**Nature's End** Whitley Strieber,1986      **Nature's End** Whitley Strieber,James W. Kunetka,1987      *European Literature and Theology in the Twentieth Century* David Jasper,Colin Crowder,2009-06-17 The central themes of this collection of essays are the mystery of time past present and future and the problems of redemption They are concerned with modern literature the threat of meaninglessness in the postmodern condition and the possibility of salvation In an age of deferral and difference this book addresses itself to eschatology and apocalypse and redemption in through but particularly of time itself Hell and madness are never far away yet the reconfiguration of time and the breaking in of the transcendent continue to suggest theological possibilities beyond the wastelands of the twentieth century To those possibilities we look in hope      Reading Programs for Young Adults Martha Seif Simpson,2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs      **The Challenges for Russia's Politicized Economic System** Susanne Oxenstierna,2015-04-10 During the early 2000s the market liberalization reforms to the Russian economy begun in the 1990s were consolidated But since the mid 2000s economic policy has moved into a new phase characterized by more state intervention with less efficiency and more structural problems Corruption weak competitiveness heavy dependency on energy exports an unbalanced labour market and unequal regional development are trends that have arisen and which this book argues will worsen unless the government changes direction The book provides an in depth analysis of the current Russian economic system highlighting especially structural and institutional defects and areas where political considerations are causing distortions and puts forward proposals on how the present situation could be remedied      The New Werner Twentieth Century Edition of the Encyclopaedia Britannica ,1906      The Decline of Nature Gilbert F. LaFreniere,2012-07      *On Power: Neurophilosophical Foundations and Policy Implications* Nayef R. F. Al-Rodhan,2022-02-08 *On Power Neurophilosophical Foundations and Policy Implications* seeks to provide a historical contemporary and predictive analysis of power It aims to explain the history of political power in a unique way by approaching the concept of power through the lens of neurophilosophy the application of neuroscientific principles to practical questions of governance ethics political and moral philosophy In this book Professor

Nayef Al Rodhan provides an accessible incisive and provocative take on the history nature and future of power His insights go beyond conventional wisdom by exploring some of the themes that will become increasingly relevant to analysing power in the decades to come A central idea of the book is the highly addictive universal nature of power at the neurochemical level the craving for it and the intense resistance to giving it up in all walks of life and circumstances This can be applied directly to thinking about governance political change public policy national and international peace security and prosperity Al Rodhan formulates an innovative conceptual picture of power by integrating the findings of neuroscience with the broader implications of power in the era of digital connectivity and cognitive and physical enhancement technologies In doing so he guides our approach to political power and public policy influenced by ubiquitous disruptive and intrusive technologies This book will appeal to students and scholars of neuroscience philosophy government business and international relations It will also hold particular interest for politicians public servants think tankers policy makers and journalists as well as senior executives from the corporate sports media and entertainment world

twentieth century     The American Baptist Pulpit at the Beginning of the Twentieth Century Henry Thompson Louthan, 1903

The United States and Germany During the Twentieth Century Christof Mauch, Kiran Klaus Patel, 2010-08-30 The United States and Germany during the Twentieth Century presents a wide ranging comparison of American and German societies during the late 19th and 20th centuries The two countries the world s leading rising powers of the time were both more similar and more different than is widely understood Above all their dual encounter with modernity brings out the richness of both societies as they faced unprecedented internal and external challenges sometimes in isolation but more often in combination or in parallel with one another     **The Twentieth Century** ,1926     **The Age of Capitalism, Consumer Culture, and the Collapse of Nature in the Anthropocene** Jack Thornburg, 2024-10-02 The Age of Capitalism Consumer Culture and the Collapse of Nature in the Anthropocene argues that the stability of post industrial postmodern society is threatened by the convergence of three distinct yet interrelated crises environmental degradation capitalist economic development and the primacy of consumption and self absorption as the basis for economic development at the expense of community and social relationships Jack Thornburg contrasts advanced modern society with indigenous cultures in terms of nature and conceptions of the communal self The complex nature of capitalist oriented society has influenced how individuals conceptualize themselves The outcome the author contends is a competitive society in which individuals are alienated living in uncertain times One consequence of these crises all of which derive from the Enlightenment and the concomitant appearance and evolution of capitalism has been the destruction of a worldview balancing and connecting well being with prosperity of the natural world Money and materialism cannot buy happiness as capitalist narrative asserts Thornburg claims that the happiness sought by individuals seeking meaning through consumption can only be realized by reintegrating nature with the human spirit     **To Kill Another** Graham James McAleer, 2010-01-01 Western theories of law have drifted steadily towards the privatization of homicide Capital punishment is now viewed by many as barbaric even for heinous crimes while a private act of homicide like the increasingly routine starvation of comatose patients is seen by many as a caring gesture both to patient and family This subversion of law is prompted by humanitarian ethics but McAleer argues that humanitarianism is a false friend to those committed to rule of law As a consequence the problem of human vulnerability makes political theology an inescapable consideration for law Drawing upon Thomas Aquinas and Francisco de Vitoria Graham J McAleer asserts that only public authority has the right to intentionally kill Readers will find much to reflect upon in this book which is timely in our twenty first century From start to finish McAleer presents a sustained argument a history of moral ideas and a close reading of a grim subject that is persuasive and compelling     **Environment across Cultures** E. Ehlers, Carl Friedrich Gethmann, 2013-11-11 Disparate perceptions and conceptual frameworks of environment and the relationship between humans and nature often lead to confusion constraints on co operation and collaboration and even conflict when society tries to deal with today s urgent and complex environment research and policy challenges Such disparities in perception and

world view are driven by many factors They include differences in culture religion ethical frameworks scientific methodologies and approaches disciplines political social and philosophical traditions life styles and consumption patterns as well as alternative economic paradigms Distribution of poverty or wealth between north and south may thus be seen as consequence of the above mentioned disparities which is a challenge for it s universal reasoned evaluation This volume discusses a wide range of factors influencing Environment across Cultures with a view to identifying ways and means to better understand reflect and manage such disparities within future global environmental research and policy agendas for bridging the gap between ecology and economy as well as between societies The book is based upon the results of a scientific symposium on this topic and covers the following sections Cross Cultural Perception of Environment Ethics and Nature Environment Sustainability and Society Corresponding contributions were made by well known scientific authors representing different cultural spheres in accordance with the inter cultural approach of this effort
