Vedic Sanatan religion are not orthodox as propagated by some rationalists but are full of scientific knowledge and wisdom that have helped preserve nature and society until recent times But both of these are now deteriorating very quickly The concept of all pervading BRAHMAN in the Vedic Sanatan religion is quite similar to the concept of the Quantum Field of Energy in modern science as both are formless infinite and omnipresent There are many similar scientific connotations in the tenets and rites of the religion Furthermore if some elements of nature such as wells rivers and plants trees are regarded as deities and worshipped it is not orthodoxy but helps create strong social awareness for the protection of nature through religion If people worship something they will not destroy it it is a simple psyche No such awareness exists anywhere in the modern scientific world and the result is severe degradation of water and forest resources these days Can rationalists understand such underlying philosophies in religious rites and customs So this book is a must read for nature lovers to understand how ancient science in the Vedic Sanatan religion helped protect our environment which is now falling apart at an alarming rate *Outfoxed* R.J.
