Natural World Golden Eagle:

The Golden Eagle Jeff Watson, 2010-08-23 This comprehensive monograph is a second edition of one of the most popular Poyser monographs it covers all aspects of this spectacular eagle's biology and ecology including a full review of the literature and incorporating the considerable body of research on the species since the publication of the first edition in 1997. The late Jeff Watson was one of Scotland's foremost eagle experts with more than 20 years of research on the birds. Following Jeff's untimely death the book is being completed by his colleagues Des Thompson and Helen Riley. Scottish studies provide the foundation for a treatment that also includes up to date information from work in North America, continental Europe and elsewhere. This global view allows fascinating insights into the species' relationships with a variety of different habitats and leads to many new and important conclusions regarding its ecology. This highly readable and authoritative account is destined to become the standard reference on the species both in Scotland and elsewhere in the world. The text is enriched with many superb pictures of this majestic bird and additional wash landscapes capture the very special atmosphere of Scotland's Golden Eagle country.

Imperialism and the natural world John M. MacKenzie, 2017-03-01 Imperial power both formal and informal and research in the natural sciences were closely dependent in the nineteenth century. This book examines a portion of the mass produced juvenile literature focusing on the cluster of ideas connected with Britain's role in the maintenance of order and the spread of civilization. It discusses the political economy of Western ecological systems and the consequences of their extension to the colonial periphery particularly in forms of forest conservation. Progress and consumerism were major constituents of the consensus that helped stabilise the late Victorian society but consumerism only works if it can deliver the goods. From 1842 onwards almost all major episodes of coordinated popular resistance to colonial rule in India were preceded by phases of vigorous resistance to colonial forest control. By the late 1840s a limited number of professional positions were available for geologists in British imperial service but imperial geology had a longer pedigree. Modern imperialism or municipal imperialism offers a broader framework for understanding the origins, long duration and persistent support for overseas expansion which transcended the rise and fall of cabinets or international realignments in the 1800s. Although medical scientists began to discern and control the microbiological causes of tropical ills after the mid nineteenth century the claims for climatic causation did not undergo a corresponding decline. Arthur Pearson's *Pearson's Magazine* was patriotic, militaristic and devoted to royalty. The book explores how science emerged as an important feature of the development policies of the Colonial Office (CO) of the colonial empire.

The Human Spirit Marjorie O'Rourke Boyle, 2018-11-01 In this volume Marjorie O'Rourke Boyle probes significant concepts of the human spirit in Western religious culture across more than two millennia from the book of Genesis to early modern science. *The Human Spirit* treats significant interpretations of human nature as religious, in political, philosophical and physical aspects by tracing its historical subject through the Priestly tradition of the Hebrew Bible and the writings of the apostle Paul among the Corinthians, the

innovative theologians Augustine and Aquinas the reformatory theologian Calvin and the natural philosopher and physician William Harvey Boyle analyzes the particular experiences and notions of these influential authors while she contextualizes them in community She shows how they shared a conviction although distinctly understood of the human spirit as endowed by or designed by a divine source of everything animate An original and erudite work that utilizes a rich and varied array of primary source material this volume will be of interest to intellectual and cultural historians of religion philosophy literature and medicine
