**Environmental Law of Armed Conflict** Nada Al-Duaij, 2021-10-25 This timely study examines how the environmental impact of modern warfare violates fundamental principles of international environmental and humanitarian laws and why these considerations need to be included in rules of armed conflict If direct attacks on innocent civilians are universally recognized as unacceptable then environmental devastation of their habitat by acts of war must also be recognized as an unacceptable consequence of armed conflict The author presents the case that the international community understand its responsibility to curb environmental consequences of modern weaponry and incorporate

environmental concerns into the conventions regulating armed conflict Published under the Transnational Publishers imprint

The Concept of an International Organization in International Law Lorenzo Gasbarri, 2021-04-08 Despite their exponential growth in number and activities there is not an established legal concept of an international organization This book tackles the topic by examining the nature of the legal systems developed by international organizations It is the first comprehensive study of the concepts by which international organizations legal systems are commonly understood functionalism constitutionalism exceptionalism and informalism Its purpose is threefold to trace the historical origins of the different concepts of an international organization to describe four groups under which these different notions can be aligned and to propose a theory which defines international organizations as dual entities The concept of an international organization is defined by looking at the nature of the legal systems they develop The notion of dual legal nature describes how organizations create particular legal systems that derive from international law This situation affects the law they produce which is international and internal at the same time The effects of the dual legal nature are considered by analysing international responsibility the law of treaties and the validity of organizations acts

*Fragmentation and the International Relations of Micro-states* Jorri Duursma, 1996-10-31 At a time when nearly all armed conflicts are related to self determination and frequently to claims for secession this meticulous study examines the legal
