## **Schoolsmart And Motherwise Working Class Womens Identity And Schooling:**

**School-smart and Mother-wise** Wendy Luttrell, 2016-02-04 School smart and Mother wise illustrates how and why American education disadvantages working class women when they are children and adults In it we hear working class women black and white rural and urban southern and northern recount their childhood experiences describing the circumstances that led them to drop out of school Now enrolled in adult education programs they seek more than a diploma respect recognition and a public identity Drawing upon the life stories of these women Wendy Luttrell sensitively describes and analyzes the politics and psychodynamics that shape working class life schooling and identity She examines the paradox of women s education particularly the relationship between schooling and mothering and offers practical suggestions for school reform

**Educating Elites** Adam Howard, Rubén A. Gaztambide-Fernández, 2010-10-16 The gaze of educational researchers has traditionally been turned down toward the experiences of communities deemed at risk presumably with the purpose of improving their plight Indeed theorizing about the relationship between education culture and society has typically emerged from the study of poor and marginalized groups in public schools Seldom have educational researchers considered class privilege and educational advantage in their attempts at understanding inequality and fomenting social justice This collection of groundbreaking studies breaks with this tradition by shifting the gaze of inquiry up toward the experiences of privilege in educational environments characterized by wealth and the abundance of material resources This edited volume brings together established and emerging scholars in education and the social sciences working critically to interrogate a diversity of educational environments serving the interests of influential groups both within and beyond schools The authors investigate the power relations that underlie various contexts of class privilege They shed light into the ways in which the success of a few relates to the failure of many

*Higher Education: Handbook of Theory and Research* J.C. Smart, 2012-12-06

*Professional Identity Crisis* Carrie Yang Costello, 2005 The fact that women and people of color tend to underperform at professional schools is a source of controversy Conservatives blame affirmative action while liberals blame intentional discrimination The extensive research reported in Professional Identity Crisis belies both conspiracy theories The author spent over 400 hours observing how first year students are socialized in two very different environments Boalt School of Law and the School of Social Welfare at UC Berkeley watching how they adapted to different expectations of how to speak dress and behave in the classroom Costello found that students who were female of color disabled or poor were not underqualified compared with their privileged peers Nor did the research uncover intentional bigotry Instead the disproportionate success of white men can be explained by the

fact that they are more likely to acquire appropriate professional identities swiftly with little inner conflict Students from less privileged backgrounds however suffered from identity dissonance For example Jasmine a Filipino student from Los Angeles explained In the legal culture you have to adopt a different way of being a different vocabulary and way to carry yourself That s how I got this far And when I go home if I act the way I do here they won t get it My cousins and my friends say You re kind of whitewashed And when I come back here I have to get back my law style
