**Education, Conflict and Development** Julia Paulson, 2011-05-16 Under various names education and conflict education and fragility education and insecurity etc the understanding of linkages between education and violent conflict has emerged as an important and pressing area of inquiry Work and research by practitioners and scholars has clearly pointed to the negative potential of education to contribute to and entrench violent conflict This work has highlighted the struggle for education during and following periods of instability and demonstrated the degree to which communities affected by conflict prioritize educational opportunities It has also offered powerful normative arguments for the importance of quality education for peacebuilding reconciliation postconflict reconstruction and development In many instances however these important insights are derived less from rigorous research and scholarship in the social sciences than from the delivery and evaluation of educational programming in situations affected by conflict This volume therefore seeks to broaden enquiry into education and conflict by exploring through conceptual and empirical work its linkages to broader theories and practices of development and peacebuilding The volume begins with a conceptual and theoretical section followed by a series of international case studies before closing with three chapters focused on the case of Northern Uganda Contributors present a diverse set of studies that together deepen understandings of the ways the education functions in various situations affected by conflict and the ways in which it might

best be mobilized to contribute towards peacebuilding and development

### **The Routledge Handbook of Philosophy of Pain**

Jennifer Corns, 2017-07-14 The phenomenon of pain presents problems and puzzles for philosophers who want to understand its nature. Though pain might seem simple, there has been disagreement since Aristotle about whether pain is an emotion, sensation, perception, or disturbed state of the body. Despite advances in psychology, neuroscience, and medicine, pain is still poorly understood, and multiple theories of pain abound. The Routledge Handbook of Philosophy of Pain is an outstanding reference source to the key topics, problems, and debates in this exciting and interdisciplinary subject and is the first collection of its kind. Comprising over thirty chapters by a team of international contributors, the Handbook is divided into nine clear parts: Modeling pain in philosophy; Modeling pain in neuroscience; Modeling pain in psychology; Pain in philosophy of mind; Pain in epistemology; Pain in philosophy of religion; Pain in ethics; Pain in medicine; Pain in law. As well as fundamental topics in the philosophy of pain, such as the nature, role, and value of pain, many other important topics are covered, including the neurological pathways involved in pain processing; biopsychosocial and cognitive behavioural models of pain; chronic pain; pain and non-human animals; pain and knowledge; controlled substances for pain; pain and placebo effects; and pain and physician-assisted suicide. The Routledge Handbook of Philosophy of Pain is essential reading for students and researchers in philosophy of mind, philosophy of psychology, and ethics. It will also be very useful to researchers of pain from any field, especially those in psychology, medicine, and health studies.

### **Citizenship Education in Conflict-Affected Areas**

Bassel Akar, 2019-05-02 Citizenship Education in Conflict-Affected Areas examines the practices of learning and teaching citizenship in Lebanon and explores the implications of the research findings for those working in other sites affected by conflict. Bassel Akar analyses rich empirical data, such as semi-structured interviews with teachers and open-ended survey packs with children in classrooms, which reveal conflicts in notions of citizenship and pedagogical approaches. These in-depth explorations of classroom learning and teaching show the hidden and subtle factors that often subvert intentions to promote social cohesion and active citizenship through education. Examining how individual conceptualizations of citizenship influence approaches to learning and teaching, and vice versa, the author argues that learning citizenship in schools can undermine aims of democratic participation, dialogue, and critical thinking. He concludes and considers why classroom learning of civic education in Lebanon can actually be more harmful than beneficial. Offering new insights for educators and policy makers working beyond the Lebanese context, Citizenship Education in Conflict-Affected Areas is a valuable addition to the research in this growing field.

### **The Burden of Educational Exclusion**

, 2010-01-01 School was nothing but a taboo for me, concludes Johannah, a young South African, after recounting her life story. Johannah is one of the early school leavers who features in this book. Figures on participation in education in Africa show that despite government agreements and policies developed under the banner of Education for All, this remains a remote goal. In several countries, programmes on Universal Primary Education have improved access to education, but do those who enter school remain there until they have reached a

suitable level Do they acquire enough competences at primary and secondary school to survive the tough daily life in sub Saharan countries What happens to children and young adults who leave school early What measures can be taken to prevent them from doing so This book is based on research carried out in Eastern and Southern Africa by scholars from Africa and the Netherlands who cooperated within the framework of the ESLA project The contributions to this book reflect the exchanges and discussions which took place in this research group initiated by staff of Mzumbe University in Tanzania Uganda Martyrs University and the University of Groningen in the Netherlands The group aims to go beyond figures and uncover the causes effects and stories of the young people involved as well as explore promising new strategies with which to address their needs As early school leaving is not exclusively an African problem a contribution on the Dutch situation is also included The book concludes that exclusion from education has far reaching effects not only for the young people involved but also for the society in which they live The burden of educational exclusion should be the joint responsibility of developing and developed countries The authors hope the book will contribute not only to a greater understanding of the phenomenon of early school leaving but also challenge it in terms of developing policies and programmes that can prevent educational exclusion and support those who already find themselves in such a situation

**Educational Justice** Michael S. Merry, 2019-12-20 2020  
 Finalist for Book of the Year Award North American Society of Social and Political Philosophy NASSP This book examines the philosophical motivational and practical challenges of education theory policy and practice in the twenty first century There is a loud and persistent drum beat of support for schools for citizenship for diversity and inclusion and increasingly for labor market readiness with very little critical attention to the assumptions underlying these agendas let alone to their many internal contradictions Merry does not neglect the historical comparative international context so essential to better understanding where we are as well as what is attainable in terms of educational justice He argues that we must constructively critique some of our most cherished beliefs about education if we are to save the hope of real justice from the rhetoric of imagined justice
