Mystical nature Is a collection of photographs and poems on and about the magnificence of Nature It is a rhythmic recitation of the beauty and spirituality of the artistry around us I am intrigued by the sensuousness of the creations that surround me It is picture perfect Started clicking photographs and penned a few lines to go with each photograph I had taken It is fascinating to see the sheer magnificence of nature The dawn the dusk silvery moon vibrant flowers mountains valleys colorful songbirds to name a few The gentle breeze the fragrance of freshness vastness and the depth of nature are simply captivating My poems are a note to thank the divine artist His strokes each day are varied bringing hope cheer and freshness to our souls Hope you enjoy reading *Mystical Nature* as much as I enjoyed writing them *A Nature's Mystic Clue* Dwight Goddard, 2013-10 This is a new release of the original 1925 edition ***Nature Magazine***, 1925 An illustrated monthly with popular articles about nature *Nature's Ways* Philip Sutton Chard, 2010-09-30 There are many paths to the sacred whatever you hold that be And the most ancient and primal of these is communion with the natural world If you long to loosen the restraints of your ego experience the spiritual power of the Creation and embrace its timeless wisdom Nature's Ways can be your companion and guide You will learn to cultivate an intimate bond with nature providing a sanctuary from life's tribulations and a spiritual home for sculpting your soul Whether you are a lifelong nature mystic or someone newly drawn to this time honored spiritual path this book will help shepherd you to the mysteries of the Creation including those residing within your own spirit You will discover how to enter nature's spiritual doorways those that transport us to the miraculous power innervating all of existence Therein we discover a clearer sense of who we are why we are and to what we belong The Creation is a long and mystifying journey a great story told through the majesty beauty and creative power of the natural world We can soulfully embrace this journey by following nature's ways ***American Fiction, 1901-1925*** Geoffrey D. Smith, 1997-08-13 A 1997 bibliography of American fiction from 1901-1925 *The Natural Genesis* Gerald Massey, 1883
Nature Mysticism John Edward Mercer, 2019-11-26 In *Nature Mysticism* John Edward Mercer embarks on an intellectual exploration of the profound connections between nature and the human experience The book is characterized by its lyrical prose and philosophical depth weaving together elements of mysticism ecology and spirituality Mercer draws upon a rich tapestry of literary traditions from Romantic poets to contemporary environmental thinkers to illustrate how nature can serve as a conduit for transcendental insights Each chapter invites readers to contemplate their own relationship with the natural world inviting an experiential understanding that transcends mere observation Mercer an accomplished essayist and scholar of comparative literature has spent years studying the intersection of literature and environmental philosophy His background in both Western and Eastern mystical traditions informs his writing allowing him to synthesize complex ideas in a manner that is both accessible and thought provoking This dual perspective has led him to appreciate the timelessness of

nature's influence on human consciousness and the essential role it plays in shaping our spiritual lives For readers seeking a deeper connection with the natural world and a richer understanding of the mystical dimensions of life Nature Mysticism is an essential read Mercer's thoughtful examination challenges us to reconsider our place within the ecosystem inspiring readers not only to reflect on their experiences but also to engage actively with the wonders of the world around them

Holy Clues Stephen Kendrick, 2007-12-18 If God is the greatest mystery of them all then why not in pursuit of God consult the greatest detective of them all In this imaginative and surprisingly profound book Stephen Kendrick reveals Sherlock Holmes as spiritual guide Drawing on the teachings of Christianity Buddhism and Judaism as well as a host of thinkers as varied as Albert Einstein Gandhi and Vincent van Gogh Kendrick explores the stories of Sherlock Holmes and finds remarkably prescient religious insights He shows us the link between careful observation of clues and the Buddhist concept of Bare Attention He illuminates the parallel between the great sleuth's pursuit of justice and God's actions on the scene of the first murder when Cain slew Abel And in the detective's open engaged mind Kendrick finds a model for uniting the principles of science with a sincere spiritual quest The result is a book of inspiration for the modern skeptical searcher and an entertaining work that sheds new light on the methods of the world's greatest detective

The Nature of Order, Book Four: The Luminous Ground Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities The foundations of modern scientific thought are firmly rooted in a conception that the universe is a machinelike entity a play of baubles machines trinkets To this day our real daily experience of ourselves has no clear place in science It is little wonder that a machine like worldview has supported the deadly architecture of the last century This mechanistic thinking and the consequent investment oriented tracts of houses condominiums and offices have dehumanized our cities and our lives How are spirit soul emotion feeling to be introduced into a building or a street or a development project in modern times The Luminous Ground the fourth book of The Nature of Order contains what is perhaps the deepest revelation in the four volume work Here is a geometrical view of space and matter seamlessly connected to our own private personal experience as sentient and knowing creatures This is not merely an emotional appendix to the scientific theory of the other books It is at the core of the entire work and is rooted in the fact that our two sides our analytical thinking selves and our vulnerable emotional personalities as human beings are coterminous They must be harnessed at one and the same time if we are ever to really make sense of what is around us and be able to create a living world Alexander breaks away completely from the one sided mechanical model of buildings or neighbourhoods as mere assemblages of technically generated interchangeable parts He shows us conclusively that a spiritual emotional and personal basis must underlie every act of building His buildings and works of art demonstrate in detail what he means And then in the middle of the book comes the linchpin of the work a one hundred page chapter on colour which lavishly illustrates and dramatically conveys the way that consciousness and spirit can make their appearance in the world Altogether present throughout this fourth and final book is a new cosmology uniting matter and consciousness consciousness inextricably joined to the substrate of matter present in all matter and providing all wholeness with its material cognitive and spiritual underpinnings This view though radical conforms to our most ordinary daily intuitions It may provide a path for those contemporary scientists who are beginning to see consciousness as the underpinning of all matter and thus as a proper object of scientific study Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the

feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united The Nature of Order constitutes the backbone of Building Beauty Ecologic Design Construction Process an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world The 15 fundamental properties of life guide our work and have given us much more than a set of solutions The Nature of Order has given us the framework in which we can search and build up our own solutions In order to be authentically sustainable buildings and places have to be cared for and loved over generations Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time Beauty is therefore not a luxury or an option it includes and transcends technological innovation and is a necessary requirement for a truly sustainable culture
