Usner,2023-12-22 Each year millions of people visit the area of rugged California coastline and wild mountains known as Big Sur Finally here is a book that is both a natural history of this beautiful region and an excellent guide to its extensive public lands The first section introduces the area s geology climate flora fauna and human history The second section describes selected sites trails and features that are mentioned in Part One Although Big Sur is world famous for awe inspiring scenery it is less known for its great ecological diversity and its significance as a haven for many species of terrestrial and marine wildlife In no other part of the world do fog loving coastal redwoods thrive on one slope of a canyon while arid climate yuccas grow on the other Similarly sea otters and cormorants live near dry climate creatures like canyon wrens and whiptail lizards The area s staggering beauty and forbidding wilderness have inspired artists poets naturalists and hikers and also real estate developers As increasing tourism development pressure and land use decisions continue to affect Big Sur this book will do

much to heighten awareness of the region's biotic richness and fragility. Written in nontechnical language with generous color photographs, drawings, maps, species lists, and a bibliography, it will attract both the casual and the serious naturalist as well as anyone concerned about preserving California's natural heritage. Each year millions of people visit the area of rugged California coastline and wild mountains known as Big Sur. Finally here is a book that is both a natural history of this beautiful region and an excellent guide to its extensive public lands. The first

William Stimpson and the Golden Age of American Natural History Ronald Scott Vasile, 2018-06-19 William Stimpson was at the forefront of the American natural history community in the latter half of the nineteenth century. Stimpson displayed an early affinity for the sea and natural history and, after completing an apprenticeship with famed naturalist Louis Agassiz, he became one of the first professionally trained naturalists in the United States. In 1852, twenty-year-old Stimpson was appointed naturalist of the United States North Pacific Exploring Expedition where he collected and classified hundreds of marine animals. Upon his return, he joined renowned naturalist Spencer F. Baird at the Smithsonian Institution to create its department of invertebrate zoology. He also founded and led the irreverent and fun-loving Megatherium Club, which included many notable naturalists. In 1865, Stimpson focused on turning the Chicago Academy of Sciences into one of the largest and most important museums in the country. Tragically, the museum was destroyed in the Great Chicago Fire of 1871, and Stimpson died of tuberculosis soon after, before he could restore his scientific legacy. This first-ever biography of William Stimpson situates his work in the context of his time. As one of few to collaborate with both Agassiz and Baird, Stimpson's life provides insight into the men who shaped a generation of naturalists. The last, before intense specialization caused naturalists to give way to biologists. Historians of science and general readers interested in biographies, science, and history will enjoy this compelling biography.

**Behavior of Marine Animals** Howard E. Winn, Bori L. Olla, 2012-12-06

Four years ago we began soliciting articles for this volume from authors who were engaged in comprehensive research on whales. From the outset we decided not to limit the subject matter to behavior but to also include natural history. Much of what is known about the behavior of whales arose from studies whose principal aim was not behavior, much as it did for other animal groups, before behavior was considered a distinct discipline. Thus, in many of the articles, behavior is closely intertwined with natural history and in others is completely overshadowed by a basic natural history approach. Our aim was to have the articles contain a review of the literature and include research findings not previously published. For all intents and purposes, this aim has been realized, albeit perhaps not in as balanced a fashion in terms of species or subject matter as was originally planned. Nevertheless, we believe the articles present a wide range of informative works with a myriad of approaches and techniques represented. We are grateful to the contributors for their patience and understanding in awaiting

publication which has taken much longer than we originally expected We are also grateful for the assistance of a number of people especially Julie Fischer and Lois Winn for their editorial efforts and Jill Grover Carol Samet and Lois Winn for their help in indexing     Proposed 1983 Outer Continental Shelf Oil and Gas Lease Sale Offshore Central California ,1983
