Sacred Richard Grigg, 2018-06-14 This book examines science fiction's relationship to religion and the sacred through the lens of significant books, films, and television shows. It provides a clear account of the larger cultural and philosophical significance of science fiction and explores its potential sacrality in today's secular world by analyzing material such as Ray Bradbury's classic novel *The Martian Chronicles*, films *The Abyss* and *2001 A Space Odyssey*, and also the *Star Trek* universe. Richard Grigg argues that science fiction is born of nostalgia for a truly Other reality that is no longer available to us and that the most accurate way to see the relationship between science fiction and traditional approaches to the sacred is as an imitation of true sacrality; this, he suggests, is the best option in a secular age. He demonstrates this by setting forth five definitions of the sacred and then, in consecutive chapters, investigating particular works of science fiction and showing just how they incarnate those definitions. *Science Fiction and the Imitation of the Sacred* also considers the qualifiers that suggest that science fiction can only imitate the sacred, not genuinely replicate it, and assesses the implications of this investigation for our understanding of secularity and science fiction.

The Monomyth in American Science Fiction Films Donald E. Palumbo, 2014-11-19 One of the great intellectual achievements of the 20th century, Joseph Campbell's *The Hero with a Thousand Faces* is an elaborate articulation of the monomyth, the narrative pattern underlying countless stories from the most ancient myths and legends to the films and television series of today. The monomyth's fundamental storyline, in Campbell's words, sees the hero venture forth from the world of the common day into a region of supernatural wonder; fabulous forces are there encountered and a decisive victory is won; the hero comes back from this mysterious adventure with the power to bestow boons to his fellow man. Campbell asserted that the hero is each of us; thus, the monomyth's endurance as a compelling plot structure. This study examines the monomyth in the context of Campbell's *The Hero* and discusses the use of this versatile narrative in 26 films and two

Library of Congress Subject Headings Library of Congress, 2013 Architecture and Science-Fiction Film David T. Fortin, 2016-12-05 The home is one of our most enduring human paradoxes and is brought to light tellingly in science fiction SF writing and film However while similarities and crossovers between architecture and SF have proliferated throughout the past century the home is often overshadowed by the spectacle of otherness The study of the familiar home within the alien SF creates a unique cultural lens through which to reflect on our current architectural condition SF has always been linked with alienation however the conditions of such alienation and hence notions of home have evidently changed There is often a perceived comprehension of the familiar that atrophies the inquisitive and interpretive processes commonly activated when confronting the unfamiliar Thus by utilizing the estranging qualities of SF to look at a concept inherently linked to its perceived opposite the home a unique critical analysis with particular relevance for contemporary architecture is made possible
