Nature Of Reality:

The Nature and Purpose of Reality: The Illumination of Creation, Spacetime, Good and Evil, Art, Philosophy, Psychology, Consciousness, Perfect Form, G Gary O. Nickolaus, 2020-10-04 This book attempts to interpret the nature of reality as it is concurrently described by quantum physics but its concern is that which cannot be described with physics or mathematics it is about the first fraction of a second after the big bang when all physics and mathematics breaks down a big bang that was not a onetime occurrence but is rather an ongoing activity it is about the Planck length and Planck time where no measurements can be taken no observations can be made and deductive reasoning and subconscious awareness is our only means of understanding It is about the dual nature of reality described in Quantum Physics and interpreted by Theology It attempts to define how the finite and infinite combine to complete the purpose of the Absolute Reality of the Singularity It attempts to describe the nature of reality as a mosaic in which all the concepts fit together to form an Absolute Reality that has meaning and that has purpose where God is not an abstract principle or a separate being but is rather an integral part of the nature of Physics which is the nature of God It attempts to explain the concepts that have been demonstrated by scientific experimentation in a way to match these observations with that which we have previously assigned to theology and God All incorporated as the nature of existence and as such integral parts of Quantum Physics and Theology Physics is the study of the nature of our spacetime however Quantum Physics describes limits beyond which our science and math have no meaning The physics of spacetime is related to the physics of the finite While our physics can only describe with certainty the nature of spacetime extrapolations can be made as to the nature of the quantum wave as it exists in the infinite Singularity God cannot be separated from the physics for He is the Physics He is the nature and purpose of reality The dual nature of the universe demonstrated in quantum physics describes spacetime as a projection of the quantum probability wave With the actualization of the probability wave into spacetime all that we know is created How is this spacetime created How does the creation of spacetime form the attributes of this universe These are the questions Quantum Physics attempts to answer but more importantly what is the purpose of spacetime and what is the function of conscious beings within that purpose That question has been regulated to philosophy and theology but the answers are demonstrated in physics *What is the Nature of Reality?* IntroBooks Team, In contrast to what is presently imagined reality is the aggregate of everything genuine within a structure The phrase the nature of reality can also refer to an element's ontological condition which indicates its presence The reality in scientific terms is the sum of a phenomenon known and unknown Ontology a prominent field of metaphysics in the Western philosophical background is concerned with philosophical inquiries about the nature of reality and self existence Ontological challenges are also addressed in several disciplines of philosophy such as philosophy of science philosophy of mathematics philosophy of religion and philosophy of logic Perceptions opinions and dispositions toward reality is a common colloquial expression It is frequently used merely as a colloquialism to indicate that the participants in discourse consent

should comply or should not argue about radically divergent views of reality All elements conditions physical and mental happenings past and present and manifestations whether observable or not comprise reality The Nature of Reality Steven E. Kaufman,2023-10-03 What is The Nature of Reality Contrary to what almost all human beings presently believe we do not live in a physical Universe because as The Nature of Reality explains physical reality is just an appearance that is being created by our minds and then superimposed by projection upon the non physical reality that is both actually there and what we really are The problem that arises as a result of believing physical reality to be the reality that is actually there is that that mistaken belief causes physical reality to function like a misperceived reflection to continuously obscure one s own reality from their awareness thereby effectively trapping one s awareness in what is nothing more than a mind generated experiential dream that is neither the reality that is actually there nor the reality that one really is The Nature of Reality was written to provide you with the opportunity to free yourself from that experiential dream and from the suffering being trapped in that dream produces by using fundamental scientific facts to demonstrate that physical reality is not the reality that is actually there where it appears to be so you can rid your mind of the false belief in physical reality that it is inadvertently using to convert physical reality into a delusion that continuously hides from your awareness the non physical reality you really are Whether you know it or not your awareness is presently trapping itself in a mind generated experiential dream as a function of what is nothing more than a mistaken belief The question is Are you ready to loosen your grip on that belief so you can begin to wake up and become aware of the reality you really are *The Atonement: its nature, reality, and efficacy* Daniel Dewar,1860 **Information and the Nature of Reality** Research Professor of Science and Theology Niels Henrik Gregersen,Paul Davies,2014-05-30 From quantum to biological and digital here eminent scientists philosophers and theologians chart various aspects of information The Nature of Deity John Evan Turner,1927 Information and the Nature of Reality P. C. W. Davies,Niels Henrik Gregersen,2010 Many scientists regard mass and energy as the primary currency of nature In recent years however the concept of information has gained importance In this book eminent scientists philosophers and theologians chart various aspects of information from quantum information to biological and digital information in order to understand how nature works Beginning with a historical treatment of the topic the book also examines physical and biological approaches to information and the philosophical theological and ethical implications Summary preceding title page **A Theory of Reality** George Trumbull Ladd,1899 **Religious Pamphlets** ,1898 The Catholic Encyclopedia Charles George Herbermann,Edward Aloysius Pace,1913 *Church Quarterly Review* ,1917 **Studies in Human Nature** Sir James Black Baillie,1921 *The Nature of Reality* Richard Morris,1987 **Contemporary British Philosophy** John Henry Muirhead,Hywel D. Lewis,1925 **The Reality - Fiction Opposition in Children's Literature** Adrian Zagler,2011 Bachelor Thesis from the year 2010 in the subject English Language and Literature Studies Literature grade 1 University of Graz language English abstract Since the 1970s scholarly interest in

children's literature has grown and numerous studies looking into the complexity and thematic and structural depth of the texts have been published. Simultaneously the notion of metareferentiality has sparked interest among scholars from various disciplines. Metareferentiality though not unique to the twentieth and the twenty-first centuries is said to be one of the key cultural phenomena of our time. And yet these two fields of interest namely children's literature and metareferentiality have only very rarely been studied in the same context. Metareferential elements in children's books are often seen as phenomena of dream worlds. Thus they allow a traditional non-critical reading in which the metareferential elements do not necessarily trigger medial awareness in the readers but can be explained logically and within the framework of the represented story worlds. Consequently the epistemological status of reality would not be threatened by these texts. However as this paper aims to prove such a reading for instance of the Alice stories *Die Unendliche Geschichte* and *The Book of Lost Things* although undeniably possible falls short of the true scope of the texts. As will be shown all four books address the question of the status of fiction with reference to its opposition to reality albeit in different ways. In their treatment of the subject they are clearly metafictional texts with epistemological and ontological concerns that require experienced readers to fully grasp their messages. Nevertheless they are still publicly perceived as children's literature and are enjoyed by children and adults alike. After some general remarks on the genre of children's literature and on metareferentiality this paper focuses on a particular form of metareference.
