Functional Beauty Glenn Parsons,Allen Carlson,2008-11-20 Glenn Parsons and Allen Carlson offer an in depth philosophical study of the relationship between function and aesthetic value breaking with the philosophical tradition of seeing the two as separate They begin by developing and defending in a general way the concept of Functional Beauty exploring how the role of function in aesthetic appreciation has been treated by some notable thinkers in the history of aesthetics They then consider the relationship to Functional Beauty of certain views in current aesthetic thought especially what we call cognitively rich approaches to the aesthetic appreciation of both art and nature Turning to work on the nature of function in the philosophy of science they argue that this line of enquiry can help solve certain philosophical problems that have been raised for the idea that knowledge of function plays an important role in aesthetic appreciation Although philosophical discussions of aesthetic appreciation tend to focus largely and sometimes almost exclusively on artworks the range of aesthetic appreciation is of course much larger Not simply art but also nature architecture and even more mundane everyday things cars tools clothing furniture and sports are objects of frequent and enthusiastic aesthetic appreciation Accordingly in the second half of the book Glen Parsons and Allen Carlson consider the place and importance of Functional Beauty in the aesthetic appreciation of a broad range of different kinds of things The final chapters explore Functional Beauty in nature and the natural environment in architecture and the built environment in everyday artefacts events and activities and finally in art and the artworld In each case Parsons and Carlson argue that Functional Beauty illuminates our aesthetic experiences and helps to address various theoretical issues raised by these different objects of appreciation

Listening to Beauty Megan Poole, 2025-09-05 A moving study of how encounters with beauty advance scientific discovery Our attempts to understand the world are always more than simply rational Our bodies learn through lived experience our natural environments challenge what we think we know and we take lessons from our nonhuman kin Even scientists often considered paragons of rationality frequently describe their findings in the language of beauty For rhetorician Megan Poole beauty is integral to how scientific research works Drawing on interviews with leading biologists Poole explores what happens when scientists set aside objectivity and listen for beauty around them The wonder we feel at the plumage of birds the melodies of whales or the caretaking of elephants may not help us on its own to isolate a given fact but such encounters may teach us to open ourselves to a different way of knowing entirely Through stories about researchers encounters with wonder Listening to Beauty reveals how scientific discovery happens sometimes unsystematically sometimes incoherently often beautifully

Aestheticism and the Marriage Market in Victorian Popular Fiction Kirby-Jane Hallum, 2015-10-06 Based on close readings of five Victorian novels Hallum presents an original study of the interaction between popular fiction the marriage market and the aesthetic movement She uses the texts to trace the development of aestheticism examining the differences between the authors including their approach style and gender
