offers advice on how to promote feline harmony in a multi cat household and how to enhance your pet's physical and mental well being. A directory of breeds features gorgeous photographs of more than 40 popular breeds alongside details of their characteristics, genetic background and care requirements. Modern breeding and associated issues are raised and a comprehensive glossary of medical terms covers health issues that owners need to know. Anyone with an interest in or love for cats and all those who have owned a cat will find much to learn and enjoy in *The Cat: A Natural History*. [Wild Cats of the World](#) Mel Sunquist, Fiona Sunquist, 2017-05-15. Did you know that European royalty once used cheetahs to hunt deer or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start? Have you ever wondered whether domestic cats really do land on their feet when they fall or how Canada lynx can stalk their prey in the winter without falling through the deep snow? *Wild Cats of the World* is a treasure trove of answers to questions like these and many others for anyone who's interested in learning more about the world's felids including the ones with whom we share our homes. Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source, many of them quite difficult to find, including scientific papers, descriptions of hunts, archeological findings, observations by naturalists and travelers, reports from government agencies and newsletters from a wide variety of organizations. Weaving information from these sources together with their own experiences observing wild cats around the world, the Sunquists have created the most comprehensive reference on felids available. Each of their accounts of the 36 species of cat contains a description of the cat, including human interactions with it, as well as detailed data on its distribution, ecology and behavior, status in the wild and efforts to conserve it. Numerous photographs, including more than 40 in full color, illustrate these accounts. Ranging from the two pound black footed cat to the five hundred pound tiger and from the African serval with its satellite dish ears to the web footed fishing cat of Asia, *Wild Cats of the World* will fascinate and educate felid fans of any stripe or spot. [A Natural History of Domesticated Mammals](#) Juliet Clutton-Brock, 1999-09-02. Humans have manipulated and changed the way of life of other mammals for thousands of years. This new edition of *A Natural History of Domesticated Mammals* explores the progress which has been made in understanding the origins of domestication and its spread, both biologically and culturally, across the world. The archaeological evidence for the earliest dating of domestication of each species is included, reflecting the recent expansion in such studies. Human history has been inexorably linked with the exploitation and often very cruel treatment of animals. In today's society, attitudes to animal welfare have improved. It is now recognised that an understanding of the ecology and behavioural patterns of wild species is necessary in ensuring the well being and correct husbandry of their domesticated descendants. This book provides up to date information on the natural history of all the mammals on which human societies have depended for their survival. **Classical Cats**

Donald W. Engels, 2018-10-03 This is the definitive book on classical cats The cat has played a significant role in history from the earliest times Well known is its role in the religion and art of ancient Egypt no less than its association with witchcraft in the Middle Ages But when did the cat become a domestic companion and worker as well There has been much debate about the position of the cat in ancient Greece and Rome Artistic representations are sometimes ambiguous and its role as a mouse catcher seems often to have been carried out by weasels Yet other evidence clearly suggests that the cat was as important to Greeks and Romans as it is to many modern people This book is the first comprehensive survey of the evidence for cats in Greece and Rome and of their functions and representations in art Donald Engels draws on authors from Aesop to Aristotle on vase painting inscriptions and the plastic arts and on a thorough knowledge of zoology of the cat He also sets the ancient evidence in the wider context of the Egyptian period that preceded it as well as the views of the Church fathers who ushered antiquity into the Middle Ages
