Science Incarnate Historical Embodiments Of Natural Knowledge:

Science Incarnate Christopher Lawrence, Steven Shapin, 1998-04-11 Does truth have anything to do with the belly What difference does it make to the pursuit of knowledge whether Einstein rode a bicycle Russell was randy or Darwin was flatulent Focusing on the 17th century to the present SCIENCE INCARNATE explores how intellectuals sought to establish the value and authority of their ideas through public displays of their private ways of life 54 photos *Femininity, Mathematics and Science, 1880-1914* C. Jones, 2009-10-15 Through the prism of gender this text explores the contrasting cultures and practice of mathematics and science and asks how they impacted on women Claire Jones assesses nineteenth century ideas about women s intellect femininity and masculinity and assesses how these attitudes shaped women s experiences as students and practitioners

Evidence in the Age of the New Sciences James A.T. Lancaster, Richard Raiswell, 2018-10-24 The motto of the Royal Society Nullius in verba was intended to highlight the members rejection of received knowledge and the new place they afforded direct empirical evidence in their quest for genuine useful knowledge about the world But while many studies have raised questions about the construction reception and authentication of knowledge Evidence in the Age of the New Sciences is the first to examine the problem of evidence at this pivotal moment in European intellectual history What constituted evidence and for whom Where might it be found How should it be collected and organized What is the relationship between evidence and proof These are crucial questions for what constitutes evidence determines how people interrogate the world and the kind of arguments they make about it In this important new collection Lancaster and Raiswell have assembled twelve studies that capture aspects of the debate over evidence in a variety of intellectual contexts From law and theology to geography medicine and experimental philosophy the chapters highlight the great diversity of approaches to evidence gathering that existed side by side in the sixteenth and seventeenth centuries In this way the volume makes an important addition to the literature on early science and knowledge formation and will be of particular interest to scholars and advanced students in these fields

Mechanism, Life and Mind in Modern Natural Philosophy Charles T. Wolfe, Paolo Pecere, Antonio Clericuzio, 2022-11-14 This volume emphasizes the diversity and fruitfulness of early modern mechanism as a program as a concept as a model Mechanistic study of the living body but also of the mind and mental processes are examined in careful historical focus dealing with figures ranging from the

first rank Bacon Descartes Spinoza Cudworth Gassendi Locke Leibniz Kant to less well known individuals Scaliger Martini or prominent natural philosophers who have been neglected in recent years Willis Steno etc The volume moves from early modern medicine and physiology to late Enlightenment and even early 19th century psychology always maintaining a conceptual focus It is a contribution to a newly active field in the history and philosophy of early modern life science It is of interest to scholars studying the history of medicine and the development of mechanistic theories *William James, MD* Emma K. Sutton, 2023-12-06 William James is known as a nineteenth century philosopher psychologist and psychical researcher Less well known are the medical fixations that united his multiple identities and drove his ambition to change the way American society conceived of itself in body mind and soul William James M D offers an account of the development and cultural significance of James s ideas and works and establishes for the first time the relevance of medical themes to his major lines of thought James lived at a time when old assumptions about faith and the moral and religious possibilities for human worth and redemption were increasingly displaced by a concern with the medically normal and the perfectibility of the body Woven into treatises warning of the degeneration of humanity these ideas comprised the origins of the eugenics movement and were manifest in a growing social stigma attached to illness and invalidism a disturbing intellectual current in which James felt personally implicated Most chronicles of James s life have portrayed a distressed young man a psychological or spiritual crisis followed by the emergence of a mature thinker who threw off his pallor of mental sickness for good In contrast Emma Sutton draws on his personal correspondence unpublished notebooks and diaries to show that James considered himself a genuine invalid to the end of his days Sutton makes the compelling case that his philosophizing was not an abstract occupation but an impassioned response to his own life experiences and challenges To ignore the medical James is to misread James altogether Sales points First book to map William James s preoccupation with medical ideas concerns and values across the disciplinary breadth of his work Reveals how themes of invalidism health and healing underpinned the genesis of many of James s major philosophical psychological and political ideas Draws on the approximately 9 400 items of Jamesian correspondence together with his private notes and reading lists [The SAGE Handbook of Historical Theory](#) Nancy Partner, Sarah Foot, 2012-12-18 The SAGE Handbook of Historical Theory introduces the foundations of modern historical theory and the applications of theory to a full range of sub fields of historical research bringing the reader as up to date as possible with continuing debates and current developments The book is divided into three key parts covering Part I Foundations The Theoretical Grounds for Knowledge of the Past Part II Applications Theory Intensive Areas in History Part III Coda Post Postmodernism Directions and Interrogations This important handbook brings together in one volume discussions of modernity empiricism deconstruction narrative and postmodernity in the continuing evolution of the historical discipline into our post postmodern era Chapters are written by leading academics from around the world and cover a wide array of specialized areas of the discipline including social history intellectual history gender memory psychoanalysis and

cultural history The influence of major thinkers such as Jacques Derrida Michel Foucault and Hayden White is fully examined This handbook is an essential resource for practising historians and students of history and will appeal to scholars in related disciplines in the social sciences and humanities who seek a closer understanding of the theoretical foundations of history

Wild Experiment Donovan O. Schaefer,2022-04-04 In Wild Experiment Donovan O Schaefer challenges the conventional wisdom that feeling and thinking are separate Drawing on science studies philosophy affect theory secularism studies psychology and contemporary literary criticism Schaefer reconceptualizes rationality as defined by affective processes at every level He introduces the model of cogency theory to reconsider the relationship between evolutionary biology and secularism examining mid nineteenth century Darwinian controversies the 1925 Scopes Trial and the New Atheist movement of the 2000s Along the way Schaefer reappraises a range of related issues from secular architecture at Oxford to American eugenics to contemporary climate denialism These case studies locate the intersection of thinking and feeling in the way scientific rationality balances excited discovery with anxious scrutiny in the fascination of conspiracy theories and in how racist feelings assume the mantle of rational objectivity The fact that cognition is felt Schaefer demonstrates is both why science succeeds and why it fails He concludes that science secularism atheism and reason itself are not separate from feeling but comprehensively defined by it

Performing Knowledge, 1750-1850 Mary Helen Dupree,Sean B. Franzel,2015-07-31 The period between 1750 and 1850 was a time when knowledge and its modes of transmission were reconsidered and reworked in fundamental ways Social and political transformations such as the French Revolution and the Industrial Revolution went hand in hand with in new ways of viewing sensing and experiencing what was perceived to be a rapidly changing world This volume brings together a range of essays that explore the performance of knowledge in the period from 1750 to 1850 in the broadest possible sense The essays explore a wide variety of literary theatrical and scientific events staged during this period including scientific demonstrations philosophical lectures theatrical performances stage design botany primers musical publications staged Schiller memorials acoustic performances and literary declamations These events served as vital conduits for the larger process of generating differentiating and circulating knowledge By unpacking the significance of performance and performativity for the creation and circulation of knowledge in Germany during this period the volume makes an important contribution to interdisciplinary German cultural studies performance studies and the history of knowledge

Early Modern Medicine and Natural Philosophy Peter Distelzweig,Benjamin Goldberg,Evan R. Ragland,2015-12-11 This volume presents an innovative look at early modern medicine and natural philosophy as historically interrelated developments The individual chapters chart this interrelation in a variety of contexts from the Humanists who drew on Hippocrates Galen and Aristotle to answer philosophical and medical questions to medical debates on the limits and power of mechanism and on to eighteenth century controversies over medical materialism and atheism The work presented here broadens our understanding of both philosophy and medicine in this period by illustrating

the ways these disciplines were in deep theoretical and methodological dialogue and by demonstrating the importance of this dialogue for understanding their history Taken together these papers argue that to overlook the medical context of natural philosophy and the philosophical context of medicine is to overlook fundamentally important aspects of these intellectual endeavors

Curiosity and Wonder from the Renaissance to the Enlightenment R.J.W. Evans, 2017-03-02 Curiosity and wonder are topics of increasing interest and importance to Renaissance and Enlightenment historians Conspicuous in a host of disciplines from history of science and technology to history of art literature and society both have assumed a prominent place in studies of the Early Modern period This volume brings together an international group of scholars to investigate the various manifestations of and relationships between curiosity and wonder from the 16th to the 18th centuries Focused case studies on texts objects and individuals explore the multifaceted natures of these themes highlighting the intense fascination and continuing scrutiny to which each has been subjected over three centuries From instances of curiosity in New World exploration to the natural wonders of 18th century Italy *Curiosity and Wonder from the Renaissance to the Enlightenment* locates its subjects in a broad geographical and disciplinary terrain Taken together the essays presented here construct a detailed picture of two complex themes demonstrating the extent to which both have been transformed and reconstituted often with dramatic results

Laboratory Epistemologies Jenny Boulboulle, 2024-10-11 In *Laboratory Epistemologies* A Hands On Perspective Jenny Boulboulle examines the significance of hands on experiences in contemporary life sciences laboratories Addressing the relationship between contemplation and manipulation in epistemology Boulboulle combines participant observations in molecular genetics labs and microbiological cleanrooms with a longue dur e study of the history and philosophy of science She radically rereads Descartes s key epistemological text *Meditations on First Philosophy* reframing the philosopher as a hands on knowledge maker With this reading Boulboulle subverts the pervasive modern conception of the disembodied knower and puts the hands on experimenter at the heart of life sciences research In so doing she contributes a theoretical model for understanding how life processes on cellular and molecular levels are manually produced in today s techno scientific spaces By reassessing the Cartesian legacy and arguing that epistemology should be grounded in the standpoint of a hands on practitioner Boulboulle offers the philosophical and historical foundation to understand and study contemporary life sciences research as multisensory embodied practices

An Anthropology of Biomedicine Margaret M. Lock, Vinh-Kim Nguyen, 2018-01-09 In this fully revised and updated second edition of *An Anthropology of Biomedicine* authors Lock and Nguyen introduce biomedicine from an anthropological perspective exploring the entanglement of material bodies with history environment culture and politics Drawing on historical and ethnographic work the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes and develops and integrates the theory that the

human body in health and illness is not an ontological given but a moveable malleable entity This second edition includes new chapters on microbiology and the microbiome global health and the self as a socio technical system In addition all chapters have been comprehensively revised to take account of developments from within this fast paced field in the intervening years between publications References and figures have also been updated throughout This highly regarded and award winning textbook Winner of the 2010 Prose Award for Archaeology and Anthropology retains the character and features of the previous edition Its coverage remains broad including discussion of biomedical technologies in practice anthropologies of medicine biology and human experiments infertility and assisted reproduction genomics epigenomics and uncertain futures and molecularizing racial difference ensuring it remains the essential text for students of anthropology medical anthropology as well as public and global health

James Watt, Chemist David Philip Miller, 2015-07-22 Miller examines Watt s illustrious engineering career in light of his parallel interest in chemistry arguing that Watt s conception of steam engineering relied upon chemical understandings

Kuhn's Structure of Scientific Revolutions - 50 Years On William J. Devlin, Alisa Bokulich, 2015-05-18 In 1962 the publication of Thomas Kuhn s Structure revolutionized the way one conducts philosophical and historical studies of science Through the introduction of both memorable and controversial notions such as paradigms scientific revolutions and incommensurability Kuhn argued against the traditionally accepted notion of scientific change as a progression towards the truth about nature and instead substituted the idea that science is a puzzle solving activity operating under paradigms which become discarded after it fails to respond accordingly to anomalous challenges and a rival paradigm Kuhn s Structure has sold over 1.4 million copies and the Times Literary Supplement named it one of the Hundred Most Influential Books since the Second World War Now fifty years after this groundbreaking work was published this volume offers a timely reappraisal of the legacy of Kuhn s book and an investigation into what Structure offers philosophical historical and sociological studies of science in the future

Photography, Natural History and the Nineteenth-Century

Museum Kathleen Davidson, 2017-12-02 The Victorian era heralded an age of transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies Concurrently different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of empire This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies Australia New Zealand and to a lesser extent India Coinciding with the rise of the modern museum photography's arrival was timely and it rapidly became an essential technology for recording and publicising rare objects and valuable collections Also during this period the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time *Ibss: Sociology: 1998* Compiled by the British Library of Political and Social Science, 1999-12-16 Renowned for its international coverage and rigorous selection procedures this series provides the most comprehensive and scholarly bibliographic service available in the social sciences Arranged by topic and indexed by author subject and place name each bibliography lists and annotates the most important works published in its field during the year of 1997 including hard to locate journal articles Each volume also includes a complete list of the periodicals consulted
