Teaching Children Science Joseph Abruscato, Donald A. DeRosa, 2010 What specific strategies and techniques will help foster discovery learning The new edition of Teaching Children Science Discovery Methods for the Elementary and Middle Grades provides the answers to that question This truncated volume is composed of the first nine chapters from Teaching Children Science A Discovery Approach Seventh Edition Like the larger text on which it is based it takes a constructivist approach to learning and it is written with the same engaging writing style This brief book of strategies and techniques will help pre service teachers learn to plan meaningful lessons and units and manage an inquiry based classroom The authors suggest productive ways to use the Internet and other technologies in the classroom to enhance learning Integrating science across the curriculum is also discussed as well as the NSE Standards Like the larger book it covers the strategies and techniques for teachers to incorporate cooperative learning questioning and active listening in their classrooms Readers of this book will become teachers who can create classrooms where children look forward to science time as a wonderful opportunity to learn

Teaching Children Science Joseph Abruscato, 2000 This revision of a very successful science methods text includes coverage of methods activities and science content Teaching Children Science presents current ideas about teaching children science in a motivating engaging style that will positively draw students towards the teaching of science to young children There are nine basic science teaching methods chapters and three potentially free standing parts that focus respectively on how to teach Earth Space Life and Physical Science content Each of these three parts has a lesson and unit plan followed by chapters that provide science content and chapters that contain activities and demonstrations for children Through its structure writing style and attention to contemporary issues this volume serves as an important resource in teaching students to create science experiences within the context of discovery learning thereby providing students with the necessary skills and knowledge to fully comprehend that they will be teaching

children science not the other way around For readers with an interest in science and perhaps drawing children to the teaching of science as a career choice **Teaching Science to Children** Mary D. Iatridis, Miriam Marecek, 1993 First Published in 1993 Routledge is an imprint of Taylor Francis an informa company *Teaching Children Science* Joseph Abruscato, Donald A. DeRosa, 2010 Science is a quest for explanations This popular text continues to encourage teachers to help their students learn through discovery while also providing content on the latest techniques in science teaching This edition has been thoroughly revised and features a new co author Dr Donald DeRosa of Boston University and a larger trim size and paperback binding for a fresher more open feel The book continues to use its well regarded pedagogy to help students to learn science They are A Look Ahead topics to be discussed in the chapter Make the Case A reflective exercise that can be done individually or as a group Summary A review of the main ideas in the chapter Going Further Learning activities for further study Resources for Discovery Learning A listing of websites books and articles for further reference This establishes a solid foundation in science pedagogy upon which they can build in later years The 5 E s of Learning and Universal Design for Learning have been added to this edition and every chapter correlates to the NSE Content Standards A new chapter on using technology in the classroom continues to build on the authors belief that technology can enhance learning in the science classroom The new package includes links to video and web resources on the MyEducationLab website New To This Edition NEW Features a new co author in this edition Dr Donald DeRosa of Boston University NEW A new paperback binding and larger 8 1 2 x 11 trim size gives the book a fresher and more open feel NEW Includes a new chapter Chapter 8 Using Technology to Enhance Science Learning NEW Gives an increased focus on technology multimedia engineering and energy conservation Includes a new Part IV on The Technological Sciences and more earth friendly and green science activities in this edition NEW Fully integrated package Each chapter correlates to video and web resources within the MyEducationLab website The MyLab series from Pearson offers innovative homework student assessment and multimedia instructional tools designed to enrich the learning experience and improve course outcomes With detailed gradebook and customization options instructors can easily monitor student progress and save valuable time NEW Includes The 5 E s Learning Cycle The 5 E s learning cycle is an instructional design model that presents a framework for constructivist learning theories that can be effectively used in teaching science Engage The task is introduced Using connections to past learning demonstrations of an event and asking pointed questions the teacher can spark the students interest right away Explore While the teacher facilitates students take part in hands on activities that allow them to work with materials Questioning sharing and communication with other learners should be encouraged during this stage Explain Here the focus is on analysis Students are encouraged to put observations questions hypotheses and experiences into language Communication between students and groups will aid student learning Again the teacher is the facilitator leading discussions asking questions giving definitions of helping students find the right words to describe their experiences

Elaborate Extend Now students should be encouraged build and expand upon what they have learned so far making deductions and inferences They can apply what they have learned to real world situations Evaluate Evaluation should be ongoing and should occur at all stages in order to determine that learning objectives have been met The teacher can use any assessment tool that they deem appropriate At this time the teacher should encourage further study that builds upon what has been learned NEW Universal Design for Learning will be incorporated in Chapter 9 Adapting the Science Curriculum Universal design is an approach to designing course instruction materials and content to benefit students of all learning styles Universal design provides equal access to learning not simply equal access to information This design model allows the student to control the method of accessing information while the teacher monitors the learning process and initiates any beneficial methods Although this design enables the student to be self sufficient the teacher is still responsible for imparting knowledge and facilitating the learning process The classroom becomes a positive learning experience for all students while minimizing the appearance that special accommodations are being made for any individual student NEW Reorganizes Parts II through IV to be more reader friendly The A and B subchapters of the previous edition will be broken out into content chapters and activities chapters NEW Teaches novice instructors how to differentiate among good and bad science kits and how to utilize them effectively in the classroom *Teaching Children Science* Joseph Abruscato,2004 Intended for both pre service and practicing teachers Teaching Children Science provides elementary science methods content and activities using Abruscato s discovery approach and presents contemporary ideas in a motivating engaging writing style that captivates future classroom teachers and enhances his her instruction in the science classroom This text is divided into three parts Earth Space Life and Physical Sciences Each of these three areas begins with a lesson and unit planning chapter followed by A Chapters presenting science content and B Chapters containing children s activities and demonstrations cross referenced to the NSE K 8 Science Standards *Start Young!* Shannan McNair,2006 You asked for it now you ve got it In a focus group at a recent NSTA convention teachers of prekindergarten through second grade clamored for help They do want easy to do science activities they can use for everyday teaching But they don t want to be forced to adapt material meant for older children So here s the solution Start Young offers a wealth of simple educational activities designed to use right away with even the littlest scientists The book includes a chapter of helpful background on the latest thinking about effective ways to introduce science in early childhood But the bulk of the book is two dozen articles compiled from Science Children NSTA s award winning journal for elementary school teachers **Teaching Children Science** Joseph Abruscato,2004-12 Intended for both pre service and practicing teachers Teaching Children Science provides elementary science methods content and activities using Abruscato s discovery approach and presents contemporary ideas in a motivating engaging writing style that captivates future classroom teachers and enhances his her instruction in the science classroom This text is divided into three parts Earth Space Life and Physical Sciences Each of these three areas begins with a lesson and unit planning chapter
