**Science and Ideology in the Policy Sciences** Paul Diesing, 2017-07-05 The purpose of this book is to examine how ideology operates in the sense of influencing the conduct of inquiry in the policy sciences defined as economics political science and sociology The author seeks to identify the main ideologies and show how each ideology produces a preference for certain problems methods and hypotheses how it sensitizes scientists to certain phenomena and suggests certain interpretations of those phenomena and how it closes off other phenomena and concepts from investigation and testing or at least distorts that investigation In this book Diesing critically examines all the major schools of policy related social thought from 1930 to 1975 He deals with Neoclassical Economics and its various applications the Keynesians the Systems Approach the Schumpeter perspective the Critical Intellectuals the Pluralists the J K Galbraith School New Left Marxism and the Ecological Paradigm of Schumacher and others The world looks different if your perspective is that of a rational small businessman working in a

society of hypothetical perfect competition as opposed to that of a proletarian looking up at your oppressors Part One is descriptive and evaluative considering each ideology in turn Part Two considers the policy implications In 1982 Diesing published a remarkable book entitled *Science and Ideology in the Policy Sciences* When I interviewed Diesing in Buffalo in the summer of 1984 he told me that to date the publication had been reviewed in only two professional journals I was astounded *Science Ideology* was the best book I had read in a decade and it related directly to all the policy sciences The lack of professional response may partially reflect Diesing's disinterest in self promotion but beyond this is the community problem Scholars are recognized within disciplines but there is only a tiny community of social science I consider this to be the most brilliant of Diesing's books Like all of Diesing's works it remains highly relevant today from the introduction by Richard Hartwig

Corsi,Craig R. Smith,2021-05-14 It is estimated that Americans consume more than 25 percent of the world s oil but have control over less than 3 percent of its proven supply This extremely unbalanced pattern of consumption makes it possible for foreign governments corrupt political leaders terrorist organizations and oil conglomerates to place the citizens of the United States in a stranglehold of supply and demand There is no greater proof of this than the direct relationship between skyrocketing gas prices and the exploding wealth of those who control the supply of oil In Black Gold Stranglehold Jerome R Corsi and Craig R Smith expose the fraudulent science that has been sold to the American people in order to enslave them the belief that oil is a fossil fuel and a finite resource On the contrary this book presents authoritative research currently known mostly in the scientific community that oil is not a product of decaying dinosaurs and prehistoric forests Rather it is a natural product of the earth The scientific evidence cited by Corsi and Smith suggests that oil is constantly being produced by the earth far below the planet s surface and that it is brought to attainable depths by the centrifugal

forces of the earth's rotation In great detail Corsi and Smith explore the international and domestic politics of oil production and consumption This includes the wealth and power of major oil conglomerates the manipulation of world economies by oil producing states and rogue terrorist regimes and the political agenda of radical environmentalists and conservationists who obstruct the use of oil reserves currently controlled by the U S government The authors offer an understanding of the dangerous situation America faces because its currency is no longer tied to any precious and truly scarce metals such as gold as it was until 1973 This situation could easily lead to the devastation of the U S economy if Middle Eastern countries are able to enact current plans to accept only the Euro or gold backed currencies such as the Gold Dinar instead of the U S dollar as the standard currency for oil Black Gold Stranglehold will dramatically change the debate about oil The significance of its message is sure to cause thoughtful people to reconsider the current dependence of the U S economy on imported oil
