Schools For The Shires The Reform Of Middle Class Education In Mid Victorian England:

Schools for the Shires David Ian Allsobrook,1988 Science, Reform, and Politics in Victorian Britain Lawrence Goldman,2002-06-13 This book is a study of the relationships between social thought social policy and politics in Victorian Britain Goldman focuses on the activity of the National Association for the Promotion of Social Science known as the Social Science Association For three decades this served as a forum for the discussion of Victorian social questions and as an influential adviser to governments and its history discloses how social policy was made in these years The Association which attracted many powerful contributors including politicians civil servants intellectuals and reformers had influence over policy and legislation on matters as diverse as public health and women s legal and social emancipation The SSA reveals the complex roots of social science and sociology buried in the non academic milieu of nineteenth century reform And its influence in the United States and Europe allows for a comparative approach to political and intellectual development in this period Imagining the Middle Class Dror Wahrman,1995-07-13 Why and how did the British people come to see themselves as living in a society centred around a middle class The answer provided by Professor Wahrman challenges most prevalent historical narratives the key to understanding changes in conceptualisations of society the author argues lies not in underlying transformations of social structure in this case industrialisation which supposedly created and empowered the middle class but rather in changing political configurations Firmly grounded in a close reading of an extensive array of sources and supported by comparative perspectives on France and America the book offers a nuanced model for the interplay between social reality politics and the languages of class **Evangelicals and Education** Khim Harris,2007-09-01 This is the first history of English public schools founded by Evangelicals in the nineteenth century Five existing public schools can be traced back to this period Cheltenham College Dean Close School Monkton Combe School Trent College and St Lawrence s College Some of these schools were set up in direct competition with new Anglo Catholic schools while others drew their inspiration from and to a greater or lesser extent were modelled on their rivals Harris documents for the first time the rise of Evangelical societies such as the influential Church Association and the little known Clerical and Lay Associations An extensive bibliography and useful biographical survey of influential Evangelicals of the period completes this groundbreaking study **Secondary Education in England 1870-1902** Prof John Roach,John Roach,2012-10-12 In this comprehensive and extensively researched history John Roach argues for a reassessment of the relative importance of State regulation and private provision Although the public schools enjoyed their greatest prestige during this period in terms of educational reform and progress their importance has been exaggerated The role of the public school he suggests was social rather than academic and as such their power and influence is to be interpreted principally in relation to the growth of new social elites the concept of public service and the needs of the empire for a bureaucratic ruling class Only in the modern progressive movement launched by Cecil Reddie and the private provision for young women was lasting progress made Even before the
