American countries against Reynolds Tobacco for laundering heroin and cocaine profits with Camel Cigarettes Thinking about Terrorism Michael E. Tigar, 2007 Written by one of the top trial lawyers alive today this is Michael Tigar's look at how government through history has responded to terrorism with an analysis of our own government's response to the attacks of 9/11 particularly in regard to our own civil liberties When does safety at any cost undermine the very basis for our republic This book is a must read for anyone concerned with the state of our civil liberties today **Why "Good Kids" Turn into Deadly Terrorists** Alice LoCicero, 2014-07-29 Using psychological theory and the author's direct experience working with at risk youth this book answers the questions on the minds of anyone shocked and appalled by the events of the Boston Marathon bombings The shock of the 2013 Boston Marathon bombings was soon followed by a revelation initially disturbing and mystifying two apparently unremarkable brothers one a teenager the other a young adult both well liked immigrants and longtime U.S. residents had allegedly triggered the bombs Why were these two seemingly normal individuals driven to commit such acts of coldblooded violence This book examines not only the lives motivations and key influences of these infamous brothers but those of other young unexpected terrorists worldwide comparing factors that contributed to their decisions to become terrorists and identifying methods used to recruit them into that deadly fold The chapters teach readers warning signs that youths are being drawn in to terrorism and serve to spur meaningful conversations among citizens politicians and policymakers about what we can do to prevent such recruitment of youths and young adults including other U.S. residents who might consider emulating the Tsarnaev brothers The book also addresses larger related questions such as whether humans are naturally violent who benefits when young individuals engage in terrorism and why minors are recruited to become killers **The Human Radiation Experiments** Advisory Committee on Human Radiation Experiments, 1996-06-06 This book describes in fascinating detail the variety of experiments sponsored by the U.S. government in which human subjects were exposed to radiation often without their knowledge or consent Based on a review of hundreds of thousands of heretofore unavailable or classified documents this Report tells a gripping story of the intricate relationship between science and the state Under the thick veil of government secrecy researchers conducted experiments that ranged from the mundane to such egregious violations as administering radioactive tracers to mentally retarded teenagers injecting plutonium into hospital patients and intentionally releasing radiation into the environment This volume concludes with a discussion of the Committee's key findings and guidelines for changes in institutional review boards ethics rules and policies and balancing national security interests with individual rights Ethicists public health professionals and those interested in the history of medicine and Cold War history will be intrigued by the findings of this landmark report Terror in the Land of the Holy Spirit Virginia Garrard-Burnett, 2010-01-15 Waging a counterinsurgency war and justified by claims of an agreement between Guatemala and God Guatemala's Evangelical Protestant military dictator General Ríos Montt incited a Mayan holocaust over just 17 months some 86 000 mostly Mayan civilians were murdered Virginia Garrard

Burnett dives into the horrifying bewildering murk of this episode the Western hemisphere's worst twentieth century human rights atrocity She has delivered the most lucid historical account and analysis we yet possess of what happened and how of the cultural complexities personalities and local and international politics that made this tragedy Garrard Burnett asks the hard questions and never flinches from the least comforting answers Beautifully movingly and clearly written and argued this is a necessary and indispensable book Francisco Goldman author of *The Art of Political Murder Who Killed the Bishop* Virginia Garrard Burnett's *Terror in the Land of the Holy Spirit* is impressively researched and argued providing the first full examination of the religious dimensions of la violencia a period of extreme political repression that overwhelmed Guatemala in the 1980s Garrard Burnett excavates the myriad ways Christian evangelical imagery and ideals saturated political and ethical discourse that scholars usually treat as secular This book is one of the finest contributions to our understanding of the violence of the late Cold War period not just in Guatemala but throughout Latin America Greg Grandin Professor of History New York University Drawing on newly available primary sources including guerrilla documents evangelical pamphlets speech transcripts and declassified US government records Virginia Garrard Burnett provides a fine grained picture of what happened during the rule of Guatemalan president by coup Efraín Ríos Montt She suggests that three decades of war engendered an ideology of violence that cut not only vertically but also horizontally across class cultures communities religions and even families The book examines the causality and effects of the ideology of violence but it also explores the long duration of Guatemalan history between 1954 and the late 1970s that made such an ideology possible More significantly she contends that self interest willful ignorance and distraction permitted the human rights tragedies within Guatemala to take place without challenge from the outside world
