Nature Man And Society In The 12th Century:

Nature, Man, and Society in the Twelfth Century M-D Chenu, Jerome Taylor, Lester K. Little, 1997-01-01 The nine essays in this collection selected from *La th ologie au douzi me si cle* inquire into the historical context and origins of medieval scholasticism They are representative of Chenu s finest work If P re Chenu considers history of theology to be the central concern of this collection it is because he conceives of theology as an all encompassing science one which reflects the comprehensive unity of intellectual life as that develops within a culture Literary history and criticism cultural history philosophy biblical exegesis historiography ecclesiastical and social history the history of education all these and more are here involved in their interdependence From the Translators Note First published as *La th ologie au douzi me si cle* by J Vinn 1957 English translation published by University of Chicago Press 1968 **Nature, Man, and Society in the 12th Century** Marie-Dominique Chenu, 1968 **Nature, Man, and Society in the Twelfth Century** Marie-Dominique Chenu, 1957 *Nature, Man, and Society in the Twelfth Century* Marie-Dominique Chenu, 1957 **Jewish Education and Society in the High Middle Ages** Ephraim Kanarfogel, 2007-06-11 Paperback edition of a favorite text on the literary creativity and communal involvement in the production of the Tosafist corpus The Jews of northern France Germany and England known collectively as Ashkenazic Jewry have commanded the attention of scholars since the beginnings of modern Jewish historiography Over the past century historians have produced significant studies about Jewish society in medieval Ashkenaz that have revealed them as a well organized creative and steadfast community Indeed the Franco Russian Jewry withstood a variety of physical political and religious attacks in the twelfth and thirteenth centuries to produce an impressive corpus of Talmudic and halakhic compositions known collectively as Tosafot that revolutionized the study of rabbinic literature Although the literary creativity of the Tosafists has been documented and analyzed and the scope and policies of communal government in Ashkenaz have been fixed and compared no sustained attempt has been made to integrate these crucial dimensions Jewish Education and Society in the High Middle Ages considers these relationships by examining the degree of communal involvement in the educational process as well as the economic theories and communal structures that affected the process from the most elementary level to the production of the Tosafist corpus By drawing parallels and highlighting differences to pre Crusade Ashkenaz the period following the Black Death Spanish and Proven al Jewish society and general medieval society Ephraim Kanarfogel creates an insightful and compelling portrait of Ashkenazic society Available in paperback for the first time with a new preface included Jewish Education and Society in the High Middle Ages will be a welcome addition to the libraries of Jewish studies scholars and students of medieval religious literature The Literal Sense and the Gospel of John in Late Medieval Commentary and Literature Mark Hazard, 2013-12-16 Focusing on the famous Medieval commentator Nicolas of Lyra and the anonymous Middle English biblical adaptation of the Gospel of John the Cursor Mundi this book examines the development of the analytical tools of biblical literary criticism showing how late

Medieval commentators negotiated the paradoxical interdependence of the literal and spiritual senses as transmitted by traditional and inherited vocabularies through a focus on narrative structure Mark Hazard combines an enlightening account of the actual practice of professional commentators the history of Gospel interpretation and cultural history to reveal that remarkable shift in the treatment of the Bible that modern scholars would regard as having laid the groundwork for the historical critical methods in biblical research As such this book sheds light not only on the 14th century practice of biblical interpretation but will also be of value to those currently engaged in reading and writing about the bible **An**

Environmental History of the Middle Ages John Aberth, 2013 The Middle Ages was a critical and formative time for Western approaches to our natural surroundings eeAn Environmental History of the Middle Ages is a unique and unprecedented cultural survey of attitudes towards the environment during this period Humankind e tm s relationship with the environment shifted gradually over time from a predominantly adversarial approach to something more overtly collaborative until a series of ecological crises in the late Middle Ages With the advent of shattering events such as the Great Famine and the Black Death considered efflorescences of the climate downturn known as the Little Ice Age that is comparable to our present global warming predicament medieval people began to think of and relate to their natural environment in new and more nuanced ways They now were made to be acutely aware of the consequences of human impacts upon the environment anticipating the cyclical new ecology approach of the modern world Exploring the entire medieval period from 500 to 1500 and ranging across the whole of Europe from England and Spain to the Baltic and Eastern Europe John Aberth focuses his study on three key areas the natural elements of air water and earth the forest and wild and domestic animals Through this multi faceted lens An Environmental History of the Middle Ages sheds fascinating new light on the medieval environmental mindset It will be essential reading for students scholars and all those interested in the Middle Ages *God and Nature* David C. Lindberg, Ronald L. Numbers, 2023-11-15 Since the publication in 1896 of Andrew Dickson White s classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White s conclusions the image of warfare lingers in the public mind To provide an up to date alternative based on the best available scholarship and written in nontechnical language the editors of this volume have assembled an international group of distinguished historians In eighteen essays prepared especially for this book these authors cover the period from the early Christian church to the twentieth century offering fresh appraisals of such encounters as the trial of Galileo the formulation of the Newtonian worldview the coming of Darwinism and the ongoing controversies over scientific creationism They explore not only the impact of religion on science but also the influence of science and religion This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations

of their relationship Scholars and general readers alike will find it provocative and readable Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians

Nature Peter Coates, 2013-04-25 *Nature* is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical eras A distinctive unifying theme is Coates's interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge *Nature* provides the reader with an accessible synthesis and introduction to some of environmental history's central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues

Church and Reform Louis Pascoe, 2004-12-01 This work examines Pierre d'Ailly's 1351-1420 views on bishops theologians and canon lawyers not primarily in their conciliar context but within the broader dimensions of their individual status office and authority within the Church These views also unfold in varying degrees within the apocalyptic context of his thought and result in a call for both pastoral and personal reform especially for the episcopacy This call moreover reveals strong apostolic and evangelical influences especially those of the Franciscans and the Brethren of the Common Life and adds a distinctive dimension to the wide variety of late medieval reform ideologies which while having some influence at the Council of Constance contributed heavily to the reform decrees of Trent

Sex, Dissidence and Damnation Jeffrey Richards, 2013-09-13 For the authorities in medieval Europe dissent struck at the roots of an ordered settled world It was to be crushed initially by reason and argument eventually by torture Jeffrey Richards examines the wretched lives of heretics witches Jews lepers and homosexuals and uncovers a common motive for their persecution sexual aberrance

Ecclesiastical History Society, Ecclesiastical History Society. Summer Meeting, 2010 Papers read at the 2008 summer meeting and the 2009 winter meeting of the Ecclesiastical History Society **The Medieval Discovery of Nature** Steven A. Epstein, 2012-09-28 This book examines the relationship between humans and nature that evolved in medieval Europe over the course of a millennium From the beginning people lived in nature and discovered things about it Ancient societies bequeathed to the Middle Ages both the Bible and a pagan conception of natural history These conflicting legacies shaped medieval European ideas about the natural order and what economic moral and biological lessons it might teach This book analyzes five themes found in medieval views of nature grafting breeding mules original sin property rights and disaster to understand what some medieval people found in nature and what their assumptions and beliefs kept them from seeing

History of the Concept of Mind Paul S. Macdonald, 2019-07-23 Exploring the roads less travelled MacDonald continues his monumental essay in the history of ideas The history of heterodox ideas about the concept of mind takes the reader from the earliest records about human nature in Ancient Egypt the Ancient Near East and the Zoroastrian religion through the secret teachings in the Hermetic and Gnostic scriptures and into the transformation of ideas about the mind soul and spirit in the late antique and early medieval epochs These transitions include discussion of the influence of Central Asian shamanism Manichean ideas about the soul in light and darkness and Neoplatonic theurgy working on god within Sections on the medieval period are concerned with the rediscovery of magical practices and occult doctrines from Roger Bacon to Francis Bacon the adaptation of Neoplatonic and esoteric ideas in the medieval Christian mystics and the survival of these ideas mixed with natural science in the works of von Helmont Leibniz and Goethe The book concludes with an investigation of the many forms of dualism in accounts of the human mind and soul and the concept of dual life which underpins our aspiration to understand how humans could have an immortal nature like the gods **Imagination, Meditation, and Cognition in the Middle Ages** Michelle Karnes, 2017-12-20 In *Imagination Meditation and Cognition in the Middle Ages* Michelle Karnes revises the history of medieval imagination with a detailed analysis of its role in the period's meditations and theories of cognition Karnes here understands imagination in its technical philosophical sense taking her cue from Bonaventure the thirteenth century scholastic theologian and philosopher who provided the first sustained account of how the philosophical imagination could be transformed into a devotional one Karnes examines Bonaventure's meditational works the *Meditationes vitae Christi* the *Stimulus amoris* *Piers Plowman* and Nicholas Love's *Myrroure* among others and argues that the cognitive importance that imagination enjoyed in scholastic philosophy informed its importance in medieval meditations on the life of Christ Emphasizing the cognitive significance of both imagination and the meditations that relied on it she revises a long standing association of imagination with the Middle Ages In her account imagination was not simply an object of suspicion but also a crucial intellectual spiritual and literary resource that exercised considerable authority Renaissance and
