## **Nature And Technology In The World Religions:**

*Nature and Technology in the World Religions* Peter Koslowski, 2001-11-30 This third volume in the series titled A Discourse of the World Religions addresses the question of the relationship to nature and the interpretation of technology in the world religions posed at the World Exposition EXPO 2000 in Hanover Germany June 22 23 2000 Contains 13 contributions written by international theology philosophy and religion scholars addressing topics including creation as cosmotheandric reality in Christianity the relationship to nature and technology in Judaism Christianity and Islam and naturalism and humanism in creation and construction in Hinduism Lacks a subject index Annotation copyrighted by Book News Inc Portland OR [Nature and Technology in the World Religions](#) P. Koslowski, 2013-06-29 Technology and the control of nature have arisen from the endeavor to reduce the neediness of human life Since this reduction is also the goal of religions there is a necessary proximity between religion and technology The relationship of humans to nature and technology is an object of religious doctrine and ethics in all of the world's religions The interpretations and the norms of the treatment of nature in economy and technology but also the veneration of nature in nature mysticism and its elevation in cult and sacrament are forms of expression of the relationship to nature in religions The development of the modern control of nature through technology appears to be connected to the biblical commission to rule over nature Buddhism and Hinduism however also interpret technology and human control of nature Technological power raises the question of how the normativeness of the created order intended by religion's concept of creation relates to the human freedom to reshape creation What answers do religions give to the question of the humane form of technology and the limits to technological power and human control of nature Leading scholars of Judaism Christianity Islam Hinduism and Buddhism have created with this volume a first hand source of information which enables the reader to gain a better understanding of these five world religions and their teachings on nature and technology [Nature and Technology in the World Religions](#) P. Koslowski, 2014-01-15 **Philosophy Bridging the World Religions** P. Koslowski, 2013-04-18 This is the fifth and last volume of the EXPO Discourses of the World Religions World Exposition EXPO 2000 Hannover Germany The series aims at a deeper understanding of the similarities and differences between Hinduism Buddhism Judaism Christianity and Islam in their theological and philosophical propositions It sees in philosophy a bridge between the religions and a means to overcome religious hostility and fundamentalism and to further the dialogue of the religions *The Origin and the Overcoming of Evil and Suffering in the World Religions* P. Koslowski, 2013-03-14 All religions face the challenge of explaining in view of God's goodness the existence of evil and suffering in the world They must develop theories of the origin and the overcoming of evil and suffering The explanations in Buddhism Christianity Hinduism Islam and Judaism of evil and suffering and their origin as well as these world religions theories of how to overcome evil and suffering differ from one another but are also similar in many respects The human person is always considered to be the origin of evil and also to be the focus of aspirations to be

able to overcome it The conviction that evil and suffering are not original and can be overcome is characteristic of and common to the religions The explanations of the origin of evil are closely related to the explanations of the continuation and propagation of evil in human persons in nature and in our technology and culture that have been developed in the religions in Christianity for example as the doctrine of original sin Finally the world religions are concerned with how to cope with suffering and offer guidance for overcoming evil and suffering Leading scholars of five world religions Buddhism Islam Christianity Judaism and Hinduism have created with this volume a first hand source of information which enables the reader to gain a better understanding of these religions central teachings about the origin and the overcoming of evil and suffering

### **Progress, Apocalypse, and Completion of History and Life after Death of the Human Person in the World**

**Religions** P. Koslowski, 2013-03-09 The soul is so closely connected to life that one cannot think that it could ever be separated from life and consequently be mortal Therefore it can only be immortal This argument from Plato's *Phaedo* for the immortality of the soul exhibits both a great strength and a great weakness Its strength is that it is difficult for anyone to think that the soul could ever exist without life Its weakness is first that not all religions accept a soul that remains the same as the center of the person thus one speaks for instance in Buddhism of a soulless theory of the human being and second that what is true does not depend on what we can think but on what we recognize in experience and thought The religions believe in the existence of a power that can work contrary to our experience that the soul in death is not separated from life How the religions believe they can establish this continued life after death and how faith in this life is related in the religions to the interpretation of history its progress its apocalyptic end and its eschatological completion and transfiguration is the theme of this book In the culture of the West in the nineteenth and twentieth centuries faith in the secular progress of the technological control of nature and the economic organization of society was the enemy of faith in the immortality of the soul

these matters materialize in the world around us thereby addressing key topics in this area of study The editors provide an extensive introduction to the book as well as useful introductions to each of its parts The volume s international contributors are drawn from the USA South Africa Netherlands Norway Indonesia and South Korea and offer a variety of perspectives voices cultural settings and geographical locales This handbook shows that human concern and engagement with material existence is present in all sectors of the global community regardless of religious tradition It challenges the traditional methodological approach of comparative religion and argues that globalization renders a comparative religious approach to the environment insufficient
