History II The Land 3 Science and Informal Empire 4 Sinology and Natural History 5 Travel and Fieldwork in the Interior
Epilogue Appendix Selected Biographical Notes Abbreviations Notes Index Fa ti Fan s study of the encounter between the
British culture of the naturalist and the Chinese culture of the Qing is both a delight and a revelation The topic has scarcely
been addressed by historians of science and this work fills important gaps in our knowledge of British scientific practice in a
noncolonial context and of Chinese reactions to Western science in the eighteenth and nineteenth centuries In addition to the
culture of Victorian naturalists and Sinology Fan shows an admirable grasp of visual representation in science Chinese
taxonomic schemes Chinese export art British imperial scholarship and journeys of exploration His treatment of the China
trade and descriptions of Chinese markets and nurseries are especially welcome I learned a great deal and I strongly
recommend this book Philip Rehbock author of *Philosophical Naturalists Themes in Early Nineteenth Century British Biology*
By focusing on the experiences of British naturalists in China during a time when it was gradually being opened up to foreign
influences Fan makes at least two important contributions to history of science He gives us an authoritative study of British
naturalists in China as far as I know the only one of its kind and he forces us to rethink some of our categories for doing
history of science including how we conceive of the relationship between science and imperialism and between Western
naturalist and native Fan s scholarship is meticulous with careful attention to detail and his prose is clear controlled and
succinct Bernard Lightman editor of *Victorian Science in Context*
