Navigation Dictionary:

Navigation Dictionary U S Naval Oceanographic Office, United States, 2002-12 Navigation is essentially an applied science and touches many other fields borrowing copiously from their terminology. If terms relating primarily to such branches of science as astronomy, cartography, electronics, mathematics, meteorology, oceanography, surveying, etc. are found in these pages, it is because the navigator's sphere of interest overlaps these fields. An attempt has been made to define such terms in the language and from the viewpoint of the navigator. Only those meanings more or less directly related to navigation have been included.

Foreign-language and English Dictionaries in the Physical Sciences and Engineering Tibor W. Marton, 1964. The bibliography lists over 2800 unilingual, bilingual, and polyglot dictionaries, glossaries, and encyclopedias in the physical sciences, engineering, and technology published during the past twelve years. The majority of the titles cited have English as the source or target language, or are dictionaries giving definitions in English. The bibliographic entries are arranged in 49 subject classes; within each subject, the entries are listed alphabetically by language, and within each language group by author. Forty-seven foreign languages are represented in the compilation. Lists of abbreviations and reference sources, and detailed author, language, and subject indexes complement the publication.
