Törnqvist, 2011-01-01 Gunnar Törnqvist one of the world's most distinguished economic geographers can fairly claim to have discovered the notion of the geography of creativity over thirty years ago. This remarkable book summarises his immensely original and important research on the subject which now dominates the geographical literature. It is the book that the world has been waiting for him to publish. Sir Peter Hall, University College London, UK. This book offers a comprehensive perspective on the salience of context in fostering or hindering creativity. After several decades of research and teaching, Gunnar Törnqvist has become a foremost authority on the subject. Here his elegant conceptual overview is complemented by a methodologically innovative scrutiny of career journeys including those of Nobel Prize laureates. *The Geography of Creativity* will be warmly welcomed by not only cultural geographers but also by scholars in various fields of social science and humanities. Anne Buttner, University College Dublin, Ireland. What is creativity and who exactly is creative? In this insightful and highly readable book, Gunnar Törnqvist attempts to answer these questions by arguing that geographical milieux are hotbeds for creativity and renewal places where pioneers in art, technology and science have gathered and developed their special abilities. In light of ongoing social and economic transformations, special attention is paid to the institutional settings in firms and universities. The goal is to identify those features which facilitate and those which impede the creative process. Individual lives are illustrated through the autobiographies of hundreds of Nobel Laureates. Their life paths reveal the importance of geographic mobility and contact patterns for the development of creativity and international prestige. From these biographies we can also see how local milieux and schools have influenced many scientists. *The Geography of Creativity* will be of great benefit to academics and students in regional science, economic geography and economics.

Creative Cities, Cultural Clusters and Local Economic Development Philip N. Cooke, Luciana Lazzeretti, 2008-01-01. Analyses the economic development of cities from the cultural economy and creative industry perspectives. *The Triple Helix* Henry Etzkowitz, 2008-02-05. A Triple Helix of university, industry, government interactions is the key to innovation in increasingly knowledge-based societies. As the creation, dissemination and utilization of knowledge moves from the periphery to the center of industrial production and governance, the concept of innovation in product and process is itself being transformed. In its place is a new sense of innovation in innovation, the restructuring and enhancement of the organizational arrangements and incentives that foster innovation. This triple helix intersection of relatively independent institutional spheres generates hybrid organizations such as technology transfer offices in universities, firms and government research labs and business and financial support institutions such as angel networks and venture capital for new technology-based firms that are increasingly developing around the world. *The Triple Helix* describes this new innovation model and assists students, researchers and policymakers in addressing such questions as: How do we enhance the role of universities in regional economic and social development? How can governments at all levels encourage citizens to take an active role in promoting innovation in innovation and conversely how can citizens so encourage their governments? How can firms

collaborate with each other and with universities and government to become more innovative What are the key elements and challenges to reaching these goals

The Power of New Urban Tourism Claudia Ba, Sybille Frank, Claus Müller, Anna Laura Raschke, Kristin Wellner, Annika Zecher, 2021-07-21 The Power of New Urban Tourism explores new forms of tourism in urban areas with their social political cultural architectural and economic implications By investigating various showcases of New Urban Tourism within its social and spatial frames the book offers insights into power relations and connections between tourism and cityscapes in various socio spatial settings around the world Contributors to the volume show how urban space has become a battleground between local residents and visitors with changing perceptions of tourists as co users of public and private urban spaces and as influencers of the local economies This includes different roles of digital platforms as resources for access to the city and touristic opportunities as well as ways to organise and express protest or shifting representations of urban space With contemporary cases from a wide disciplinary spectrum the contributors investigate the power of New Urban Tourism in Africa Asia the Americas Europe and Oceania This focus allows a cross cultural evaluation of New Urban Tourism and its dynamic and changing conception transforming and subverting cities and tourism alike The Power of New Urban Tourism will be of great interest to academics researchers and students in the fields of cultural studies sociology the political sciences economics history human geography urban design and planning architecture ethnology and anthropology

Europe's Changing Geography Nicola Bellini, Ulrich Hilpert, 2013-08-21 European macro regions Euroregions and other forms of inter regional cross border cooperation have helped to shape new scenarios and new relational spaces which may generate opportunities for economic development while redefining the political and economic meaning of national borders This book is based on a number of key case studies which are crucial to understanding the complex web of political economic and cultural factors that shape the heterogeneous picture of Europe's new geography This book provides a fresh view on this phenomenon with a realistic approach shedding light on its complexity as well as on its ambiguities The new macro regions are interpreted with an approach recognizing the importance of institutionalization but also their flexible configuration and blurred borders The book also raises the issue of credibility and legitimacy arguing that inter regional cooperation has to be removed from the foggy realm of the exchanges between local political and bureaucratic elites in order to be clearly and concretely motivated and functional to key strategic objectives of the regions Finally the authors suggest a complementarity between relations based on proximity and wider possibly global networks where some territories and especially metropolises find opportunities based on virtual proximity Europe's Changing Geography provides a substantial re appraisal of a key phenomenon in the process of European integration today It will be of interest both to scholars of the political economy of European regionalism and to practitioners
