War at Sea in the Middle Ages and the Renaissance John B. Hattendorf, Richard W. Unger, 2003 Wide ranging in place and time yet tightly focused on particular concerns, these new and original specialist articles show how observations on the early history of warfare based on the relatively stable conditions of the late seventeenth century ignore the realities of war at sea in the middle ages and renaissance. In these studies, naval historians firmly grounded in the best current understanding of the period take account of developments in ships, guns and the language of public policy on war at sea, and in so doing give a stimulating introduction to five hundred years of maritime violence in Europe. Latané, 1927 Maritime Strategy for Medium Powers Rear Admiral J.R. Hill, 2021-05-30 This book first published in 1986 argues that there is a special category of medium powers in the world such as Britain, France, India, Brazil, Japan, China and others which have sufficient military power to do something to protect their interests but which are not a match for the superpowers. It surveys the whole range of naval warfare, equipment, operations, organisation and deployment, and discusses how each item should be tailored by the recognition of the position of the medium power. It considers alliances a key element for medium powers and explores how these should be handled and what use they may be expected to fulfil. The book argues that the concept of medium power here developed thoroughly for the first time will be extremely useful to many countries in defining their strategic role in a purposeful way. **Naval Constabulary Operations and Fisheries Governance** Sean A.

G. Andrews, 2024-05-07 This book offers an analysis of naval constabulary operations in particular Australian fisheries patrols and challenges the widely accepted Anglo-American school of maritime thought. In the Indo-Pacific, fisheries and the activities of fishing boats are of increasing strategic importance in Australia's region. Australia's Four Oceans. Issues of overfishing, population growth and climate change are placing growing pressure on fish as a resource, and in doing so are making fisheries more significant and significant on a strategic as opposed to simply an economic or environmental level. When combined with the growing use of fishing vessels as para-naval forces, it is clear that the activities of fishing vessels, whether

fishing or not fishing are matters of considerable strategic relevance This book illuminates contemporary seapower challenges explains and defines maritime security and examines and refines existing theory to advance a set of new or refined concepts to help frame the on water activities of constabulary operations reducing the possibility of on water miscalculation between states This book will be of much interest to students and scholars of naval studies and sea power maritime strategy maritime security and International Relations
