The 21st-Century Elementary School Library Program Carl A. Harvey II, 2016-12-05. Compact yet remarkably comprehensive, this book covers all the major aspects of school library services from administration to instruction, focused from the elementary school librarian perspective, now updated and expanded to include the latest developments in makerspaces, the Common Core, social networking, and eBooks. How do you accomplish a technology transformation at a time when budgets are extremely limited? What is the proper location for web-based social networking in the school library? What are the best practices for working together with students, parents, and educators? The 21st Century Elementary School Library Program: Managing for Results is an invaluable resource for answers to these and many more questions, as it brings together in one volume the advice and insights you need to bring your library into the new century. This invaluable guide provides tips and techniques, forms and templates, and advice on everything from staffing and budgeting to collaborating with teachers and other libraries, to Web 2.0 and other new computer tools for building collections and devising special programs. Whether you are just getting started or are a library veteran seeking effective program renewal, this book belongs on your shelf.

Proceedings of the 2nd UPY International Conference on Education and Social Science (UPINCESS 2023) Ari Kusuma Wardana, 2023-12-31. This is an open access book. Technology has had a huge impact on education and social dynamics around the world. Since the introduction of information and communication technologies (ICTs) such as the internet, smartphones, and social media, much has changed in the way we learn and interact with others. In education, technology has enabled students and teachers to access more diverse and engaging educational resources. With internet access, students and teachers can access educational resources from all over the world and learn about various topics and disciplines. In addition, technology also enables distance learning, which allows students and teachers to connect from different locations. However, there are also negative impacts of using technology in education. For example, excessive use of social media and the internet can cause concentration disorders and addiction in students. In addition, too much reliance on technology can also reduce students' ability to think critically and solve problems independently. In social dynamics, technology has allowed us to connect with people from all over the world and paved the way for greater collaboration and cultural exchange. However, technology has also brought negative impacts on social dynamics, such as the spread of fake news or hoaxes, cyberbullying, and social media addiction. In this regard, technology can be a very useful tool if used wisely and with proper understanding of its impact. Therefore, to support this Universitas

PGRI Yogyakarta was hold an international conference and Call for Papers The 2nd UPY International Conference on Education and Social Science UPINCESS The Impact of Technology on Education and Social Dynamics on September 27 2023 The conference aims to discuss in depth about the impact of technology on education and social dynamics as well as finding appropriate solutions and strategies to minimize its negative impact and maximize its benefits Experts researchers and practitioners in the field of education and technology from around the world can share their knowledge and experience in this conference and can encourage collaboration and innovation in this field
