## Science In Public:

*Science in Public* Jane Gregory, Steve Miller, 2010 Does the general public need to understand science And if so is it scientists responsibility to communicate Critics have argued that despite the huge strides made in technology we live in a scientifically illiterate society one that thinks about the world and makes important decisions without taking scientific knowledge into account But is the solution to this illiteracy to deluge the layman with scientific information Or does science news need to be focused around specific issues and organized into stories that are meaningful and relevant to people s lives In this unprecedented comprehensive look at a new field Jane Gregory and Steve Miller point the way to a more effective public understanding of science in the years ahead *Science in Public* Jane Gregory, Steve Miller, 1998-03-21 Views the history of communicating scientific advances and ideas the role of the media science in public culture popular science and the appeal of unorthodox science **Science in Public Affairs** James Edward Hand, 1906 **Science and Public Policy** United States. **Communicating Science to the Public** David Evered, Maeve O'Connor, 1987-08-10 We live in a rapidly changing world in which science and technology influence the quality of our lives for better or worse An understanding of science is therefore important for all of us yet the general level of scientific literacy is low **See-through Science** James Wilsdon, Rebecca Willis, 2004 [Handbook for Science Public Information Officers](#) W. Matthew Shipman, 2015-08-15 In today s changing media landscape institutions such as universities state and federal agencies laboratories nonprofit organizations and research societies increasingly employ science public information officers to get the word out about the scientific research they are conducting or sponsoring These PIOs now outnumber traditional science journalists and are increasingly responsible for communicating science to wider audiences In this book reporter turned PIO W Matthew Shipman offers guidance to both new and experienced PIOs about how to make good decisions and serve as effective liaisons between their institutions and the public Throughout he focuses on applying general principles of effective communication to the specific challenges of explaining complex science to nonexpert audiences coaching scientists to interact with the media and navigating the particular types of communications crises that arise out of scientific research **Science, Public Health and the State in Modern Asia** Liping Bu, Darwin H. Stapleton, Ka-Che Yip, 2012-03-12 This book examines the encounter between western and Asian models of public health and medicine in a range of East and Southeast Asian countries over the course of the twentieth century until now It discusses the transfer of scientific knowledge of medicine and public health approaches from Europe and the United States to several Asian countries Singapore Hong Kong Indonesia Sri Lanka Japan Taiwan and China and local interactions with and transformations of these public health models and approaches from the

nineteenth century to the 1950s Taking a critical look at assumptions about the objectiveness of science the book highlights the use of scientific knowledge for political control cultural manipulation social transformation and economic needs It rigorously and systematically investigates the historical developments of public health concepts policies institutions and how these practices changed from colonial to post colonial and into the present day Science, Public Health and Nation-Building in Soekarno-Era Indonesia Vivek Neelakantan,2017-06-23 In 1949 the newly independent Indonesia inherited a health system that was devastated by three and a half years of Japanese occupation and four years of revolutionary struggle against the Dutch Additionally the country had to cope with the resurgence of epidemic and endemic diseases The Ministry of Health had initiated a number of symbolic public health initiatives both during the Indonesian Revolution 1945 to 1949 and the early 1950s resulting in a noticeable decline of mortality These initiatives fuelled the newly independent nation s confidence because they demonstrated to the international community that Indonesia was capable of standing on its own feet Unfortunately by the mid 1950s Indonesia s public health program faltered due to a constellation of factors attributed to the political tensions between Java and the Outer Islands administrative problems corruption and rampant inflation The optimism that characterised the early years of independence gave way to despair The Soekarno era could therefore be interpreted as the era of bold plans but unfulfilled aspirations in Indonesian public health Based on extensive archival research and a close reading of Indonesian primary sources this book provides a nuanced account of the inner tensions in Indonesian public health during the twentieth century between a narrow biomedical approach that emphasised disease eradication and a holistic approach that linked public health to practical concerns of nation building
