The Crafting of the 10,000 Things Dagmar Schäfer, 2011-04-15 The last decades of the Ming dynasty though plagued by chaos and destruction saw a significant increase of publications that examined advances in knowledge and technology Among the numerous guides and reference books that appeared during this period was a series of texts by Song Yingxing 1587-1666 a minor local official living in southern China His *Tiangong kaiwu* the longest and most prominent of these works documents the extraction and processing of raw materials and the manufacture of goods essential to everyday life from yeast and wine to paper and ink to boats carts and firearms In *The Crafting of the 10,000 Things* Dagmar Schäfer probes this fascinating text and the legacy of its author to shed new light on the development of scientific thinking in China the purpose of technical writing and its role in and effects on Chinese history Meticulously unfolding the layers of Song's personal and cultural life Schäfer chronicles the factors that motivated Song to transform practical knowledge into written culture She then examines how Song gained, assessed and ultimately presented knowledge and in doing so articulates this era's approaches to rationality, truth and belief in the study of nature and culture alike Finally Schäfer places Song's efforts in conjunction with the work of other Chinese philosophers and writers before, during and after his time and argues that these writings demonstrate collectively a uniquely Chinese way of authorizing technology as a legitimate field of scholarly concern and philosophical knowledge Offering an overview of a thousand years of scholarship *The Crafting of the 10,000 Things* explains the role of technology and crafts in a culture that had an outstandingly successful tradition in this field and was a crucial influence on the technical development of Europe on the eve of the Industrial Revolution

Kingly Splendor Allison R. Miller, 2020-12-01 The Western Han dynasty (202 BCE - 9 CE) was a foundational period for the artistic culture of ancient China a fact particularly visible in the era's funerary art Iconic forms of Chinese art such as dazzling suits of jade, cavernous rock-cut mountain tombs, fancifully ornate wall paintings and armies of miniature terracotta warriors were prepared for the tombs of the elite during this period Many of the finest objects of the Western Han have been excavated from the tombs of kings who administered local provinces on behalf of the emperors Allison R. Miller paints a new picture of elite art production by revealing the contributions of the kings to Western Han artistic culture She demonstrates that the kings were not mere imitators of the imperial court but rather innovators employing local materials and workshops and experimenting with new techniques to challenge the artistic hegemony of the imperial house Tombs and funerary art, Miller contends, functioned as an important vehicle of political expression as kings strove to persuade the population and other elites of their legitimacy Through case studies of five genres of royal art Miller argues that the political structure of the early Western Han, with the emperor as one ruler among peers, benefited artistic production and innovation *Kingly Splendor* brings together close readings of funerary

art and architecture with nuanced analyses of political and institutional dynamics to provide an interdisciplinary revisionist history of the early Western Han

Corporate Conquests C. Patterson Giersch, 2020-04-07 Tenacious patterns of ethnic and economic inequality persist in the rural largely minority regions of China's north and southwest. Such inequality is commonly attributed to geography, access to resources, and recent political developments. In *Corporate Conquests*, C. Patterson Giersch provides a desperately needed challenge to these conventional understandings by tracing the disempowerment of minority communities to the very beginnings of China's modern development. Focusing on the emergence of private and state corporations in Yunnan Province during the late 1800s and early 1900s, the book reveals how entrepreneurs centralized corporate power even as they expanded their businesses throughout the Southwest and into Tibet, Southeast Asia, and eastern China. Bringing wealth and cosmopolitan lifestyles to their hometowns, the merchant owners also gained greater access to commodities at the expense of the Southwest's many indigenous minority communities. Meanwhile, new concepts of development shaped the creation of state-run corporations, which further concentrated resources in the hands of outsiders. The book reveals how important new ideas and structures of power, now central to the Communist Party's repertoire of rule and oppression, were forged not along China's east coast but along the nation's internal borderlands. It is a must-read for anyone wishing to learn about China's unique state capitalism and its contribution to inequality.

Cultures in Motion Daniel T. Rodgers, Bhavani Raman, Helmut Reimitz, 2017-05-09 In the wide-ranging and innovative essays of *Cultures in Motion*, a dozen distinguished historians offer new conceptual vocabularies for understanding how cultures have trespassed across geography and social space. From the transformations of the meanings and practices of charity during late antiquity and the transit of medical knowledge between early modern China and Europe to the fusion of Irish and African dance forms in early nineteenth-century New York, these essays follow a wide array of cultural practices through the lens of motion, translation, itinerancy, and exchange, extending the insights of transnational and translocal history. *Cultures in Motion* challenges the premise of fixed, stable cultural systems by showing that cultural practices have always been moving, crossing borders and locations with often surprising effect. The essays offer striking examples from early to modern times of intrusion, translation, resistance, and adaptation. These are histories where nothing—dance, rhythms, alchemical formulas, musical practices, feminist aspirations, sewing machines, streamlined metals, or labor networks—remains stationary. In addition to the editors, the contributors are Celia Applegate, Peter Brown, Harold Cook, April Masten, Mae Ngai, Jocelyn Olcott, Mimi Sheller, Pamela Smith, and Nira Wickramasinghe.

State Power in Ancient China and Rome Walter Scheidel, 2015 Two thousand years ago, the Qin, Han, and Roman empires were the largest political entities of the ancient world, developing simultaneously yet independently at opposite ends of Eurasia. Although their territories constituted only a small percentage of the global land mass, these two Eurasian polities controlled up to half of the world population and endured longer than most pre-modern imperial states. Similarly, their eventual collapse occurred during the same time. The parallel nature of the Qin, Han, and

Roman empires has rarely been studied comparatively Yet here is a collection of pioneering case studies compiled by Walter Scheidel that sheds new light on the prominent aspects of imperial state formation This essential new volume builds on the foundation of Scheidel s Rome and China 2009 and opens up a comparative dialogue among distinguished scholars They provide unique insights into the complexities of imperial rule including the relationship between rulers and elite groups the funding of state agents the determinants of urban development and the rise of bureaucracies By bringing together experts in each civilization State Power in Ancient China and Rome provides a unique forum to explore social evolution helping us further understand government and power relations in the ancient world
