Slavery and the Making of Early American Libraries Sean D. Moore,2019-02-07 Early American libraries stood at the nexus of two transatlantic branches of commerce the book trade and the slave trade Slavery and the Making of Early American Libraries bridges the study of these trades by demonstrating how Americans profits from slavery were reinvested in imported British books and providing evidence that the colonial book market was shaped in part by the demand of slave owners for metropolitan cultural capital Drawing on recent scholarship that shows how participation in London cultural life was very expensive in the eighteenth century as well as evidence that enslavers were therefore some of the few early Americans who could afford to import British cultural products the volume merges the fields of the history of the book Atlantic studies and the study of race arguing that the empire wide circulation of British books was underwritten by the labour of the African diaspora The volume is the first in early American and eighteenth century British studies to fuse our growing understanding of the material culture of the transatlantic text with our awareness of slavery as an economic and philanthropic basis for the production and consumption of knowledge In studying the American dissemination of works of British literature and political thought it claims that Americans were seeking out the forms of citizenship constitutional traditions and rights that were the signature of that British identity Even though they were purchasing the sovereignty of Anglo Americans at the expense of African Americans through these books however some colonials were also making the case for the abolition of slavery

and results oriented plan for achieving the best results from staff members through a coaching style of management The Popular Book James David Hart, **Visualizing Law and Authority** Leif Dahlberg, 2012-12-06 The volume *Visualizing Law and Authority: Essays on Legal Aesthetics* brings together revised papers from the international conference *Law and the Image* held in Stockholm 24-25 September 2010. The participants/contributors belong to the disciplines of Art history, Cultural studies, Literary and Media studies, and Law. The contributions discuss the complex relations between law, media, and visual phenomena. The common theme of the essays consists in an examination of the scopic field and of regimes of visibility in phenomenological terms, arguing that law constitutes a cognitive and aesthetic field of normative world-making. Rather than merely inverting Shelley's dictum that the poets are the unacknowledged legislators of the world, the essays argue in different ways for the necessity to develop a legal aesthetics. The most immediate way of pursuing such a legal aesthetics consists in examining law itself as an aesthetic object: for instance, the power of law to produce icons in the sense of unreadable texts or textiles. Martin Kayman, Gary Watt. Several essays focus on the way that visual art and media can be used to constitute and represent political power, but also to question it and to put it into question. Chiara Battisti, Leif Dahlberg, Elina Druker, Sidia Fiorato, Paul Raffield. Other essays investigate legal structures inherent in the artwork and the artworld itself. Ari Hirvonen, Max Liljefors, Christine Poggi, Karen Margrethe Simonsen. Finally, there are two essays focusing on the use of images and imagery in the legal process, explicitly arguing for the need of a legal aesthetics. Daniela Carpi, Richard Sherwin. Although diverse, the individual essays are interconnected with each other in fruitful and critical ways, making both explicit and implicit references to each other. *I, Horatio* Donald A. Tortorice, 2014-08-12 This book is the first presentation of the life of Horatio Nelson to be narrated in the first person: a recounting of his life in his own words. It begins with Nelson as a young 21-year-old captain in the Caribbean and goes to his death at the Battle of Trafalgar. Along the way, his experiences in carrying out the vision of his duty in the Caribbean, Corsica, Tenerife, the Battle of Cape St. Vincent, the Nile, Copenhagen, and Trafalgar cost him his eye, his right arm, and ultimately his life, all because he was blessed and cursed with a nature that was blind to the spectre of failure and deaf to anything other than the call of duty, the clamour of battle, and victory. He was also a mortal man whose attraction to women brought pleasure, frustration, infatuation, and ultimately lifelong satisfaction. This is his story as he would tell it. **A Cultural History of the Sea in the Global Age** Franziska Torma, 2023-02-09 In 1972 an image became an icon: Blue Marble, a photograph of the Earth as seen from outer space. The picture features prominently the globe's water-covered surface. The ocean connects nature and culture in the modern world. Within the time span of 100 years, the sea changed its cultural meaning from a dangerous place to an endangered environment. This volume traces diverse processes of oceanic transformation in the Anthropocene: it follows scientists, seafarers, diplomats, and filmmakers from ship decks to the arenas of political decision-making on land. The essays lead from underwater dumping grounds to islands in the South Pacific. Tiny organisms like plankton and charismatic megafauna like whales accompanied the human voyages. The

presence of the animals challenges common notions of human culture The global age has to take non human agents into account to fully understand the cultural history of the seas

A Cultural History of the Sea in the Age of Empire Margaret Cohen, 2023-02-09 Across the 19th century maritime globalization expanded at a hitherto unimaginable pace transforming transport and communications over the seas into oceanic networks at a planetary scale These networks shaped culture in its most expansive sense affecting seafaring warfare empire commerce communications passenger travel leisure and science Authors recover the sea experience of people and groups entangled with and yet neglected in an earlier generation of maritime history focused on conquest empire and knowledge Thus across a century when Britannia nominally ruled the waves military control emerges as both opportunistic harboring slavers as well as partial giving agency to mutineers and

enslaved crew members including on the Royal Navy's own fleet the wreck of Arctic exploring voyages such as the Erebus and the Terror takes readers to PanInuit exploration over sea ice around the Arctic circle colonial and mercantile transport in the Indian Ocean reveals the role of lascars the seafarers of color who for centuries had practiced these waters on the coasts of industrial nations the professional establishment of marine sciences depends on the pathbreaking contributions of female amateur naturalists As part of its revisionary aim this volume gives voice to the physical environment Thus we discover contrasting perspectives about this environment under threat today of European mariners for whom it was deadly and treacherous and for maritime Aborigines who lived in its shelter Considering literature and art as well as history authors further trace how the paradoxes of sea practice shape some of the most memorable ocean fantasies of the Western tradition fostering both a celebration of work and technology and a preservation of secular magic in a disenchanted world
