The Axial Age and Its Consequences Robert N. Bellah, Hans Joas, 2012-10-31 This book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium bce From Axial Age thinkers we inherited a sense of the world as a place not just to experience but to investigate envision and alter A variety of utopian visions emerged and led to both reform and repression

Religion and Spirituality Martin Dowson, Stuart Devenish, 2010-06-01 Religion and spirituality make critical contributions to an inclusive vision for the welfare of minorities the marginalized and other disadvantaged groups in societies and cultures around the globe Religious movements and spiritual traditions work to improve social outcomes for disenfranchised groups by enriching educational political and social agendas and by providing a wide variety of justice driven programs and services Values underpinning these services include the dignity of the human person the sanctity of human life the foundational role of families and communities the transformative power of learning and the advancement of shared personal and social rights and responsibilities These values act as a counter balance to other attitudes and values that may impede pro social cohesion and development Drawing on diverse religious and spiritual perspectives and traditions this new volume provides exciting and enriching examples of theory research and practice that directly contribute to our understanding of how religion and spirituality promote and facilitate social justice and equity in diverse social and cultural contexts with a particular focus on educational settings contexts processes and outcomes Religious communities invest heavily in schools colleges and universities in the belief that these educational institutions

enable them to inculcate into their membership the kinds of moral values and qualities that lie at the heart of their spiritual teachings Looking beyond the sacred secular impasse religious organisations attempt to provide a education for life which draws from both the scientia of science and the sapientia of religion and spirituality These depth dimensions provide the pool of values which enable citizens to enact equity mercy and justice in society in the name of God and for the sake of humanity The chapters which comprise this volume demonstrate the possibility of a healthy integration between religion and education from a truly global transdisciplinary and ecumenical perspective From contexts within Asia Africa the USA and Australia and from disciplines ranging from ethics to social work from health to educational curriculum from personal identity to community consciousness this volume makes a unique contribution to the theory and practice of the educational and religious inter face It is a contribution which holds a great deal of promise for being pro humanitas

comprehensive parts Astrophilosophy, Exotheology, and Cosmic Religion Andrew M. Davis, Roland Faber, 2024-01-22
 Astrophilosophy Exotheology and Cosmic Religion Extraterrestrial Life in a Process Universe applies Alfred North Whitehead's process philosophy and the associated process philosophies of Henri Bergson Teilhard de Chardin and others to the interdisciplinary layers of astrobiology extraterrestrial life and the impact of discovery This collection edited by Andrew M Davis and Roland Faber asks questions such as How have process thinkers imagined universal creative evolution and its implications for philosophies theologies and religions beyond earth and How might their claims as to the primacy of organism temporality novelty value and mind enrich current discussions and debates across disciplines As experts in their fields the contributors are informed by but not limited to process conceptualities The chapters not only advance recent discussions in astrobiology cosmology and evolution but also consider a constellation of philosophical topics from shared extraterrestrial knowledge and values to the possibilities or limitations afforded by AI technology the Fermi Paradox the Drake Equation and the increasing need to nurture the cosmic dimensions of theological and religious traditions **Neuroscience and Religion** Volney P. Gay, 2009-08-16 For religious persons the notion of human being is tied inextricably to the notion of God or the gods and turns on this question what is human being How did we with our almost infinite capacities for thought change and domination come to be Imbued with powers far beyond any other animal humans are too faulty to be considered gods themselves Yet the idea of God or the gods appears in all distinctive human cultures it names the other pole of human it designates a being who realizes perfectly our imperfectly realized nature With the rise of new sciences come ancient anxieties about how we should define human being In the nineteenth century electricity and magnetism fascinated experts and captivated the lay public In the twenty first century advances in neuroscience open up vast new possibilities of mimicking and perhaps emulating human being In this book twelve scholars and scientists ask what if anything distinguishes Brain from Mind and Mind from Self and Soul *The Evolution of Theology in the Greek Philosophers - Vol I* Edward Caird, 2013-01-03 A fascinating insight into the role religious thought played in the lives of the great Greek philosophers Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive Hesperides Press are republishing these classic works in affordable high quality modern editions using the original text and artwork **Annual Convention - Central Conference of American Rabbis** Central Conference of American Rabbis, 1918 Applied Mysticism Richard H. Jones, 2025-03-01 Examines how mystical practices and experiences are being applied in secular contexts today Today is an exciting time for mysticism Interest in mysticism today often involves what Aldous Huxley called applied mysticism that is taking mystical practices and experiences out of their traditional contexts where the focus was on the total transformation of the individual and applying them often within a secular framework to help other people with more limited worldly problems such as a person's well being in society or general social change Neuroscientists are taking mystical experiences seriously studying meditators and psychedelic subjects to gain knowledge of

how the brain works Cognitive scientists are exploring mystical altered states of consciousness to expand the spectrum of consciousness states in particular whether there is a state of pure consciousness Buddhist meditation is being taken out of its religious contexts and adapted by psychotherapists to help with problems such as depression or addiction The use of psychedelics in psychotherapy is also gaining traction while New Age thinkers are extolling the alleged merger of post Newtonian science with mysticism Mystical ideas are being adapted to problems on the social level for example in socially engaged Buddhism This is the first book to explore all these varieties of applied mysticism together and to examine the current state of the field with a focus on philosophical issues in a readily accessible manner **Choice**, 1998 Technology and Theology William H. U. Anderson, 2021-01-05 Technology is growing at an exponential rate vis vis humanity's ability to control it Moreover the numerous ethical issues that technology raises are also troubling These statements however may be alarmist since Telus would tell us The Future is Friendly The Modernist vision of the future was utopic for instance Star Trek of the 1960s But postmodern views such as are found in Blade Runner 2049 are dystopic Theology is in a unique interdisciplinary position to deal with the many issues pro and con that technology raises Even theologians like Origen in the third century and Aquinas in the thirteenth century made forays into Artificial Intelligence and surrounding issues they just didn't know it at the time Artificial Intelligence AI and Transhumanism raise questions about what it means to be human What is consciousness What is soul What are life and death Can technology really save us and give us eternal life Theology is in a unique position to handle these questions and issues This book also has practical applications in terms of ecclesiology church in the context of the COVID 19 pandemic both in terms of what it means to be a church and in terms of the sacraments or ordinances Is there such a thing as a Virtual Church or must we gather physically to constitute one Are Baptism and Communion legitimate if one is not physically in a church building but are online This book struggles with these and many other questions which will help the scholar or reader make up their own minds however tentatively

PERSPECTIVES OF SCIENCE, SPIRITUALITY AND RELIGION Ratikanta Maiti, Ch. Aruna Kumari, Debashis Mandal, 2017-08-14 Perspectives of Science Spirituality and Religion discusses about the interrelations between science spirituality and meditation It makes a critical synthesis of leaders in science spirituality and religion It is divided into long and short review of articles of books authors own experience on meditation mystery of plant science and other aspects It enumerates how each field of science though appears different they strive in one way or the other to benefit the humanity Each field by itself though independent is accountable for the upliftment of the mankind Scientists through research unveil the mystery of nature Science says that every organism is made up a mass of atoms and each of which possesses some energy Spirituality leads to the realization that universal energy is also present in each individual and organism in the universe and it is responsible for the movement of these organisms It speaks about the presence of the divine creature in the universe responsible for the built up of the universe and all the creatures in this universe Mediation discusses about how to

harness this universal energy in changing our thoughts and attainment of stable and balanced mind It assists in the realization of the inner consciousness and inner wisdom For over a long period debate has been going on among different classes of scientists In the light of the three considered together the book reviews about the three disciplines presents in brief the techniques of meditation designed for harnessing the universal source of energy It also describes in brief about the relationship between science religion and spirituality It gives a few guidelines of the benefits that the meditation and spirituality can bring to the humanity It discusses about the roles of science spirituality and religion in the present scenarios which are virtually accepted for being responsible for the upliftment of human beings According to few leaders of science and spirituality all these three disciplines should work together for benefit of human society The book will enlighten readers about recent advances in the disciplines of science spirituality and religion Science and the Indian Tradition David L. Gosling, 2007-09-12 This new text is a detailed study of an important process in modern Indian history During the late nineteenth and early twentieth century India experienced an intellectual renaissance which owed as much to the influx of new ideas from the West as to traditional religious and cultural insights Gosling examines the effects of the introduction of Western science into India and the relationship between Indian traditions of thought and secular Western scientific doctrine He charts the early development of science in India its role in the secularization of Indian society and the subsequent reassertion adaptation and rejection of traditional modes of thought The beliefs of key Indian scientists including Jagadish Chandra Bose P C Roy and S N Bose are explored and the book goes on to reflect upon how individual scientists could still accept particular religious beliefs such as reincarnation cosmology miracles and prayer Science and the Indian Tradition gives an in depth assessment of results of the introduction of Western science into India and will be of interest to scholars of Indian history and those interested in the interaction between Western and Indian traditions of intellectual thought
