**Nature in Our Biblical Heritage** Nogah Hareuveni,1996      **The Evil And Bloody Nature Of Our Biblical God. Yahweh Guilty Of Crimes Against Humanity** Maximillien De Lafayette,2015-02-17      **Nature in Our Biblical Heritage** Nogah Hareuveni,1980 Nogah Kedumim continued his research and writing all geared to one purpose reaching a comprehensive understanding of the interrelationship between the phenomena of nature in the land of Israel and the broad structure of Jewish holidays and Judeo Christian tradition BOOK JACKET      *Our Future in Nature:* Edmund Barrow,2019-05-21 Who has not felt a sense of awe silence stillness and presence in an ancient woodland or forest or in front of a sacred tree Humankind has held trees and woodlands in awe and reverence since the dawn of time We depend on nature for the air we breathe the water we drink and the services nature provides This book is about the importance of sacred trees and groves in our stress filled and increasingly urban world Note that over 50 percent of the world is urban Sacred trees and sacred groves transcend race color and creed They are found all over our fragile planet Where there is a tree there is a sacred tree This book will appeal to religious and spiritual traditions as well as to conservation and environmental movements It will offer its reader means to take better care of our only home planet Earth Often undervalued unrecognized or disrespected sacred trees and groves are conserved against mind boggling pressures For example there is a sacred fig tree between two shops in one of the main streets in Hanoi Vietnam There is also a one hectare sacred grove in the center of Kumasi a city of 2 5 million people in Ghana the over 150 000 sacred groves in India and the sacred hill forests of every village in Yunnan South China Sacred trees and groves often conserve unique biodiversity which can help create or recreate connectivity in the landscape As such sacred trees and groves may be relic survivors of bygone ages and are an important resource for restoring degraded natural landscapes This book offers ways for those involved with religion and spirituality and for those working with conservation and land use to jointly engage in repairing the damage we have done to Earth

Reconstructing a Christian Theology of Nature Revd Dr Anna Case-Winters,2013-05-28 In the present ecological crisis it is imperative that human beings reconsider their place within nature and find new more responsible and sustainable ways of living Assumptions about the nature of God the world and the human being shape our thinking and consequently our acting Some have charged that the Christian tradition has been more a hindrance than a help because its theology of nature has unwittingly legitimated the exploitation of nature This book takes the current criticism of Christian tradition to heart and invites a reconsideration of the problematic elements its desacralization of nature its preoccupation with the human being to the neglect of the rest of nature its dualisms and elevation of the spiritual over material reality and its habit of ignoring or resisting scientific understandings of the natural world Anna Case Winters argues that Christian tradition has a more viable theology of nature to offer She takes a look at some particulars in Christian tradition as a way to illustrate the undeniable problems and to uncover the untapped possibilities In the process she engages conversation partners that have been sharply

critical and particularly insightful feminist theology process thought and the religion and science dialogue The criticisms and insights of these partners help to shape a proposal for a reconstructed theology of nature that can more effectively fund our struggle for the fate of the earth

**The Nature and Design of Christian Baptism** R. A. Lancaster, 1855 God in our Nature Peter Kenneth Stevenson, 2007-09-01 Arguably the leading Scottish theologian of the nineteenth century John McLeod Campbell's theology is much criticized and often misunderstood Previous accounts have tended to overlook both his sermons and his Christology This reassessment of his thought breaks new ground by offering a detailed study of his sermons and by identifying the distinctive Christology which contributes to a clearer understanding of his doctrine of atonement Drawing upon the full range of Campbell's work God in our Nature brings to light a trinitarian theologian whose pilgrimage represents a journey within evangelicalism rather than a departure from the evangelical fold

Nature and Scripture in the Abrahamic Religions: God, Scripture and the rise of modern science (1200-1700) Jitse M. van der Meer, Scott Mandelbrote, 2008 These volumes describe how the development of the different styles of interpretation found in reading scripture and nature have transformed ideas of both the written word and the created world

**Biblical Nature Studies** Andrew Webster Archibald, 1915 **An Inquiry Into the Nature of Our Lord's Knowledge as Man** William Shuckburgh Swayne, 1891 Einstein, Polanyi, and the Laws of Nature Lydia Jaeger, 2012-01-15 What is the relationship between religious belief and the study of nature between theology and science This is the fundamental preoccupation of the three different studies in Einstein Polanyi and the Laws of Nature By exploring the highly original yet little known thought of Michael Polanyi Jaeger highlights the inherent personal investment in any quest for knowledge including the scientific enterprise thus raising the question of the objectivity of human knowledge Considered to be the most incredible mind of the twentieth century Albert Einstein saw scientific research as the fruit of the cosmic religion His response to the question of the relationship between faith and science also receives the close analysis it deserves Finally Jaeger is interested in science's propensity to use the concept of laws of nature an idea also found in the Bible She paves the way for interdisciplinary dialogue by examining the similarities and differences The synthesis of these three complementary studies brings out the collaboration between belief and knowledge thus establishing a bridge between two noble human activities faith and scientific research It will interest all serious followers of the ongoing science and religion dialogue

**Nature and Scripture in the Abrahamic Religions: 1700-Present** Scott Mandelbrote, Jitse van der Meer, 2009-01-31 The four companion volumes of Nature and Scripture in the Abrahamic Religions contribute to a contextual evaluation of the mutual influences between scriptural exegesis and hermeneutics on the one hand and practices or techniques of interpretation in natural philosophy and the natural sciences on the other We seek to raise the low profile this theme has had both in the history of science and in the history of biblical interpretation Furthermore questions about the interpretation of scripture continue to be provoked by current theological reflection on scientific theories We also seek to provide a historical context

for renewed reflection on the role of the hermeneutics of scripture in the development of theological doctrines that interact with the natural sciences Contributors are J Matthew Ashley Robert E Brown Elizabeth Chmielewski Edward B Davis Henri Wijnandus de Knijff Marwa Elshakry Richard England Menachem Fisch George Harinck Bernhard Kleeberg Scott Mandelbrote G Blair Nelson Alexei V Nesteruk Jitse M van der Meer Rob P W Visser and William Yarchin

**The Physical Nature of Christian Life** Warren S. Brown, Brad D. Strawn, 2012-06-18 This book explores the implications of recent insights in modern neuroscience that attribute mental capacities often ascribed to a disembodied soul instead to the functions of the brain and body in collaboration with social experience It explores how this insight changes the traditional care of souls encouraging more attention to fostering spiritual growth through a social and communal focus

*Loving and Studying Nature* Malcolm Skilbeck, 2022-01-05 This volume investigates crucial ways in which nature has been apprehended understood and valued in different cultures and over time It is grounded in current global concerns about growing threats to the natural environment Through a critical appraisal of specific examples it ranges widely over historical and contemporary attitudes and behaviours It presents a wide ranging analysis of selected ideas and attitudes in the evolution mainly of western civilisation from the time of the cave artists to the present day It argues for preservation and conservation of the natural resources and beauty of the earth in the face of religious supernatural arguments and the rise of consumer capitalism and consumerism

**The Christian Leader**, 1928 Spirit and Nature Timothy Hessel-Robinson, Ray Maria McNamara, 2011-08-01 Spirit and Nature is a collection of essays exploring how the resources of Christian spirituality can inform the practice of a more ecologically sustainable faith Our current ecological situation calls for people of religious faith to reexamine the way they envision the practice of spirituality As environmental ethicists have called us to reconsider the human Earth relationship so that the planet is not seen as simply an endless supply of resources to fill human wants and needs so these essays call us to reconsider spiritual practice as it relates to Earth s ecology Rather than viewing spirituality as an escape from the material world the authors describe the embodiment of the God quest within the human nature relationship Drawing on diverse disciplinary perspectives these essays examine a variety of topics including the relationship between Earth and humans in the Bible the role of nature s beauty in Christian spirituality the practice of Christian discernment and contemplation in light of the natural sciences the role of nature in liturgical prayer and others These essays consider how scholarship in Christian spirituality can contribute to reimagining faith in ways that better cherish the Earth s fragile beauty

**Explorations in Neuroscience, Psychology and Religion** Kevin S. Seybold, 2016-04-15 In the 1990s great strides were taken in clarifying how the brain is involved in behaviors that in the past had seldom been studied by neuroscientists or psychologists This book explores the progress begun during that momentous decade in understanding why we behave think and feel the way we do especially in those areas that interface with religion What is happening in the brain when we have a religious experience Is the soul a product of the mind which is in turn a product of the brain If so what are

the implications for the Christian belief in an afterlife If God created humans for the purpose of having a relationship with him should we expect to find that our spirituality is a biologically evolved human trait What effect might a disease such as Alzheimer s have on a person s spirituality and relationship with God Neuroscience and psychology are providing information relevant to each of these questions and many Christians are worried that their religious beliefs are being threatened by this research Kevin Seybold attempts to put their concerns to rest by presenting some of the scientific findings coming from these disciplines in a way that is understandable yet non threatening to Christian belief Thomas Merton Paul R. Dekar,2011-08-05 Thomas Merton was arguably the twentieth century s most widely published and widely read spiritual writer This book explores Merton s prophetic writings and experience as they offer guidance for spiritual seekers in their search to experience God to simplify their lives to live more humanly and to shape Christian community in the face of alienation consumerism noise and technology The book includes parts of three previously unpublished conference contributions by Merton on technology Issues in Science and Theology: Nature - and Beyond Michael Fuller,Dirk Evers,Anne Runehov,Knut-Willy Sæther,Bernard Michollet,2020-02-25 This book addresses a variety of important questions on nature science and spirituality Is the natural world all that there is Or is it possible to move beyond nature What might it mean to transcend nature What reflections of anything beyond nature might be found in nature itself Gathering papers originally delivered at the 2018 annual conference of the European Society for the Study of Science and Theology ESSSAT the book includes contributions of an international group of scientists philosophers theologians and historians all discussing nature and what may lie beyond it More than 20 chapters explore questions of science nature spirituality and more including Nature and Beyond Immanence and Transcendence in Science and Religion Awe and wonder in scientific practice Implications for the relationship between science and religion The Cosmos Considered as a Moral Institution The transcendent within how our own biology leads to spirituality Preserving the heavens and the earth Planetary sustainability from a Biblical and educational perspective Issues in Science and Theology Nature and Beyond will benefit a broad audience of students scholars and faculty in such disciplines as philosophy history of science theology and ethics Placing Nature on the Borders of Religion, Philosophy and Ethics Dr Forrest Clingerman,Mr Mark H Dixon,2013-06-28 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one s place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think

about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place
