Teaching Sustainability / Teaching Sustainably Kirsten Allen Bartels,Kelly A. Parker,2023-07-03 Over the coming decades every academic discipline will have to respond to the paradigm of more sustainable life practices because students will be living in a world challenged by competition for resources and climate change and will demand that every academic discipline demonstrate substantial and corresponding relevance This book takes as its point of departure that integrating a component of sustainability into a discipline specific course arises from an educator asking a simple question in the coming decades as humanity faces unprecedented challenges what can my discipline or area of research contribute toward a better understanding of these issues The discipline need not be future oriented an archaeologist for instance could incorporate into a course some aspects of sustainable archaeological practices in areas threatened by rapid climate change as well as examples of sustainable or unsustainable ways of living practiced by members of the long gone society under investigation This book also argues that courses about sustainability need to cross disciplinary boundaries both because of the inter relatedness of the issues and because students will require the ability to use interdisciplinary approaches to thrive through the multiple careers most of them will face The contributions to this book are presented under four sections Sustainability as a Core Value in Education considers the rationale for incorporating sustainability in disciplinary courses Teaching Sustainability in the Academic

Disciplines presents eight examples of courses from disciplines as varied as agriculture composition engineering and teacher education Education as a Sustainable Practice reviews how the physical environment of the classroom and the delivery of instruction need themselves to reflect the values being taught The final section addresses the issues of leadership and long term institutional change needed to embed sustainable practice as a core value on campus Informal Learning and Field Trips Leah M. Melber, 2007-11-02 A highly accessible work of immense value on all facets of informal learning opportunities The focus on specific content areas is an excellent tool for teachers and the inclusion of a section related to English Language Learners is especially welcome and unique Robert Rueda Professor of Education University of Southern California This great resource demonstrates how to gain more meaning from field trips and includes a wealth of tips suggestions and rubrics to make it easy to assess student learning This book shows that just as much or more learning can be achieved when not in a classroom setting Mark Johnson Principal and Curriculum and Assessment Facilitator Glenwood Elementary School Kearney NE Turn every field trip into a high quality learning experience What youngster isn't excited at the prospect of taking a field trip Enthusiastic students present teachers with the ideal scenario for creating meaningful out of the classroom encounters and giving students the building blocks to help them become active participants in their own educational process This resource helps educators take full advantage of off site educational opportunities by developing lessons that connect informal learning with content standards Based on constructivist philosophy and inquiry based learning the book provides numerous sample lesson plans and technology tips and includes Learner centered activities for language arts math science social studies and fine art Ways to support English Language Learners and special education students Guidelines for developing corresponding classroom activities Strategies for building partnerships with informal learning sites Methods for bringing museum type activities into the classroom when a trip is not possible Informal Learning and Field Trips helps enrich students lives as they explore the world outside the school grounds and gives teachers a prime opportunity to revitalize the learning experience *American Education* , 1968
