Science At The Edge Global Warming Science At The Edge:

Global Warming Sally Morgan, 2009-01-01 Global Warming looks at the causes of climate change and its profound effect for life on Earth It shows how historical clues such as ice cores are evidence that temperature fluctuation is not a new phenomenon and how the causes of our current changing climate are a result of human activity Learn about dramatic heat waves coral bleaching El Nio events and how methane and CFCs affect the atmosphere Consider the uses of renewable and alternative energy sources from powering cars and homes with photovoltaic cells to erecting vast wind farms and nuclear power stations

The Inquisition of Climate Science James Lawrence Powell, 2011 Modern science is under the greatest and most successful attack in recent history An industry of denial abetted by news media and infotainment broadcasters has duped the American public into rejecting an overwhelming body of rigorously vetted scientific evidence showing that human caused carbon based emissions are linked to warming the Earth The Inquisition of Climate Science is the first book to comprehensively take on the climate science denial movement and the deniers themselves exposing their lack of credentials their extensive industry funding and their failure to provide any alternative theory to explain the observed evidence of warming In this book readers meet the most prominent deniers while dissecting their credentials arguments and lack of objectivity James Lawrence Powell exhibits deniers wide variety of deceptive rhetorical techniques many stretching back to ancient Greece Carefully researched fully referenced and compellingly written his book clearly proves the evidence of global warming is real

The Encyclopedia of Global Warming Science and Technology Bruce E. Johansen, 2009-05-20 In this two volume encyclopedia for general readers and students of all levels Bruce E Johansen marshals scientific work on global warming into 300 articles presented in clear and understandable language Comprehensive in scope and accessible to all reader levels The Encyclopedia of Global Warming Science and Technology covers a vast range of topics concepts issues processes and scientists sifted and melded from the many scientific and technological fields These include atmospheric chemistry paleoclimatology biogeography oceanography geophysics glaciology soil science and more Bruce E Johansen digests the explosion of scientific work on global warming that has been published since 1980 and presents it in a set that is sure to be the indispensable standard reference work on the topic The information here is of importance to just about everyone on the planet for the findings of global warming science and technology should dictate the choices we make today to secure our common future This encyclopedia will prove useful for many different types of professionals inasmuch as global warming science informs public policy debates applied science and technology in such fields as energy generation architecture engineering and agriculture

Test-Tube Babies Ann Fullick, 2009-01-01 Test Tube Babies In Vitro Fertilization looks at the reality of infertility including the causes and possible treatments It looks into the techniques used in in vitro fertilization treatment and explains embryo transfer and storage egg donation and reproductive technologies It also considers the ethics surrounding groundbreaking stem cell research surrogacy frozen embryos and the older mothers debate

Law, Fiction and Activism in a Time of Climate Change Nicole Rogers, 2019-08-14 The book examines the narratives of climate change which have developed and which are currently evolving in three areas law fiction and activism Narratives of climate change generated by litigants judges writers of fiction and activists are having and will have a profound effect on the way we respond to the climate change crisis Acknowledging the prevalence of unreliable narrators this book explores the reliability and significance of different forms of climate narrative The author analyses overlapping themes and points of intersection considering the recurrent motif of the trickster the prominence of the child the significance and ongoing viability of the rights discourse and the increasingly prevalent emergency framing with its multiple implications for law s empire She asks how law fiction and activism measure up as textual and performative fora for telling the story of climate change and anticipating a climate changed future And in addition how can they help foster transformative narratives which empower us to confront the climate change crisis This highly topical cross disciplinary work will be of interest to anyone concerned about the growing climate emergency and makes a valuable contribution to climate law environmental law the environmental humanities and ecocriticism

Climate Activism in the 21st Century Dianne Rahm, 2023-08-28 The ravages of climate change emerged as a central issue in the 21st century In the U S the political divide over climate change and how to confront it expanded While Democrats became increasingly determined to join international efforts led by the United Nations to combat climate change Republicans largely balked The country embraced climate leadership when led by Obama and Biden but when led by Bush and Trump a rebuff ensued Those opposing climate action included the fossil fuel industries and others that sought to profit from the status quo Climate crisis activism of the 21st century is the story of the tension between those wishing to continue business as usual and those seeing their futures directly impacted by such choices and demanding climate justice This is a guide to understanding climate policy and activism highlighting the participants the progression of environmental science and the pendulum of national policy under changing parties in power

Climate Change and Mental Health Equity Rhonda J. Moore, 2024-07-18 Climate change is a driver of poverty poor mental health inequity and increased intersectional vulnerability with significant differential global impacts on individual and community health and well being For example

people living in low resource settings in high income countries HICs and in low and middle income countries LMICs are at greater risk often experiencing fragile socioeconomic political and health infrastructures and conflict affected settings FCAS that place them at greater risk and vulnerabilities to climate change related mental health impacts The broad goal of this book is to place a social justice and inclusive lens on climate change and mental health equity focusing on these three key elements people place and community The book includes perspectives from the global North the global South and Indigenous perspectives to help provide greater insight into how we can better understand climate change and mental health equity across peoples place and community This book s three pronged approach will focus on certain trends in this emerging and growing field also bridging some of the more extensive gaps and is a tool for better understanding how mental health disparities might be addressed at this time *Park Science* ,1994 *Adapting to Climate Change in Modern Policing* Anna Matczak,2025-09-01 This open access brief explores the profoundly accelerating impact of climate change on law enforcement globally Drawing on the concept of climatization it examines how on one hand rising temperatures extreme weather events resource scarcity and sustainability transitions pose new challenges for the evolving role of law enforcement in a changing climate On the other these developments also present opportunities to adapt and transform the ways the police do policing This book builds on the author s earlier research into the impact of climate change on police work It combines interdisciplinary research and 23 expert interviews to systematize current knowledge in the field The aim is to provide a comprehensive understanding of how climate change intersects with policing at societal organizational and individual levels This volume is ideal for policymakers practitioners and researchers working at the intersection of climate change and policing *In Defense of Science* Frank R. Spellman,Joan Price-Bayer,2018-08-31 In an era when many in the science community feel that science is under attack In Defense of Science explains why ordinary citizens need to have an understanding of science its methods and its groundbreaking discoveries The authors debunk several misconceptions of science and scientists and advocate that science is an integral part of society and everyday life This book begins with an introduction to science and its basic concepts including a brief and entertaining history of science and scientific discoveries before taking on current views of science in society It surveys the many sources of our ideas of science including pop culture classics of literature news media and political discourse Much of the information from these sources tends to mislead and the only way to guard against such misinformation is to become scientifically literate and promote scientific literacy in society The book therefore delves into the reasons that so many people do not understand basic scientific principles and do not keep up with scientific breakthroughs and finishes by examining the current state of science education It includes many resources for further reading and is presented in an engaging and entertaining way *Hearing on Scientific Objectives for Climate Change Legislation* United States. Congress. House. Committee on Ways and Means,2009 **Tectonic Dyssynchrony** Onaly A. Kapasi MD,2019-03-28 Tectonic Dyssynchrony as Karim describes is a loss of synchronous motion of the earth s

tectonic plates Professor Karim a doctorate in geophysics from a very prestigious American university has a special interest in earth s seismic activity He believes the tectonic dyssynchrony is responsible for an erratic gliding motion of the tectonic plates thereby causing disastrous earthquakes tsunamis sinkholes and a rare entity labeled as spontaneous human combustion or SHC for short The book describes an increase in frequency and intensity of earthquakes and tsunamis and also formation of sinkholes in our recent times the sinkhole in Yamal Peninsula of Siberia was 262 feet wide Many theories are advanced for the increase in earth s seismic activities which are felt on the earth s surface manifesting as massive tsunamis just as the one seen in Japan recently and a more recent massive extrusion of lava on the island of Hawaii Professor Karim believes that the erratic behavior of the tectonic plates is due to an excessive removal of very highly viscous crude oil from the earth s crust and its replacement with wash water He postulates that the crude oil trapped within the inner crust of the earth serves as greasing material that facilitates smooth gliding of the tectonic plates and conversely removal of the lubricant he believes is the cause for jerky tectonic gliding He believes that an incessant removal of the crude oil over the years has now reached a point where the minimum level of lubricant optimally required for a smooth gliding action is exhausted thereby causing dyssynchrony in the plate motion or simply putting an erratic and jerky motion of the tectonic plates Karim s research put him on crossroads with the Big Oil Big Oil was fighting on many fronts the state governments and also the federal government had filed lawsuits against the Big Oil Oklahoma town meetings and street protests were everyday frontline news and some universities researching the effects of greenhouse gases had contradicted many of the Big Oil sponsored researches Even some private foundations had sued the Big Oil Big Oil was afraid of a greater governmental oversight which may even prompt an injunction supporting a moratorium on future drilling all because of the irrefutable findings presented by Professor Karim s research In an attempt to thwart Professor Karim s research Big Oil offered Karim a very lucrative contract to join the research team of the Big Oil a contract that Karim decided to forego as the contract deprived him the intellectual property right to his own research The Big Oil attempted several illegal means to stop Karim but he persisted by luck or sheer perseverance They even staged a car accident that demolished his Mini to smithereens but Karim suffered only a few bruises Karim was forced to leave the world renowned and prestigious Massachusetts College of Technology in Boston and go into hiding in a third world country where he continued his research incognito and used an alias as his life was under a constant threat The story is a science based fiction that will take the reader on a journey along with Karim on his travel from Africa to California to Boston and onward to Madagascar sharing his research observations experiences and love for trivia The story will take the searching mind to a futuristic world of artificial intelligence assisted holographic presentation and a science of induced man made seismicity the discovery and use of the measure of gravitational waves and onward to a mystical world of beliefs and predictions The book will incite the reader to think out of the box and be more like Karim in their outlook a world citizen
