Ward,Sara Delamont,2020-08-28 This updated second edition unpacks the discussions surrounding the finest qualitative methods used in contemporary educational research Bringing together scholars from around the world this Handbook offers sophisticated insights into the theories and disciplinary approaches to qualitative study and the processes of data collection analysis and representation offering fresh ideas to inspire and re invigorate researchers in educational research **Political Correctness and Higher Education** John Lea,2010-05-26 How many times have you heard the phrase it s all political correctness gone mad Do you ever wonder whether colleges and universities are really awash with trivial concerns about the use of language or whether they are actually trying to address serious concerns about discrimination and harassment Have you ever wanted to get to the bottom of what all the fuss is about This book is the first major study of political correctness in post compulsory education to be published in the UK For readers in the UK unfamiliar with the nature of the controversies in US college campuses this book offers a comprehensive

assessment of the key themes including who and what was behind key campaigns For readers in the US unfamiliar with how this cultural export has fared in the UK this book looks at the significant similarities and differences in the ways that the phrase has been used in both societies Apart from addressing the roots of political correctness the book seeks to show how the phrase has helped to complicate the traditional boundaries between those on the political Left and those on the political Right The book also demonstrates in clear terms how the phrase is integral to understanding key themes in cultural theory such as postmodernism and identity politics This book is intended to be of interest to a number of readers Teachers working in colleges and universities Teacher educators and student teachers working on programmes of initial teacher education Students studying undergraduate programmes in comparative politics and or sociology and cultural studies Finally the book will seek to capture the reflections of prominent academics and educationalists on both sides of the Atlantic who have worked in environments where the phrase has impinged on aspects of their work over the last twenty five years If you think that political correctness simply amounts to what jokes you are allowed to tell in a classroom hopefully this book will challenge you to think again A Curriculum for Social Justice Liz Atkins,Louise Misselke,Jeanette Hart,Sue

Lambeth,Lorraine Barker,2023-11-26 This book reports the outcomes of a research project which involved developing and implementing a research informed curriculum for low attaining further education students Key aims of the curriculum were to ameliorate some of the social and educational disadvantages faced by the students and to support secure and sustainable transitions to employment or further education The book begins by outlining the characteristics of the lowest attaining young people and considering the challenges they face Subsequent chapters describe the educational and geographic contexts the curriculum and the pedagogical approaches adopted It moves on to describe the outcomes of the project drawing on narratives of individual students and staff to illustrate the benefits of a broader curriculum which acknowledges earlier disadvantage The book concludes with a discussion of how the curriculum could be adapted in different contexts and considers the implications of such change in terms of policy practice future research and social justice The University of Google Tara Brabazon,2016-02-17 Looking at schools and universities it is difficult to pinpoint when education teaching and learning started to haemorrhage purpose aspiration and function Libraries and librarians have been starved of funding Teachers cram their curriculum with skill development and generic competencies because knowledge creativity and originality are too expensive to provide to unmotivated students and parents obsessed with league tables not learning Meanwhile the internet offers a glut of information on everything under the sun a mere mouse click away Bored surfers fill their cursors and minds with irrelevancies We lose the capacity to sift discard and judge Information is no longer for social good but for sale Tara Brabazon argues that this information fetish has been profoundly damaging to our learning institutions and to the ambitions of our students and educators In The University of Google she projects a defiant and passionate vision of education as a pathway to renewal where research is based on searching and students are on a journey through knowledge

rather than consumers in the shopping centre of cheap ideas Angry humorous and practical in equal measure The University of Google is based on real teaching experience and on years of engaged and sometimes exasperated reflection on it It is far from a luddite critique of the information age Tara Brabazon celebrates the possibilities of digital platforms in education but deplores the consequences of placing funding on technology and not teachers In doing so she opens a new debate on how to make our educational system both productive and provocative in the post information age
