Boshuizen, Rainer Bromme, Hans Gruber, 2006-04-11 About the Book Series The idea for the Book Series Innovation and Change in Professional Education ICPE was born in 1996 While working on another publication in this area we noticed that professional educators faced similar problems without even knowing from each other It was this observation that resulted in examining the possibilities for a new publication platform about professional education with input from different professions We wanted to develop a publication source that would bring together educators and researchers to exchange ideas and knowledge about theory research and professional practice But we were not only striving for a book series informing readers about important themes in the professions A second goal was to focus on processes of change and innovation We were heavily involved in innovations going on in our institutions and were convinced that a better understanding was needed in a wide range of issues critically important to the future of professional education It was our belief that scholarly publications about innovation processes may support fundamental change in professional education ICPE reflects our view that professional education deserves such a publication platform It aims to approach critical questions of educational innovations and to examine dynamics of educational change in various professional domains in the context of innovation processes The books will include contributions from frontline practitioners leading researchers or distinguished scholars in professional education delivering reports of empirical or theoretical research reviews interpretations of evaluation studies or descriptions of innovative approaches *Mentor Development for Teacher Training* Anne Punter, 2007 The 34 scenarios that make up this book are based upon real life teacher trainee issues They are designed to stimulate analysis of those issues to help the formulation of possible approaches to deal with them and to promote reflection on the role of the mentor as a practitioner advisor critical friend and assessor There is no single solution to each issue but the material prompts an in depth discussion of what the issues are and a consideration of how to manage the complex set of factors towards a resolution A Practicum Turn in Teacher Education Matts Mattsson, Tor Vidar Eilertsen, Doreen

Rorrison,2012-01-01 Challenges to practicum The authors have explored professional practice knowledge and the ways practicum is dealt with in teacher education They report from Research and Development projects based on collaboration between universities and school communities Empirical studies have been carried out in Australia Canada China Denmark Finland Norway and Sweden Communication about practicum is reframed Preservice teachers experiences during practicum serve as a point of departure for improving teacher education The book is a must for everyone committed to quality in initial teacher education including preservice teachers school leaders and local supervisors This volume explores new and different ways to think about the construction and evaluation of the practicum that students encounter Contributors ask the reader to consider the assumptions that the practicum is based on question these assumptions and strive to find new and better ways to contribute to the autonomy professionalism and moral development of emerging teachers The focus is clearly on creating conversational and learning spaces for students that encourage them to think explicitly about theory and its application to practice and vice versa The book not only challenges our thinking but also provides rich examples of research and evaluation in this area which help us to hear the voices of those involved in the practicum in fresh and insightful ways Reflections by Roslin Brennan Kemmis Head of the School of Education Charles Sturt University Wagga Wagga Australia *Beginning Teaching* Sandy Schuck,Peter Aubusson,John Buchanan,Tom Russell,2012-02-28 The experiences of the first years of new teachers professional lives are critical to their decisions about embracing or leaving the teaching profession Writ large these experiences have the potential to either underpin or undermine the growth and development of the teaching profession This book offers a research based account of beginning teachers experiences told from their own perspectives and often in their own words Beginning Teaching Stories from the Classroom provides valuable source material to inform teacher education practices The authors draw on more than 20 years of research on the professional learning retention and attrition of beginning teachers to provide evocative illustrations of the challenges and successes that occur in the early years of teaching The compelling and coherent narratives will appeal not only to student and graduate teachers but also to program designers coaches and senior managers in schools Above all the book speaks to teacher educators in the hope that the experiences discussed here will suggest ways of supporting student teachers to grow and flourish once they launch their careers in the profession These evocative stories express beginning teachers anguish and elation and also provide testimony to their resilience and perseverance in an altruistic profession The analysis and interpretation of their stories will challenge and uplift inspire and shame give cause for celebration and melancholy generate empathy and provoke introspection Above all else these stories call for change Rethinking Educational Practice Through Reflexive Inquiry Nicole Mockler,Judyth Sachs,2011-04-13 Susan Groundwater Smith is one of the most influential voices in the world of educational practitioner inquiry The convener in Australia of the Coalition of Knowledge Building Schools she is a staunch advocate of innovative methods of practitioner inquiry with a particular emphasis upon student voice and the use of images in capturing young

people's perspectives on their learning experience. So it is more than fitting that this unique text on practitioner inquiry and teacher professional learning is dedicated to her. *Rethinking Education Practice Through Reflexive Inquiry* is a compilation of essays that explore contemporary issues in practitioner inquiry and action research from the perspective of both university-based and school-based authors. The essays discuss the practical, political, and theoretical dimensions of practitioner inquiry, advancing the argument that the adoption of an inquiring approach to practice is both an integral dimension of teachers' work in the modern school as well as critical to effective and authentic professional learning. And the essays draw on the work of Groundwater Smith to demonstrate the benefits brought to bear on schools, teachers, and learners when the complex nature of the relationship between inquiry and practice is understood and acted upon in pursuit of democratic knowledge interests.

The Routledge Doctoral Student's Companion Pat Thomson, Melanie Walker, 2010-04-07 This book addresses a set of interlocking and overlapping big questions that sit behind the plethora of doctoral advice texts and run through the practice of knowledge identity work.

The Magic Key Ruth Enid Zambrana, Sylvia Hurtado, 2015-10-15 Mexican Americans comprise the largest subgroup of Latinas/os and their path to education can be a difficult one. Yet just as this group is often marginalized so are their stories, and relatively few studies have chronicled the educational trajectory of Mexican American men and women. In this interdisciplinary collection, editors Zambrana and Hurtado have brought together research studies that reveal new ways to understand how and why members of this subgroup have succeeded and how the facilitators of success in higher education have changed or remained the same. The Magic Key's four sections explain the context of Mexican American higher education issues, provide conceptual understandings, explore contemporary college experiences, and offer implications for educational policy and future practices. Using historical and contemporary data as well as new conceptual apparatuses, the authors in this collection create a comparative, nuanced approach that brings Mexican Americans' lived experiences into the dominant discourse of social science and education. This diverse set of studies presents both quantitative and qualitative data by gender to examine trends of generations of Mexican American college students, provides information on perceptions of welcoming university climates, and proffers insights on emergent issues in the field of higher education for this population. Professors and students across disciplines will find this volume indispensable for its insights on the Mexican American educational experience, both past and present.
