose faith in pharmaceutical companies Now Americans are demanding national reckoning with a monolithic industry In Pharma award winning journalist and New York Times best selling author Gerald Posner uncovers the real story of the Sacklers the family that became one of America s wealthiest from the success of OxyContin their blockbuster narcotic painkiller at the center of the opioid crisis The unexpected twists and turns of the Sakler family saga are told against the startling chronicle of a powerful industry that sits at the intersection of public health and profits Pharma reveals how and why American drug companies have put earnings ahead of patients

Allocating Federal Funds for Science and Technology United States. Congress. House. Committee on Science,1996 *Evaluating Research Centers and Institutes for Success!* William R. Tash,2006 Science Indicators, 1980 National Science Board (U.S.),1981 **Allocating Federal Funds for Science and Technology** Committee on Criteria for Federal Support of Research and Development,Institute of Medicine,Division on Engineering and Physical Sciences,National Academy of Sciences,National Academy of Engineering,National Research Council,1995-12-06 The United States faces a new challenge maintaining the vitality of its system for supporting science and technology despite fiscal stringency during the next several years To address this change the Senate Appropriations Committee requested a report from the National Academies of Sciences and Engineering and the Institute of Medicine to address the criteria that should be used in judging the appropriate allocation of funds to research and development activities to examine the appropriate balance among different types of institutions that conduct such research and to look at the means of assuring continued objectivity in the allocation process In this eagerly awaited book a committee of experts selected by the National Academies and the Institute responds with 13 recommendations that propose a new budgeting process and formulates a series of questions to address during that process The committee also makes corollary recommendations about merit review government oversight linking research and development to government missions the synergy between research and education and other topics The recommendations are aimed at rooting out obsolete and inadequate activities to free resources from good programs for even better ones in the belief that science and technology will be at least as important in the future as they have been in the past in dealing with problems that confront the nation The authoring committee of this book was chaired by Frank Press former President of the National Academy of Sciences 1981 1993 and Presidential Science and Technology Advisor 1977 1981 **Perspectives on Twentieth-century Pharmaceuticals** Viviane Quirke,Judy Slinn,2010 One of the most striking features of the twentieth century has been the rapid growth of the pharmaceutical industry and the large increases in the use and consumption of its products This trend began in the first half of the century but accelerated most sharply after the Second World War when the creation of national systems of healthcare created mass markets for drugs The industry then assumed a major economic social and political significance and became one of the most highly regulated sectors of the economy attracting the attention of industry analysts as well as academics This volume brings

together a collection of papers exploring and reflecting upon some of the significant strands in the current studies of pharmaceuticals in the twentieth century They touch upon many of the issues that are matters of concern and debate today and their international and multidisciplinary approaches enrich our understanding of an object of an industry and of a process that are at the heart of our highly medicalized contemporary societies **From Physick to Pharmacology** Louise Hill Curth, 2006 The social history of early medicine and the evolution of British retailing are two areas that have attracted considerable attention from academics in recent years That said little work has been done either by medical or business historians on the actual retailing of drugs This book merges the two themes by examining the growth in the retailing of medicinal drugs from the sixteenth into the twenty first centuries *The Commercialization of Genetic Research* Timothy A. Caulfield, Bryn Williams-Jones, 2012-12-06 The rapid advances made in genetic research and technology over the last few decades have led to a host of important discoveries that have allowed for the detection and hopefully soon the treatment of a number of genetic conditions and diseases Not surprisingly these advances have also raised numerous ethical concerns about how resulting technologies will be implemented and the impact they will have on different communities One particular concern is the enormous costs involved in conducting genetic research and the fact that the private sector has become heavily involved the desire to commercialize the results and technology derived from genetic research is considered problematic In September 1998 the Second International Conference on DNA Sampling titled The Commercialization of Genetic Research Ethical Legal and Policy Issues was held of the conference and of this book was to in Edmonton Alberta Canada The goal facilitate an interdisciplinary discussion of the legal ethical and policy implications arising from the commercialization of genetic research We solicited contributions for the book from authors in fields as diverse as ethics law medicine health policy and the social sciences The papers included while based on presentations given at the conference have been substantially expanded and enhanced by the commentary received and discussions held at the conference
