Midland Main Lines to St Pancras and Cross Country John Palmer,2017-02-28 The history of British Railways in the late 1950s early 1960s is characterized by change massive change as its management attempted to meet statutory obligations against a background of social economic and political influences The Modernisation Plan of 1955 paved the way for the electrification of the route from Manchester to London Euston with a consequential effect of the Midland route services via Derby needing to be enhanced and improved That eventually resulted in the arrival of class 7 steam motive power and later also benefitted the cross country Midland route This book details year by year the changes that took place and provides an insight into the reasons why decisions were taken and how the railway management was faced with a vast range of technological natural socioeconomic challenges to be overcome whilst also trying to meet the day to day needs of the operational railway In addition to tracing the history of the routes the book includes performance logs of typical journeys along difficult sections recollections of railway men working in various departments and for enthusiasts a list of rare and unusual locomotive workings The book is profusely illustrated with black and white as well as color photographs and also includes a comprehensive range of maps

How Invention Begins John H. Lienhard,2006-07-14 In *How Invention Begins* Lienhard

reconciles the ends of invention with the individual leaps upon which they are built illuminating the vast web of individual inspirations that lie behind whole technologies He traces for instance the way in which thousands of people applied their combined inventive genius to airplanes railroad engines and automobiles As he does so it becomes clear that a collective desire an upwelling of fascination a spirit of the times a Zeitgeist laid its hold upon inventors The thing they all sought to create was speed itself Likewise Lienhard shows that when we trace the astonishingly complex technology of printing books we come at last to that which we desire from books the knowledge the learning that they provide Can we speak of speed or education as inventions To do so he concludes is certainly no greater a stretch than it is to call radio or the telephone an invention Throughout this marvelous volume Lienhard illuminates these webs of insight or inspiration by weaving a fabric of anecdote history and technical detail all of which come together to provide a full and satisfying portrait of the true nature of invention
