The Big Empty R. Douglas Hurt, 2011-09 The Great Plains known for grasslands that stretch to the horizon is a difficult region to define Some classify it as the region beginning in the east at the ninety eighth or one hundredth meridian Others identify the eastern boundary with annual precipitation lines soil composition or length of the grass In *The Big Empty* leading historian R Douglas Hurt defines this region using the towns and cities Denver Lincoln and Fort Worth that made a difference in the history of the environment politics and agriculture of the Great Plains Using the voices of women homesteaders agrarian socialists Jewish farmers Mexican meatpackers New Dealers and Native Americans this book creates a sweeping survey of contested race relations radical politics and agricultural prosperity and decline during the twentieth century This narrative shows that even though Great Plains history is fraught with personal and group tensions violence and distress the twentieth century also brought about compelling social economic and political change The only book of its kind this account will be of interest to historians studying the region and to anyone inspired by the story of the men and women who found an opportunity for a better life in the Great Plains

"Everybody's Paid But the Teacher" Patricia Anne Carter, 2002 Presenting a comprehensive look at twentieth century collaborations between female teachers and the women s movement this volume highlights the feminist ideologies strategies and rationales

pursued by teachers in search of better workplaces Carter chronicles the evolution of rights for female teachers covering such important social and economic topics as suffrage equal pay for equal work the right to marry and take maternity leaves access to administrative positions the right to lobby and bargain collectively and the right to participate in political and social reform movements outside the workplace A vivid account of the leadership roles teachers played in the women s movement this book clarifies the importance of feminist ideologies in shaping the strategies and rationales educators used to transform their profession This book is a bold contribution to the history of working women Handbook of Research on Educational Leadership for Equity and Diversity Linda C. Tillman, James Joseph Scheurich, 2013-08-21 The rapid growth of diversity within U S schooling and the heightened attention to the lack of equity in student achievement school completion and postsecondary attendance has made equity and diversity two of the principle issues in education educational leadership and educational leadership research The Handbook of Research on Educational Leadership for Equity and Diversity is the first research based handbook that comprehensively addresses the broad diversity in U S schools by race ethnicity culture language gender disability sexual identity and class The Handbook both highly values the critically important strengths and assets that diversity brings to the United States and its schools yet at the same time candidly critiques the destructive deficit thinking biases and prejudices that undermine school success for many groups of students Well known chapter authors explore diversity and related inequities in schools and the achievement problems these issues present to school leaders Each chapter reviews theoretical and empirical evidence of these inequities and provides research based recommendations for practice and for future research Celebrating the broad diversity in U S schools the Handbook of Research on Educational Leadership for Equity and Diversity critiques the inequities connected to that diversity and provides evidence based practices to promote student success for all children **Destined to Rule the Schools** Jackie M. Blount, 1998-03-19 Winner of the 1998 American Educational Studies Association Critics Choice Titles In 1909 when she became the superintendent of the Chicago schools Ella Flagg Young proclaimed that women were destined to rule the schools of every city After all women accounted for nearly eighty percent of all teachers by 1910 and their ascendance into formal school leadership positions could not be far behind After World War II however a backlash against single women educators and a rigid realignment of gender roles in schools contributed to a rapid decline of women school administrators across the country a decline from which there has been little recovery to the present Destined to Rule the Schools tells the story of women and school leadership in America from the common school era to the present In a broad sense it offers an historical account of how teaching became women s work and the school superintendency men s Blount explores how power in school employment has been structured unequally by gender It focuses on the superintendency because an important component of the effort to establish control of schools has occurred in contesting the definition of this position Unique and important contributions of this volume include the only published comprehensive statistical study describing the number of women superintendents throughout the twentieth

century an analysis suggesting that the superintendency may have become an appointive position in part to remove it from the influence of newly enfranchised women voters a discussion of the role of homophobia in creating and perpetuating rigid gender divisions in school employment and a broad analysis that integrates the histories of teaching and school administration

Torches of Light Ann Short Chirhart, 2005 As turbulent social and economic changes swept the South in the first half of the twentieth century education became the flashpoint Ann Short Chirhart's study is the first to analyze such modernizing events in Georgia She shows how these changes affected the creation of the state's public school system and cast its teachers in a crucial role as mediators between transformation and tradition Depicting Georgia's steps toward modernity through teachers professional and cultural work and the educational reforms they advocated Chirhart presents a unique perspective on the convergence of voices across the state calling for reform or continuity secularism or theology equality or enforced norms consumption or self reliance Although most teachers black and white shared backgrounds rooted in localism and evangelical Protestantism attitudes about race and gender kept them apart African American teachers individually and

collectively redefined traditional beliefs to buttress ideals of racial uplift and to press for equal access to public services. White women adapted similar beliefs in different ways to enhance their efforts to train greater numbers of white students for professional and wage labor. *Torches of Light* is based on such sources as government archives, manuscript collections, and interviews with teachers. As Chirhart examines the ideas over which Georgians clashed, she also shows how those ideas were embodied in New Deal and U.S. Department of Agriculture programs, the political activities of the black Georgia Teachers and Educators Association, and the Georgia legislature's 1949 Minimum Foundation Act. Through two world wars and the Great Depression, teachers sought to reconcile clashing beliefs, not only to renegotiate class, race, and gender roles but also to enhance their own professionalism and authority.

Governor Lady by Teva J. Scheer, 2005-12-14

Governor Lady is the fascinating story of one of the most famous political women of her generation. Nellie Tayloe Ross was elected governor of Wyoming in 1924, just four years after American women won the vote, and she went on to be nominated for U.S. vice president in 1928, named vice chairman of the Democratic National Committee the same year, and appointed the first female director of the Mint in 1932. Ross launched her career when her husband, William Bradford Ross, the preceding governor, died, leaving her widowed with four sons and no means of supporting them. She was an ironic choice to be such a pioneer in women's rights since she claimed her entire life that she had no interest in feminism. Nevertheless, she believed in equal opportunity and advancement in merit, irrespective of gender, core feminist values. The dichotomy between Ross's career and life choices and her stated priorities of wife and mother is a critical contradiction, making her an intriguing woman. Exhaustively researched and powerfully written, *Governor Lady* chronicles the challenges and barriers that a woman with no job experience, higher education, or training faced on the way to becoming a confident and effective public administrator. In addition to the discrimination and resentment she faced from some of her male associates, she also aroused the enmity of Eleanor Roosevelt, whom she displaced at the DNC. Born exactly one hundred years after the signing of the Declaration of Independence, Ross lived to celebrate the nation's bicentennial, so her long and remarkable life precisely spanned the second U.S. century. She was reared in the Victorian era when upper and middle class women were expected to be domestic, decorative, and submissive, but she died as the women's movement was creating a multitude of opportunities for young women of the 1970s. Nellie's story will be of great interest to anyone curious about women's history and biography. The contemporary American career woman will especially identify with Ross's struggle to balance her career, family, and active personal life.

Twenty Thousand Roads by Virginia Scharff, 2003

Virginia Scharff's wonderfully readable account of women in motion complicates and enriches our understanding of the nineteenth and twentieth centuries. West's gendered remapping of the regional landscape explodes traditional notions of western movement. All students of women and gender, travel, and place, the West, and America would do well to read this excellent book. David M. Wrobel, author of *Promised Lands*, *Promotion Memory*, and *The Creation of the American West*. Virginia Scharff claims for women what has long been central to the masculine mythology of

the West free movement and its many gifts real and imagined Her book is as exhilarating and as intellectually and emotionally expansive as our enduring dream of flight across the American land Elliott West author of *The Contested Plains* Indians Goldseekers the Rush to Colorado Brilliant is not a word that is often a part of my critical vocabulary but brilliantly is how *Twenty Thousand Roads* begins When writing of Sacagawea and Susan Magoffin Virginia Scharff shows vividly how a single life can be a source of sophisticated cultural analysis without becoming an academic artifact or an object of condescension Richard White author of *It's Your Misfortune and None of My Own* A New History of the American West
