Nature Conservation Law Colin T. Reid, 1994 **Nature Conservation Law** Charles Butler, 2015-12-31 **Legal Obstacles to the Application of Nature Conservation Legislation** Lothar Gündling, Council of Europe, 1997-01-01 *A Manual of Nature Conservation Law* Michael Fry, 2008 The Law of Nature Conservation Christopher Rodgers, 2013-03-21

This book provides a detailed account of the UK law of nature conservation. It covers all the extensive laws introduced in recent years to protect and promote the natural world, examining the operation of the legislation in practice. **The Law of Nature Conservation** Christopher Rodgers, 2013-03-21

Providing a detailed account of the law of nature conservation, this book reviews and discusses the way in which the law promotes the conservation of species of animal, bird, and plant, and how it protects natural habitats for protected species. Using an interdisciplinary approach, the book sets nature conservation in its economic and scientific context. It explains how the law reconciles the public interest in promoting biodiversity and the conservation of species and habitats on the one hand, and the private property rights of landowners and other resource appropriators on the other. The book offers an illuminating new interpretation of this area of environmental regulation, using a resource allocation model of property rights to explain how legal and economic instruments for promoting nature conservation work in practice. The analysis covers all recent legislation and case law, including the Marine and Coastal Access Act 2009, the Conservation of Habitats and Species Regulations 2010, and the 2012 National Planning Policy Framework. The book will serve as a critical guide to UK nature conservation law for those working in the system and a valuable reference point on the UK's approach to the area for environmental lawyers and policy makers overseas. **Nature Conservation in Europe** Graham Tucker, 2023-05-25

European ecosystems and species remain under pressure from intensive agriculture and forestry, fishing, pollution, urban sprawl, invasive species, and climate change. This book provides a detailed description and critical analysis of nature conservation responses, achievements, and failures, motivated by the concerning state of nature and missed biodiversity targets. It summarises Europe's nature and the impact of human activities, and then gives an overview of relevant international biodiversity treaties and the EU nature conservation policy and legislative framework. The core of the book comprises chapters written by national experts which cover the UK and twenty-five EU Member States, providing comparative case studies from which valuable lessons are drawn. Covering wide-ranging topics such as biodiversity pressures, legislation, and governance, biodiversity strategies, species protection, protected areas, habitat management, and funding, this book is of interest to a wide audience, including academics and professionals involved in nature conservation and related environmental fields. *The Privatisation of Biodiversity?* Colin T. Reid, Walters Nsoh, 2016-08-26

Current regulatory approaches have not prevented the loss of biodiversity across the world. This book explores the scope to strengthen conservation by using different legal mechanisms, such as biodiversity offsetting, payment for ecosystem services, and conservation covenants, as well as tradable development rights and taxation. The authors discuss how such mechanisms

introduce elements of a market approach as well as private sector initiative and resources They show how examples already in operation serve to highlight the design challenges legal technical and ethical that must be overcome if these mechanisms are to be effective and widely accepted *The New Nature Conservation Law of the RSFSR*. Erwin Bucholz, Joint Publications Research Service (Arlington, Va.), 1961 *The New Nature Conservation Law of the RSFSR*.
