Allen Kent, James G. Williams

Science In The Looking Glass:

Science in the Looking Glass E. Brian Davies, 2007-06-28 How do scientific conjectures become laws Why does proof mean different things in different sciences Do numbers exist or were they invented Why do some laws turn out to be wrong In this wide ranging book Brian Davies discusses the basis for scientists claims to knowledge about the world He looks at science historically emphasizing not only the achievements of scientists from Galileo onwards but also their mistakes He rejects the claim that all scientific knowledge is provisional by citing examples from chemistry biology and geology A major feature of the book is its defence of the view that mathematics was invented rather than discovered While experience has shown that disentangling knowledge from opinion and aspiration is a hard task this book provides a clear guide to the difficulties Full of illuminating examples and quotations and with a scope ranging from psychology and evolution to quantum theory and mathematics this book brings alive issues at the heart of all science
