The Self-Aware Universe Amit Goswami,1995-03-21 In this stimulating and timely book Amit Goswami PhD shatters the widely popular belief held by Western science that matter is the primary stuff of creation and proposes instead that consciousness is the true foundation of all we know and perceive His explanation of quantum physics for lay readers called a model of clarity by Kirkus Reviews sets the stage for a voyage of discovery through the common ground of science and religion the entwined nature of mind and body and our interconnectedness with all of creation

Mediumship and Survival W. W. Baggally,2012-08-31 Whether or not we survive physical death is one of humanity s most fundamental concerns Here Dr Gauld draws on a century of evidence mediumship reincarnation obsession possession hauntings and apparitions all seem to indicate survival This is a compulsively readable assessment of evidence for and against survival and an excellent introduction to the field of psychical research The Paranormal the new ebook series from F W Media International Ltd resurrecting rare titles classic publications and out of print texts as well as new ebook titles on the

supernatural other worldly books for the digital age The series includes a range of paranormal subjects from angels fairies and UFOs to near death experiences vampires ghosts and witchcraft The Measure of All Minds José Hernández-Orallo, 2017-01-11 Are psychometric tests valid for a new reality of artificial intelligence systems technology enhanced humans and hybrids yet to come Are the Turing Test the ubiquitous CAPTCHAs and the various animal cognition tests the best alternatives In this fascinating and provocative book Jos Hern ndez Orallo formulates major scientific questions integrates the most significant research developments and offers a vision of the universal evaluation of cognition By replacing the dominant anthropocentric stance with a universal perspective where living organisms are considered as a special case long standing questions in the evaluation of behavior can be addressed in a wider landscape Can we derive task difficulty intrinsically Is a universal g factor a common general component for all abilities theoretically possible Using algorithmic information theory as a foundation the book elaborates on the evaluation of perceptual developmental social verbal and collective features and critically analyzes what the future of intelligence might look like Modelling in Science and Technology Xavier J.R. Avula, Rudolf E. Kalman, Anthanasios I. Liapis, 2014-05-09 Mathematical Modelling in Science and Technology The Fourth International Conference covers the proceedings of the Fourth International Conference by the same title held at the Swiss Federal Institute of Technology Zurich Switzerland on August 15 17 1983 Mathematical modeling is a powerful tool to solve many complex problems presented by scientific and technological developments This book is organized into 20 parts encompassing 180 chapters The first parts present the basic principles methodology systems theory parameter estimation system identification and optimization of mathematical modeling The succeeding parts discuss the features of stochastic and numerical modeling and simulation languages Considerable parts deal with the application areas of mathematical modeling such as in chemical engineering solid and fluid mechanics water resources medicine economics transportation and industry The last parts tackle the application of mathematical modeling in student management and other academic cases This book will prove useful to researchers in various science and technology fields No Five Fingers are Alike Joseph C. Berland, 1982 Snake charmers bards acrobats magicians trainers of performing animals and other nomadic artisans and entertainers have been a colorful and enduring element in societies throughout the world Their flexible social system based on highly specialized individual skills and spatial mobility contrasts sharply with the more rigid social system of sedentary peasants and traditional urban dwellers Joseph Berland brings into focus the ethnographic and psychological differences between nomadic and sedentary groups by examining how the experiences of South Asian gypsies and their urban counterparts contribute to basic perceptual habits and skills No Five Fingers Are Alike based on three years of participant research among rural Pakistani groups provides the first detailed description in print of Asian gypsies By applying methods of anthropological observation as well as psychological experimentation Berland develops a theory about the relationship between social experience and mental growth He suggests that there are certain social

conditions under which mental growth can be accelerated His work promises to stand as an important contribution to the cross cultural literature on cognitive development. Animal Spatial Cognition: Behavioural And Brain Approach Catherine Thinus-blanc,1996-11-06 The Cognitive Map Tolman 1948 is a key notion in spatial processing studies It refers to high level spatial representations Although widely used this term remains ambiguous The aim of this book is two fold 1 to examine the most noteworthy studies in laboratory settings which have contributed during the last five decades to a better understanding of animal spatial representations 2 to provide some hints for future research Spatial tests designed by psychologists are useful tools for understanding the brain substrates of spatial memory Conversely brain treatments allow us to analyse the complex psychological mechanisms underlying spatial orientation Within this interdisciplinary context it is extremely important to take stock of a notion used and sometimes misused in cognitive neurosciences
