Science, Technology, and the Modern Navy. 30th Anniversary 1946-76 United States. Department of the Navy. Office of Naval Research,1976 **Science, Technology, and the Modern Navy** United States. Office of Naval Research,1976 **Geography Programs** ,1979 **Monthly Catalog of United States Government Publications** United States. Superintendent of Documents,1978 **Spectacular Flops** Michael Brian Schiffer,2018-12-31 Many technologies begin life as someone s vision of an ambitious perhaps audacious technology that is expected to have a revolutionary impact on consumers whether families companies or societies However if this highly touted technology fails prematurely at some point in its life history it becomes a spectacular flop Employing a behavioral perspective this book presents a sample of twelve spectacular flops encompassing the past three centuries ranging from the world s first automobile to the nuclear powered bomber Because technologies may fail from many different causes spectacular flops pose a special challenge to the author s long term project of furnishing generalizations about technological change Instead of constructing generalizations that apply to all spectacular flops this book provides limited generalizations that pertain to particular groups of technologies bounded by parameters such as long term development projects and one off projects The reader need have no prior familiarity with the technologies because basic principles are introduced as needed **Power Struggles** Michael B. Schiffer,2008 Laying the foundation for Thomas Edison the first electric generators were built in the 1830s the earliest commercial lighting systems before 1860 and the first commercial application of generator powered light in the early 1860s This book examines some of these early applications of electricity *Monthly Catalogue, United States Public Documents* ,1978-07 Congressional Record United States. Congress,2002 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 Defense Industry Bulletin ,1966 **Astronautics and Aeronautics, 1967 - Chronology on Science, Technology, and Policy** ,1968 **China's Political-Military Evolution** Monte R. Bullard,2019-03-08 In recent years the People s Liberation Army PLA has relinquished much of its political power to China s civilian leadership and has turned to the task of professionalizing the military The transition of the PLA into a relatively apolitical force in Chinese society has occurred alongside great progress toward military modernization with the foundation now laid for the PLA to become one of the world s most powerful military forces Dr Bullard traces the PLA s extremely important and almost revolutionary transition examines the structural changes associated with it and assesses current military policies and trends He discusses in detail the political commissar system the key institution for all political military relationships in the Chinese military system *Daily Report, China* ,1993 *Guide to Current Official Statistics* Great

Britain. Permanent Consultative Committee on Official Statistics,1928 **Air University Library Index to Military Periodicals** ,1994 *Current Technical Service Contracts and Grants* United States. Agency for International Development. Procurement Support Division,1987 *Proceedings, American Philosophical Society (vol. 134, No. 4, 1990)* American Philosophical Society (Philadelphia)., Government Reports Announcements & Index ,1980 *Chinese Naval Shipbuilding* Andrew S. Erickson,2017-02-15 China's shipbuilding industry has grown more rapidly than any other in modern history Commercial shipbuilding output jumped thirteen fold from 2002-12 ensuring that Beijing has largely reached its goal of becoming the world's leading shipbuilder Yet progress is uneven with military shipbuilding leading overall but with significant weakness in propulsion and electronics for military and civilian applications It has never been more important to assess what ships China can supply its navy and other maritime forces with today and in the future Chinese Naval Shipbuilding answers three pressing questions What are China's prospects for success in key areas of naval shipbuilding What are the likely results for China's navy What are the implications for the U.S. Navy To address these critical issues this volume assembles some of the world's leading experts and linguistic analysts often pairing them in research teams These sailors scholars industry professionals and government specialists have commanded ships at sea led shipbuilding programs ashore toured Chinese vessels and production facilities invested in Chinese shipyards and analyzed and presented important data to top level decision makers in times of crisis In synthesizing their collective insights this book fills a key gap in our understanding of China its shipbuilding industry its navy and what it all means *Publications of the National Bureau of Standards ... Catalog* United States. National Bureau of Standards,1978 China's Future Nuclear Submarine Force Lyle J Goldstein,Andrew S. Erickson,William S. Murray,Andrew Wilson,2012-04-30 One of the key concerns of naval strategists and planners today is the nature of the Chinese geostrategic challenge Conceding that no one can know for certain China's intentions in terms of future conflict the editors of this hot topic book argue that the trajectory of Chinese nuclear propulsion for submarines may be one of the best single indicators of China's ambitions of global military power Nuclear submarines with their unparalleled survivability remain ideal platforms for persistent operations in far flung sea areas and offer an efficient means for China to project power This collection of essays presents the latest thinking of leading experts on the emergence of a modern nuclear submarine fleet in China Each contribution is packed with authoritative data and cogent analysis The book has been compiled by four professors and analysts at the U.S. Naval War College who are co-founders of the college's recently established China Maritime Studies Institute Given the opaque nature of China's undersea warfare development readers will benefit from this penetrating investigation that considers the potential impact of even the most revolutionary changes in Chinese nuclear submarine capabilities The editors believe that to ignore such possibilities would be the height of strategic folly and represent inexcusable negligence in terms of U.S. national defense Anyone who is interested in the future of the U.S. Navy and the defense of the United States will find this book to be essential reading
