

NCERT Solution for Class 9 Science - Chapter 5 The Fundamental Unit Of Life

Lipids and proteins are synthesised in the ER [Endoplasmic Reticulum].

7. How does an Amoeba obtain its food?

Solution:

Through the process of endocytosis, an Amoeba obtains its food. As its cell membrane is flexible enough, food particles are engulfed forming a food vacuole girdling it which is assisted by the pseudopodia. Amoeba secretes digestive enzymes to bring about digestion of the engulfed particle once food is trapped.

8. What is osmosis?

Solution:

The process of movement of a water molecule from a region of higher concentration to a region of lower concentration through a semipermeable membrane is known as osmosis.

9. Carry out the following osmosis experiment:

Take four peeled potato halves and scoop each one out to make potato cups. One of these potato cups should be made from a boiled potato. Put each potato cup in a trough containing water. Now,

- (a) Keep cup A empty
- (b) Put one teaspoon sugar in cup B
- (c) Put one teaspoon salt in cup C
- (d) Put one teaspoon sugar in the boiled potato cup D.

Keep these for two hours. Then observe the four potato cups and answer the following:

- (i) Explain why water gathers in the hollowed portion of B and C.
- (ii) Why is potato A necessary for this experiment?
- (iii) Explain why water does not gather in the hollowed out portions of A and D.

Solution:

- (i) Water accumulates in the hollowed portions of B and C as a difference in the water concentration is observed. Thereby, endosmosis occurs as the cells act as a semipermeable membrane.
- (ii) Potato A is essential in this experiment as it is significant to compare different scenarios seen in potato cups B, C and D. The potato A in this experiment clearly shows that the potato cavity on its own cannot bring about water movement.
- (iii) Cup in A does not show any change in the water flow concentration for osmosis to occur, which requires the concentration to be higher than the other. Cells in cup D are dead, thus there is no

Putman Serviss, Arthur Selwyn-Brown, 2023-10-27 In *How to Use the Popular Science Library History of Science General Index* readers are presented with an anthology that elegantly bridges the expansive realms of scientific discovery and historical analysis. This collection stands out for its comprehensive coverage seamlessly weaving together narratives from seminal moments in the development of scientific thought with a discernible clarity and depth. The anthology distinguishes itself through a diverse array of literary styles from the analytical to the descriptive offering a holistic view of the progression of scientific knowledge and its profound impact on society over the centuries. The contributing authors Garrett Putman Serviss and Arthur Selwyn Brown each bring a unique perspective shaped by their own experiences and areas of expertise. Serviss known for his eloquent articulation of astronomical phenomena and Selwyn Brown with his robust exploration of engineering and technological advances together encapsulate the dynamic interplay between various scientific disciplines and their evolution. Their collective work within this anthology mirrors significant cultural and literary movements reflecting an era where science began to permeate the public consciousness more deeply than ever before. This anthology is an indispensable resource for anyone keen to delve into the rich tapestry of scientific development through the ages. It offers readers a unique opportunity to explore a multitude of perspectives styles and themes all within the single context of understanding the trajectory of scientific thought. Encouraging a deeper appreciation for the intricacies of scientific advancements and their documentation this collection is a must read for scholars students and enthusiasts eager to engage with the dialogue between science's past and its implications for the future.

Science and Apocalypse in Bertrand Russell, Javier Pérez-Jara, Lino Camprubí, 2022-08-01 Bertrand Russell 1872-1970 was a logician a philosopher and one of the twentieth century's most visible public intellectuals. *Science and Apocalypse in Bertrand Russell: A Cultural Sociology* brings those three aspects together to trace Russell's changing views on the role of science and technology in society throughout his long intellectual career. Drawing from cultural sociology history of science and philosophy Javier Pérez-Jara and Lino Camprubí provide a fresh multidimensional analysis of the general themes of science technology utopia and apocalypse. The book critically examines Russell's influential interpretations of the turn of the century mathematical logic World War I the metaphysics and epistemology of mind and matter World War II nuclear holocaust and the Vietnam War. In Russell's compelling narratives humanity was a powder keg and the match was represented by different and successive meta-adversaries such as religion communism and American imperialism. And the only way to avoid a coming global Holocaust was to follow his own salvific recipes. In working around Russell's role in the cultural perception of the final destiny of humanity *Science and Apocalypse in Bertrand Russell* invites the reader to think about the place of the techno-scientific sphere in human progress and decadence in both our current epoch and the distant future.

Science and religion is one of those subjects where everyone knows a lot of things that just ain t so This is because of the numerous urban legends about how the two fields have interacted historically and how they do so today These false beliefs are ubiquitous in Western civilization especially in academia prompting many people to oversimplify the issues This book corrects many of these urban legends and confusions involving premodern cosmology the alleged persecution or even martyrdom of scientists for discoveries that challenged the religious status quo the history and nature of biological evolution the potential discovery of rational extraterrestrial life and whether miracles would somehow conflict with the laws that science has discovered As one might expect reality turns out to be much more complex than the stories suggest **The**
