## **Nature Of The Place:**

Nature, Place, and Story Claire Elizabeth Campbell, 2017-08-09 National historic sites commemorate decisive moments in the making of Canada. But seen through an environmental lens, these sites become artifacts of a bigger story: the occupation and transformation of nature into nation. In an age of pressing discussions about environmental sustainability, there is a growing need to know more about the history of our relationship with the natural world and what lessons these places of public history, regional identity, and national narrative can teach us. *Nature Place and Story* provides new interpretations for five of Canada's largest and most iconic historic sites, two of which are UNESCO World Heritage Sites: L'Anse aux Meadows, Newfoundland; Grand Prêtre, Nova Scotia; Fort William, Ontario; the Forks of the Red River, Manitoba; and the Bar U Ranch, Alberta. At each location, Claire Campbell rewrites public history as environmental history, revealing the country's debt to the power and fragility of the natural world and the relevance of the past to understanding climate change, agricultural sustainability, wilderness protection, urban reclamation, and fossil fuel extraction. From the medieval Atlantic to modern ranchlands, environmental history speaks directly to contemporary questions about the health of Canada's habitat. Bringing together public and environmental history in an entirely new way, *Nature Place and Story* is a lively and ambitious call for a fresh perspective on natural heritage.

**Nature's Place (Routledge Revivals)** William M. Adams, 2014-05-01 Nature conservation has become increasingly important in Britain over the last three decades. This title, first published in 1986, deals with the critical issues surrounding nature conservation and wildlife protection. The book is broad in scope, with a focus on the 1981 Wildlife and Countryside Act and its provisions for the protection of wildlife habitats in Sites of Special Scientific Interest (SSSIs). This follows an historical account of habitat loss over the past 200 years and the origins of conservation and site protection policy. This reissue will be of particular value to professionals, voluntary workers, and students with an interest in the origins, developments, and practice of nature conservation.

*Nature, Place & People: Forging Connections Through Neighbourhood Landscape Design* Puay-yok Tan, Kuei-hsien Liao, Yun Hye Hwang, Vincent Chua, 2018-04-23 Neighbourhood landscapes are the quintessential forms of urban landscapes in most cities worldwide. They are pervasive and hence experienced by the large majority of urban dwellers in their everyday life. More than parks, nature reserves, or nature areas which are visited as destinations, neighbourhood landscapes provide the most immediate, frequent, and convenient form of nature experienced by urban dwellers on a daily basis. They are also valuable as social spaces to bring residents together, foster social ties, and strengthen communities. Despite their importance, surprisingly little has been written to guide the planning and design of neighbourhood landscapes. This book is written for a specific purpose: to illustrate how the design of neighbourhood landscapes helps to deliver more benefits for urban dwellers and, at the same time, protect ecosystems that facilitate human well-being. This is in turn important as the synergistic relationships between human well-being, quality of biophysical urban environment, and health of human environment interactions fundamentally underpin urban sustainability.

The authors emphasize the role neighbourhood landscapes play in forging connections between people and nature people and people and place Most of all the book highlights the role of focusing on people in this endeavour as it is only when landscapes are appropriately designed and when people recognize these benefits that they become valued and protected as a community resource This book is organized into two parts Part 1 focuses on the conceptual foundations that underpin the neighbourhood landscape design guidelines being developed In this section the authors describe the key concepts relating functions of neighbourhood landscapes to the key urban development goals of sustainability liveability and reliance how they can be represented in a framework and how a synthesis of current knowledge of cities as socio ecological systems helps to identify principles that can guide the designing of neighbourhood landscapes Part 2 is more application focused and is centred on neighbourhood landscape design guidelines inspired by the concept of ecosystem services The guidelines consist of design approaches practical strategies design targets and performance monitoring indicators for tracking the performance of neighbourhood landscapes The book is written for readers in academia and design practice and anyone who has a role in shaping neighbourhood landscapes for the benefit of urban dwellers

Building for Life Stephen R. Kellert, 2012-09-26 Sustainable design has made great strides in recent years unfortunately it still falls short of fully integrating nature into our built environment Through a groundbreaking new paradigm of restorative environmental design award winning author Stephen R Kellert proposes a new architectural model of sustainability In Building For Life Kellert examines the fundamental interconnectedness of people and nature and how the loss of this connection results in a diminished quality of life This thoughtful new work illustrates how architects and designers can use simple methods to address our innate needs for contact with nature Through the use of natural lighting ventilation and materials as well as more unexpected methodologies the use of metaphor perspective enticement and symbol architects can greatly enhance our daily lives These design techniques foster intellectual development relaxation and physical and emotional well being In the works of architects like Frank Lloyd Wright Eero Saarinen Cesar Pelli Norman Foster and Michael Hopkins Kellert sees the success of these strategies and presents models for moving forward Ultimately Kellert views our fractured relationship with nature as a design problem rather than an unavoidable aspect of modern life and he proposes many practical and creative solutions for cultivating a more rewarding experience of nature in our built
