Medieval Science and Technology Elspeth Whitney, 2004-10-30 Medieval science and technology was firmly rooted in Aristotelian explanations of the physical world This book begins by introducing the basic concepts of the classical tradition and explains how these ideas were promulgated by the ancient Greeks preserved and commented on by the great Muslim scholars of the early middle ages and finally transmitted to western Europe as that region began to grow and expand around 1100 C E Specific avenues of inquiry such as astronomy and astrology optics chemistry and alchemy zoology geography and medicine are described on their own terms Rounding out the work is a discussion of the many technological innovations of the medieval age such as mechanical clocks firearms and the blast furnace that profoundly altered the course of European and world history Biographical sketches provide insight into the lives and accomplishments of 20 men and women Christian Muslim and pagan whose works profoundly shaped the era s scientific spirit Eleven annotated key primary documents afford a fascinating glimpse into how the best minds of the time posed their questions and their answers An annotated timeline glossary of terms several illustrations and an annotated bibliography round out the work Medieval scientists or natural philosophers as they were then called were powerfully influenced by the authority of older traditions including Christianity and scientific ideas dating back to Plato Aristotle and Ptolemy Yet their respect for these traditions was balanced by an equal respect for reason and the spirit of inquiry Religious faith far from dampening scientific and technological innovation actually buttressed their efforts to understand the natural world as it was generally taken for granted that knowledge acquired through reason would harmonize with religious beliefs While medieval science and technology did not seek to overthrow the prevailing worldviews of the time their accomplishments did lay the groundwork for the scientific revolution and European global expansion of the early modern age

A History of Science in World Cultures Scott L. Montgomery, Alok Kumar, 2015-06-12 To understand modern science it is essential to recognize that many of the most fundamental scientific principles are drawn from the knowledge of ancient civilizations Taking a global yet comprehensive approach to this complex topic A History of Science in World Cultures uses a broad range of case studies and examples to demonstrate that the scientific thought and method of the present day is deeply rooted in a pluricultural past Covering ancient Egypt Mesopotamia India Greece China Islam and the New World this volume discusses the scope of

scientific and technological achievements in each civilization and how the knowledge it developed came to impact the European Renaissance Themes covered include the influence these scientific cultures had upon one another the power of writing and its technologies visions of mathematical order in the universe and how it can be represented and what elements of the distant scientific past we continue to depend upon today Topics often left unexamined in histories of science are treated in fascinating detail such as the chemistry of mummification and the Great Library in Alexandria in Egypt jewellery and urban planning of the Indus Valley hydraulic engineering and the compass in China the sustainable agriculture and dental surgery of the Mayas and algebra and optics in Islam This book shows that scientific thought has never been confined to any one era culture or geographic region Clearly presented and highly illustrated **A History of Science in World Cultures** is the perfect text for all students and others interested in the development of science throughout history

The Zoomorphic Imagination in Chinese Art and Culture Jerome Silbergeld, Eugene Y. Wang, 2016-10-31 China has an age old zoomorphic tradition The First Emperor was famously said to have had the heart of a tiger and a wolf The names of foreign tribes were traditionally written with characters that included animal radicals In modern times the communist government frequently referred to Nationalists as running dogs and President Xi Jinping vowing to quell corruption at all levels pledged to capture both the tigers and the flies Splendidly illustrated with works ranging from Bronze Age vessels to twentieth century conceptual pieces this volume is a wide ranging look at zoomorphic and anthropomorphic imagery in Chinese art The contributors leading scholars in Chinese art history and related fields consider depictions of animals not as simple one for one symbolic equivalents they pursue in depth in complexity and in multiple dimensions the ways that Chinese have used animals from earliest times to the present day to represent and rhetorically stage complex ideas about the world around them examining what this means about China past and present In each chapter a specific example or theme based on real or mythic creatures is derived from religious political or other sources providing the detailed and learned examination needed to understand the means by which such imagery was embedded in Chinese cultural life Bronze Age taotie motifs calendrical animals zoomorphic modes in Tantric Buddhist art Song dragons and their painters animal rebuses Heaven sent auspicious horses and foreign sent tribute giraffes the fantastic specimens depicted in the Qing Manual of Sea Oddities the weirdly indeterminate creatures found in the contemporary art of Huang Yong Ping these and other notable examples reveal Chinese attitudes over time toward the animal realm explore Chinese psychology and patterns of imagination and explain some of the critical means and motives of Chinese visual culture **The Zoomorphic Imagination in Chinese Art and Culture** will find a ready audience among East Asian art and visual culture specialists and those with an interest in literary or visual rhetoric Contributors Sarah Allan Qianshen Bai Susan Bush Daniel Greenberg Carmelita Carma Hinton Judy Chungwa Ho Kristina Kleutghen Kathlyn Liscomb Jennifer Purtle Jerome Silbergeld Henrik S rensen and Eugene Y Wang

The Enigma of the Origin of Portolan Charts Roel Nicolai, 2016-05-30 The sudden appearance of portolan charts realistic nautical charts of

the Mediterranean and Black Sea at the end of the thirteenth century is one of the most significant occurrences in the history of cartography Using geodetic and statistical analysis techniques these charts are shown to be mosaics of partial charts that are considerably more accurate than has been assumed Their accuracy exceeds medieval mapping capabilities These sub charts show a remarkably good agreement with the Mercator map projection It is demonstrated that this map projection can only have been an intentional feature of the charts construction Through geodetic analysis the author eliminates the possibility that the charts are original products of a medieval Mediterranean nautical culture which until now they have been widely believed to be

Imam, 2010-08-01 This paper investigates the determinants of the pattern of Islamic bank diffusion around the world using country level data for 1992 2006 The analysis illustrates that income per capita share of Muslims in the population and status as an oil producer are linked to the development of Islamic banking as are economic integration with Middle Eastern countries and proximity to Islamic financial centers Interest rates have a negative impact on Islamic banking reflecting the implicit benchmark for Islamic banks The quality of institutions does not matter probably because the often higher hurdle set by Shariah law trumps the quality of local institutions in most countries The 9 11 attacks were not important to the diffusion of Islamic banking but

they coincided with rising oil prices which are a significant factor in the diffusion of Islamic banking Islamic banks also appear to be complements to rather than substitutes for conventional banks *Islamic Art and Geometric Design* Metropolitan Museum of Art (New York, N.Y.),Metropolitan Museum of Art (New York, N.Y.).
